Shares And Other Securities In The Conflict Of Laws:

Shares and Other Securities in the Conflict of Laws Maisie Ooi, 2003 This book examines the problems of choice of law relating to shares and other securities It is a subject that occupied a fairly obscure corner of conflict of laws until the impetus given to it by *Macmillan v Bishopsgate Investment Trust No 3* and recent interest generated by fears within the international financial community that the conflicts problems arising from the modern system of securities holding through intermediaries threatens the system's viability At both European and international levels efforts have been made to legislate for certainty in an area of the greatest practical importance to the major players in the capital markets as the value of cross border transactions in such securities runs into billions of pounds daily *Shares and Other Securities in the Conflict of Laws* is divided into two parts Part I determines the present state of English law with respect to choice of law treatment of dealings in shares and examines the basic rules involved It considers the context in which the rules have evolved the situations in which they are said to apply and have been applied and the place of the rules in the conflicts treatment of securities transactions today The main focus is on dealings with shares in the traditional direct holding system from which the basic rules developed Part II considers the difficulties associated with the application and extension of the basic rules to the choice of law issues that arise in the indirect holding system the various theories and legislative reforms of the EU and at the Hague that have been suggested in respect to their resolution and the extent to which they provide a viable solution Comparison is also made with the related law reform initiatives in the US of Revised Articles 8 and 9 of the Uniform Commercial Code The book concludes with an examination of special choice of law concerns in insolvency and arising from collateralization such as perfection and recharacterization the impact of dematerialization and immobilization on shares and the choice of law problems posed by them
