Caring is Sharing — Exploiting the Value in Data for Health and Innovation M. Häggglund, M. Blusi, S.

Bonacina, 2023-06-22 Modern information and communication technologies make it easier for individuals to be involved in their own health and social care. They also facilitate contact between individuals and service providers and deliver more efficient tools for healthcare staff. Artificial Intelligence (AI) promises to bring even more benefits in the future with more effectiveness and the provision of decision support. This book presents the proceedings of the 33rd Medical Informatics Europe Conference (MIE2023) held in Gothenburg, Sweden, from 22 to 25 May 2023. The theme of MIE2023 was Caring is Sharing: Exploiting Value in Data for Health and Innovation, stressing the increasing importance of sharing digital health data and the related challenges. The sharing of health data is developing rapidly both in Europe and beyond, so the focus of the conference was on the enabling of trustworthy sharing of data to improve health. Topics covered include healthcare, community care, self-care, public health, and the innovation and development of future-proof digital health solutions, and the almost 300 papers divided into 10 chapters also cover important advances in the sub-domains of biomedical informatics, decision support systems, clinical information systems, clinical research informatics, knowledge management, and representation, consumer health informatics, natural language processing, public health informatics, privacy, ethical and societal aspects, among them. Describing innovative approaches to the collection, organization, analysis, and data sharing related to health and wellbeing, the book contributes to the expertise required to take medical informatics to the next level and will be of interest to all those working in the field. **Sharing Assessment in Health and Social Care** Carolyn

Wallace, Michelle Davies, 2009-09-18 This is an accessible and important text. It is to be commended for bringing together policy and practice on assessment and information sharing across England, Scotland, and Wales. Professor Michael Preston, Shoot University of Bedfordshire. This new text is a welcome addition to the literature relating to inter-professional working. It offers students from a range of professions a comprehensive guide to current social policy and authoritative guidance on how to conduct a safe and effective assessment. Soo Moore, City University London. Shared assessment is the standardised approach to assessment and the sharing of information and documentation within and between health and social care. This book offers students and practitioners a step-by-step guide to the process, helping them to overcome some of the anxieties of change and providing realistic guidance on the process. Key features of the book include: Comprehensive coverage following a logical structure looking at context, policy, and practice. A focus on the practitioner's understanding of an individual's experience and the roles of staff within the process. Discussion of confidentiality and anti-discriminatory practice. Four chapter-long case studies that take the reader through the stages of assessment and subsequent roles and responsibilities. The book includes pedagogical features such as a glossary of terms, a Comparative Grid for Standardised Assessment Frameworks, examples of carers' assessments, reflective questions, and further reading. It is essential reading for students and

practitioners working across health and social care particularly in social work nursing and mental health **Sharing the Sky** David H. Levy, Larry A. Lebofsky, Nancy R. Lebofsky, 2013-11-11 **Legendary Living** Dr. M. Sarada Devi, 2017-12-21
