Authentic™ Sarah Banet-Weiser,2012-11-26 A stimulating smart book on what it means to live in a brand culture Brands are everywhere Branding is central to political campaigns and political protest movements the alchemy of social media and self branding creates overnight celebrities the self proclaimed greening of institutions and merchant goods is nearly universal But while the practice of branding is typically understood as a tool of marketing a method of attaching social meaning to a commodity as a way to make it more personally resonant with consumers Sarah Banet Weiser argues that in the contemporary era

brands are about culture as much as they are about economics That in fact we live in a brand culture Authentic™ maintains that branding has extended beyond a business model to become both reliant on and reflective of our most basic social and cultural relations Further these types of brand relationships have become cultural contexts for everyday living individual identity and personal relationships what Banet Weiser refers to as brand cultures Distinct brand cultures that at times overlap and compete with each other are taken up in each chapter the normalization of a feminized self brand in social media the brand culture of street art in urban spaces religious brand cultures such as New Age Spirituality and Prosperity Christianity and the culture of green branding and shopping for change In a culture where graffiti artists loan their visions to both subway walls and department stores buying a cup of fair trade coffee is a political statement and religion is mass marketed on t shirts Banet Weiser questions the distinction between what we understand as the authentic and branding practices But brand cultures are also contradictory and potentially rife with unexpected possibilities leading Authentic™ to articulate a politics of ambivalence creating a lens through which we can see potential political possibilities within the new consumerism
