The Fatherhood Movement Wade F. Horn, David Blankenhorn, Mitchell B. Pearlstein, 1999-01-01 The fatherhood movement has established itself as the most innovative and effective response to the most daunting crisis facing American families Written by the movement's founders this indispensable book illustrates the movement's methods for reconnecting men with their children and restoring the fragile bonds that hold our society together This book is the manifesto of the fatherhood movement and it provides valuable insights into the historical social economic and spiritual dimensions of the disappearance of fathers from society Reflecting the complex nature of this problem the contributors include activists politicians public intellectuals and academics from a broad range of disciplines They not only identify the root causes of the widespread withdrawal of fathers from family life but also offer specific remedies on the individual local and national levels This is a timely and important contribution to a topic of growing concern to all Americans

Family Mediation Howard H. Irving, 2002-10-01 It is important to understand that when a marriage is over it is not the time for retribution and revenge but rather the opportunity to strike out for a new life while providing for and protecting the children This book the first comprehensive treatment of family mediation for Chinese families provides the knowledge and skills to achieve that objectives Throughout the book the author discusses practical techniques for resolving family conflicts and creating parenting plans The model described enables mediators who may be social work psychology or legal professionals to negotiate the issues in dispute so as to arrive at a settlement that is mutually acceptable and is fair and equitable to the families Divorcing couples should also read the book because it will help them with ideas and principles leading towards amicable solutions

Are the Kids Alright? Linda Rose Ennis, 2023-05-01 During the pandemic the focus has been on how education and social interaction with peers were integral to children's functioning However very little regard was given to another very important question how do our children feel about the pandemic and how do they process this experience Why is it assumed that cognitive functioning and social interaction are the most significant areas of child development What emotional factors are at play Are the children alright How are their families coping and does this have an impact on the children What I hope to achieve by compiling this edited

collection is to bring awareness to the child's perspective within the family unit in addition to addressing other contributing factors that had an impact on their coping mechanisms. This collection will hopefully inform whether the choices that were made and should be made related to children have been sound ones and perhaps should be re-examined as a result of this book's findings, conclusions, and speculations.

Emotional Terrors in the Workplace: Protecting Your Business' Bottom Line Vali Hawkins Mitchell, 2004-11. Annotation: Reasonable variations of human emotions are expected at the workplace. People have feelings. Emotions that accumulate, collect force, expand in volume, and begin to spin are another matter entirely. Spinning emotions can become as unmanageable as a tornado, and in the workplace they can cause just as much damage in terms of human distress and economic disruption. All people have emotions. Normal people and abnormal people have emotions. Emotions happen at home and at work. So understanding how individuals or groups respond emotionally in a business situation is important in order to have a complete perspective of human beings in a business function. Different people have different sets of emotions. Some people let emotions roll off their back like water off a duck. Other people swallow emotions and hold them in until they become toxic waste that needs a disposal site. Some have small, simple feelings, and others have large, complicated emotions. Stresses of life tickle our emotions or act as fuses in a time bomb. Stress triggers emotion. Extreme stress complicates the wide range of varying emotional responses. Work is a stressor. Sometimes work is an extreme stressor. Since everyone has emotion, it is important to know what kinds of emotion are regular and what kinds are irregular, abnormal, or damaging within the business environment. To build a strong, well-grounded value-added set of references for professional discussions and planning for Emotional Continuity Management, a manager needs to know at least the basics about human emotion. Advanced knowledge is preferable. Emotional Continuity Management planning for emotions that come from the stress caused by changes inside business, from small adjustments to catastrophic upheavals, requires knowing emotional and humanity-based needs and functions of people and not just technology and performance data. Emergency and Disaster Continuity planners sometimes posit the questions: What if during a disaster your computer is working but no one shows up to use it? What if no one is working the computer because they are terrified to show up to a worksite devastated by an earthquake or bombing and they stay home to care for their children? The Emotional Continuity Manager asks: What if no one is coming or no one is producing even if they are at the site because they are grieving or anticipating the next wave of danger? What happens if employees are engaged in emotional combat with another employee through gossip, innuendo, or out and out verbal warfare? And what if the entire company is in turmoil because we have an Emotional Terrorist who is just driving everyone bonkers? The answer is that in terms of bottom line thinking, productivity is productivity, and if your employees are not available because their emotions are not calibrated to your industry standards, then fiscal risks must be considered. Human compassion needs are important. And so is money. Employees today
