Sharing Responsibility:

Sharing Responsibility Larry May, 1996-06 Are individuals responsible for the consequences of actions taken by their community What about their community's inaction or its attitudes In this innovative book Larry May departs from the traditional Western view that moral responsibility is limited to the consequences of overt individual action Drawing on the insights of Arendt Jaspers and Sartre he argues that even when individuals are not direct participants they share responsibility for various harms perpetrated by their communities Sharing Responsibility Luke Glanville, 2021-05-18 A look at the duty of nations to protect human rights beyond borders why it has failed in practice and what can be done about it The idea that states share a responsibility to shield people everywhere from atrocities is presently under threat Despite some early twenty first century successes including the 2005 United Nations endorsement of the Responsibility to Protect the project has been placed into jeopardy due to catastrophes in such places as Syria Myanmar and Yemen resurgent nationalism and growing global antagonism In *Sharing Responsibility* Luke Glanville seeks to diagnose the current crisis in international protection by exploring its long and troubled history With attention to ethics law and politics he measures what possibilities remain for protecting people wherever they reside from atrocities despite formidable challenges in the international arena With a focus on Western natural law and the European society of states Glanville shows that the history of the shared responsibility to protect is marked by courageous efforts as well as troubling ties to Western imperialism evasion and abuse The project of safeguarding vulnerable populations can undoubtedly devolve into blame shifting and hypocrisy but can also spark effective burden sharing among nations Glanville considers how states should support this responsibility whether it can be coherently codified in law the extent to which states have embraced their responsibilities and what might lead them to do so more reliably in the future *Sharing Responsibility* wrestles with how countries should care for imperiled people and how the ideal of the responsibility to protect might inspire just behavior in an imperfect and troubled world *Guidelines for designing data collection and sharing systems for co-managed fisheries. 1. Practical guide* Ashley S. Halls, 2005 *Refugees, Regionalism and Responsibility* Penelope Mathew, Tristan Harley, 2016-07-27 The ongoing refugee and migrant crisis in Europe has accelerated the need to find answers for refugee movements *Refugees Regionalism and Responsibility* examines regional cooperation as a potential solution Through a thorough assessment of past and present regional arrangements concerning refugees this book considers whether regionalism has resulted in protection and durable solutions for both refugees and participating states **Chief Information Officers responsibilities and information and technology governance at leading private sector companies : report to congressional requesters.** United States Government Accountability Office, 2005 *Encyclopedia of Medical Decision Making* Michael W. Kattan, 2009-08-15 Decision making is a critical element in the field of medicine that can lead to life or death outcomes yet it is an element fraught with complex and conflicting variables diagnostic and therapeutic uncertainties patient preferences and values and costs Together decisions

made by physicians patients insurers and policymakers determine the quality of health care quality that depends inherently on counterbalancing risks and benefits and competing objectives such as maximizing life expectancy versus optimizing quality of life or quality of care versus economic realities Broadly speaking concepts in medical decision making MDM may be divided into two major categories prescriptive and descriptive Work in the area of prescriptive MDM investigates how medical decisions should be done using complicated analyses and algorithms to determine cost effectiveness measures prediction methods and so on In contrast descriptive MDM studies how decisions actually are made involving human judgment biases social influences patient factors and so on The Encyclopedia of Medical Decision Making gives a gentle introduction to both categories revealing how medical and healthcare decisions are actually made and constrained and how physician healthcare management and patient decision making can be improved to optimize health outcomes Key Features Discusses very general issues that span many aspects of MDM including bioethics health policy and economics disaster simulation modeling medical informatics the psychology of decision making shared and team medical decision making social moral and religious factors end of life decision making assessing patient preference and patient adherence and more Incorporates both quantity and quality of life in optimizing a medical decision Considers characteristics of the decisionmaker and how those characteristics influence their decisions Presents outcome measures to judge the quality or impact of a medical decision Examines some of the more commonly encountered biostatistical methods used in prescriptive decision making Provides utility assessment techniques that facilitate quantitative medical decision making Addresses the many different assumption perspectives the decision maker might choose from when trying to optimize a decision Offers mechanisms for defining MDM algorithms With comprehensive and authoritative coverage by experts in the fields of medicine decision science and cognitive psychology and healthcare management this two volume Encyclopedia is a must have resource for any academic library

Reduced Parenthetical Clauses as Mitigators Stefan Schneider, 2007-02-01 While parentheticals attract constant attention they very rarely constitute the main subject of monographs This book provides a comprehensive account of reduced parenthetical clauses RPCs in three Romance languages Typical French RPCs are *je crois disons je dirais je pense je sais pas* and *je trouve* The research draws on 22 corpora of spoken French Italian and Spanish comprising a total amount of 3 975 500 words Its results consist in a typology of the relevant expressions in the three languages in the understanding of their pragmatic function and of the factors influencing their use and in the description of their syntactic and prosodic properties Other findings are that RPCs are not restricted to statements but also occur in questions and that belief verbs are not as frequent as commonly assumed Although the book is about Romance parentheticals its conclusions are relevant for other languages
