The Power of Babies Daniel Rousseau,2023-07-04 We follow the journey of Melanie Lorenzo Fiona Eric babies observed day by day from birth and for several months or years in the construction of their relationship with the world with their parents and with their surroundings What do they show us The astonishing capacities of the baby to connect to the brain of another human to nestle in it like a small psychic marsupial after having scanned in its environment the best available affective Wi Fi terminal Not necessarily its father or mother if they do not meet its criteria of absolute requirement as regards quality and safety of the emotional connection that is available Melanie from the fourth day of life chose to renounce her parents who were unable to pay attention to her and asked for help from the professionals of the maternity hospital and then of the nursery where she was placed after a dramatic episode of psychological coma During the first year of her life in order to escape the insecurity generated by her parents Melanie fell asleep as soon as they want to carry her but woke up as if by magic as soon as she was in other safer even unknown arms Lorenzo barely two weeks old cried during a consultation and quickly calmed down in the arms of a nursery nurse while his mother admitted that she could never calm him down at home For the next two weeks his crying quickly subsided because in order not to be mistreated by his father who was exasperated by his cries Lorenzo had learned to cry quietly Placed in an institution at the age of one month he was a very gentle baby shying away from relationships silent but he changed completely when he found himself facing his father who had shaken him His whole body stiffened and he stared at his father with a hypnotic and worrying look It would be several weeks before he re established quality Wi Fi connections with his mothering Eric was not lucky enough to be separated early enough from his parents who abandoned him in his bed deprived

of emotional and sensory life deprived of Wi Fi Removed from his family at the age of three he was a little boy who lost interest in humans but was fascinated by beeps the fridge lamp toy batteries electric buttons He became an electronic baby looped disconnected from the web of humans These stories tell us how babies from birth have this skill to test by themselves the quality of the connections of the human network that surrounds them and to choose their first emotional attachments according to the quality of the signals received in return without worrying about their filiation or their biological reality A shock They reveal to us through this unheard of skill what is human in a person and how the little person becomes human A new and modern vision of the human baby These babies show us the intense efforts they make from the moment they are born to relate and to be kind to make themselves light in the arms that carry them to exist in the brains they cram into to ensure their safety and to download the knowledge of the world they need to survive Babies very actively adapt to their new life as earthlings through the Wi Fi connections they make in the first few minutes of their lives The author concludes his book with a call to consider the reality of the psychic suffering of abused babies Twenty five years ago the medical world finally discovered that babies could feel physical pain which has since been recognized and treated Before that they were operated on without any anesthesia From today s perspective this is barbaric It is urgent to make the same intellectual revolution for the psychological pain and emotional distress of the infant which is detectable and curable if we know how to spot the signs from birth The psychological future of thousands of babies every year depends on it Let s save human babies A child psychiatrist in France for 25 years the author has received three awards for his work on children from the Aide Sociale à l'Enfance the Fondation pour la Recherche Médicale and the Observatoire National de l'Enfance en Danger He was also the winner of a short story contest on psychiatry He has worked for more than 20 years in a nursery in Maine et Loire in the west of France It Was Only for a Moment Termica Shontel Harris,2008 **Ukraine Symposium: International Law in the**

Williams,Colin Pritchard,2006-05-16 Truancy delinquency and school exclusion pose major challenges to the drive to promote social inclusion and raise standards for all Many children who are truants or become excluded from school have inherited a sense of educational alienation from their parents whose own negative perceptions of the education system make it difficult for them to collaborate with the school In this groundbreaking book the authors show how the cycle of educational alienation can be broken to enable parents and schools to work together to contribute to children s educational social and emotional well being They illustrate this by exploring a highly successful initiative in a school with severe socio economic disadvantages which in conjunction with a school based social work service developed an effective family teacher community alliance They demonstrate the substantial improvements that such a multiprofessional approach can bring about in reducing truancy delinquency and exclusion and helping children to become positive fulfilled and included members of their schools and communities Breaking the Cycle of Educational Alienation is key reading for teachers and trainee teachers child
