Shattered Glass:

Shattered Glass Angela Dickerson Hewlett, 2024-11-30 Windows Shattered Amelia Khatri, AI, 2025-02-12

Windows Shattered explores the surprising role of broken windows as potent symbols in political history and social upheaval. It argues that these acts of destruction aren't mere vandalism but visual representations of pivotal moments. The book traces the history of glass from a luxury item to a common building material to demonstrate how its presence reflects societal structures and economic inequalities. The book analyzes how shattered windows have visually represented revolutionary fervor such as during the storming of the Bastille and how they've become a visual language of protest and resistance like the suffragettes' actions. It examines specific events chronologically and thematically drawing from historical archives, news reports, personal accounts, and visual culture offering a fresh perspective on social change by focusing on the symbolic meaning behind broken windows. **Windows Shattered** progresses from establishing historical context to analyzing significant events where shattered windows played a crucial role and finally to examining the aftermath and long-term impact of these symbolic acts. It also addresses the debate surrounding the ethics of violent protest providing a balanced account of the complex relationship between destruction, resistance, and social progress.

Springs of Action Alfred R. Mele, 1992

Tackling some central problems in the philosophy of action, Mele constructs an explanatory model for intentional behavior, locating the place and significance of such mental phenomena as beliefs, desires, reasons, and intentions in the etiology of intentional action. In the first part, Mele illuminates the connection between desire and action and defends detailed characterizations of irresistible desires and reasons for action. Mele argues for the viability of a causal approach to the explanation of intentional action in terms of psychological states and events, paying special attention to recent worries about the causal relevance of the mental. In Part Two, Mele goes on to develop a subtle and well-defended view that the motivational role of intentions is of a different sort from that of beliefs and desires. Mele's account, based largely on a careful study of the functions of intentions, presents intentions as states irreducible to collections of beliefs and desires which hinge on their executive and representational features. **Springs of Action** will be of interest not only to philosophers of action but also to those interested in the philosophy of mind, metaphysics, and ethics.
