Functional Properties Of Bio-inspired Surfaces: Characterization And Technological Applications Eduardo A Favret,Nestor O Fuentes,2009-12-28 Many good books have been written recently on this new field called biomimetics or bionics but few exploring simultaneously the characterization and technological processes to produce man made surfaces with similar properties as the biological ones Bio inspired surface structures offer significant commercial potential for the creation of antireflective self cleaning and drag reducing surfaces as well as new types of adhesive systems This review volume explores how the current knowledge of the biological structures occurring on the surface of moth eyes leaves sharkskin and the feet of reptiles can be transferred to functional technological materials It analyses how such surfaces can be described and characterized using microscopic techniques and thus reproduced It also encompasses the important areas of current surface replication techniques and the associated acquisition of good master structures The book is divided in three sections an introduction of the skin functions and four functional properties of biological surfaces physical chemical and microscopy techniques for describing and characterizing the surfaces and replication techniques for modifying non natural surfaces

Surfaces and Interfaces of Biomimetic Superhydrophobic Materials Zhiguang Guo,Fuchao Yang,2017-12-26 A comprehensive and systematic treatment that focuses on surfaces and interfaces phenomena inhabited in biomimetic superhydrophobic materials offering new fundamentals and novel insights As such this new book covers the natural surfaces fundamentals fabrication methods and exciting applications of superhydrophobic materials with particular attention paid to the smart surfaces that can show

switchable and reversible water wettability under external stimuli such as pH temperature light solvents and electric fields It also includes recent theoretical advances of superhydrophobic surfaces with regard to the wetting process and some promising breakthroughs to promote this theory As a result materials scientists physicists physical chemists chemical engineers and biochemists will benefit greatly from a deeper understanding of this topic *A Vision of Unity* Roger Hagglund,1985 *Mirror of Reality and Dreams* Irena Avsenik Nabergoj,2008 This book deals with the works of Ivan Cankar the greatest Slovenian writer focusing on his relation to existential social and moral reality as reflected in individuals and in society at large The method of literary analysis shows a surprising harmony between personal confessions and a rich symbolism that reveals the writer s unconditional belief in the power of conscience strong conviction of the sense of victims and the longing for the triumph of love and justice A holistic interpretation yields the conclusion that most of Cankar s works are confessions that purport to be true to life His inclination to self disclosure in dreams alongside the objective disclosure of imperceptible reality indicates that expressive language and a lyrical style are of vital importance to him **Minimally**

Invasive Surgical Techniques for Cancers of the Gastrointestinal Tract Joseph Kim,Julio Garcia-Aguilar,2019-10-09 Similar to the 1st edition the 2nd edition of Minimally Invasive Surgical Techniques for Cancers of the Gastrointestinal Tract provides different approaches for various organs of the gastrointestinal tract This book provides an updated resource of advanced minimally invasive surgical techniques for patients with GI cancers It is primarily designed to provide a step by step approach of surgical techniques highlighting key learning points and potential operative pitfalls The text is largely focused on minimally invasive surgical techniques laparoscopic and robotic with new chapters on innovations in gastric cancer surgery including middle gastrectomy pylorus preserving gastrectomy and sentinel lymph node dissection In addition the text also includes new chapters on single incision surgery for cancers of the GI tract on advanced instrumentation for trans anal procedures and on refined robotic approaches to total mesorectal excision Chapters are written by experts with extensive experience in new techniques and are accompanied by companion videos in almost every chapter The 2nd edition of Minimally Invasive Surgical Techniques for Cancers of the Gastrointestinal Tract proves to be a valuable resource for surgeons at all levels of training that are interested in learning new techniques to improve patient satisfaction and cancer outcomes

Polymer Science and Innovative Applications Mariam Al Ali AlMaadeed,Deepalekshmi Ponnammam,Marcelo A. Carignano,2020-05-29 Polymer Science and Innovative Applications Materials Techniques and Future Developments introduces the science of innovative polymers and composites their analysis via experimental techniques and simulation and their utilization in a variety of application areas This approach helps to unlock the potential of new materials for product design and other uses The book also examines the role that these applications play in the human world from pollution and health impacts to their potential to make a positive contribution in areas including environmental remediation medicine and healthcare and renewable energy Advantages disadvantages possibilities and challenges relating to the utilization of

polymers in human society are included Presents the latest advanced applications of polymers and their composites and identifies key areas for future development Introduces the simulation methods and experimental techniques involved in the modification of polymer properties supported by clear and detailed images and diagrams Supports an interdisciplinary approach enabling readers across different fields to harness the power of new materials for innovative applications

The Child of Gulag Yuri Feynberg, 2013-02 This story is based on the life of author Yuri Feynberg who is one of the last surviving children of the Soviet Penal System known to the world as the GULAG Although not a prisoner Yuri spent his childhood behind the barbed wired fence in a remote Siberian hard labor camp where his mother worked as a medical doctor As the only child there he lived among Stalin s political prisoners hardcore criminals and security guards This extraordinary childhood created an unusual personality and an unbendable character which made it possible for Yuri to excel in the Soviet Special Forces survive prosecution and overcome unfathomable personal tragedies without losing his humanity

Running with Reindeer Roger Took, 2008-11-10 Russian Lapland a region of amazing contrasts Here lies the last true wilderness of Europe a rich and pristine ecosystem teeming with bird and animal life But here too lie the dark satanic mills of the former Soviet Union and the rotting remnants of nuclear submarines Running with Reindeer is the first account in over a century to describe life in this harsh but beautiful land Living among remote reindeer herding and hunting families Roger Took spends a decade following the lives and traditions of the indigenous Lapps or Saami He meets pioneering villagers descended from medieval Novgorod fur traders who are now learning to cope with the new economy and the men and women originally forced north to mine Russian Lapland s fabulous mineral wealth but are now unemployed and stranded Avoiding the still vigilant security services he explores the naval bases where nuclear powered submarines are lying dangerously neglected His encounters with the land and its inhabitants are dramatic and comical as well as emotionally disturbing and physically dangerous Moving between the

lines of the official histories coping with arduous Arctic conditions he writes compellingly offering a vivid account of a unique part of Europe
