factor alone will not get us there Our sleep our mood what we eat our detoxification system and our hormones are just some of the factors that interact in amazing ways to make us who we are they are also at the very heart of the ageing process This book shows how these different strands combine in ways that can be positive or negative and explains why this interaction depends far more on the lifestyle we choose than on the genes we inherit In that way it gives the reader a unique and comprehensive understanding of their body and tells them how with this knowledge they can optimise their health The topics range from nutrition toxins men s health and women s health to understanding why our skin brain and liver age and how to undo the damage and stave off ageing But the book s main focus underlying all of this is hormones the chemicals that tell different parts of our body what to do Our hormone levels vary throughout our life but if they are supported correctly they can keep us youthful and vital into our final years Finding health then is not about seven ways to detox or the five best vitamins The body is far more complex than that and in an approach aimed specifically at the layperson Younger for Longer traces the exciting path of how the body works to help the reader create the best person they can be for the rest of their life
