Chambers, Francis Stapleton Chambers, 1914 Thinking About National Security Donald M. Snow, 2015-07-16 A Choice Outstanding Academic Title for 2016 Perhaps the most basic national security question that U.S. leaders and the body politic continuously face is where and under what circumstances to consider and in some cases resort to the use of armed force to ensure the country's safety and well being The question is perpetual but the answer is not This insightful text helps students make sense of the ever changing environment and factors that influence disagreement over national security risks and policy in the United States The book takes shape through a focus on three considerations strategy policy and issues Snow explains the range of plans of action that are possible and resources available for achieving national security goals as well as the courses of action for achieving those goals in the context of a broad range of security problems that must be dealt with However there is little agreement among policymakers on exactly what is the nature of the threats that the country faces Snow helps readers frame the debate by suggesting some of the prior influences on risk assessment some of the current influences on national security
