

Taking Care of a Fish

Fish live in water and there are lots of different types.

Things a fish will need

Fish like good water because they can breathe and feel relaxed.

But fish need to live in clean water or they can become ill.

Taking Care of a Fish

Fish are very good at looking after themselves but they do need lots of equipment.

What does a fish look like?

What does a fish need?

What do I need to remember about looking after my fish?

Different fish require different things. A goldfish needs cold water but other fish, like tropical fish, need warm water. Some fish need to be in salty water, like seawater, whereas other need fresh water.

How do I keep my fish healthy?

Fish breathe by taking in water through their gills. Therefore, it is vital for the water to be cleaned regularly. In a tank, the water is often cleaned by a filter.

Taking Care of a Fish

Fish are very popular pets. Unlike dogs and cats, they are not kept out of doors, but they are beautiful to watch and very relaxing.

What does a fish look like?

Fish, which come in a wide range of colours, are small animals that live in water. They move through the water using their fins and tails to help them. On the sides they have gills that they use to help them breathe under water. Additionally, they have large eyes to help them look around.

What does a fish need?

In the home, fish need to be kept in a fish tank. If there is just one fish, like a goldfish, then they can live in a fairly small tank but they need enough room to move freely. You may choose to keep lots of fish at one time, but if you do, you will need a large tank. Some fish live in cold water so their tank can be filled with water from the tap. Others need warm water to survive so their tank needs to have a special part that heats the water up. Some fish need fresh water, while others will need salt water in order to stay healthy.
