Emotion Concepts Zoltan Kövecses,2012-12-06 This chapter briefly describes the general goals of the book introduces the most fundamental features of the methodology that is employed to achieve these goals and gives an outline of the structure of the book A more detailed account of the goals and methodology is presented in chapters 2 and 3 respectively What the Book Is About The main objective of this study is to attempt to answer the question How do people understand their emotions As we shall see in the next chapter a large number of scholars have tried to provide answers to this question The interest in the way people understand their emotions has led scholars to the issue of the nature of emotion concepts and emotional meaning Since the notion of understanding involves or presupposes the notions of concept and meaning it was only

natural for scholars with an interest in the way people understand their emotions to turn their attention to emotion concepts and the meaning associated with emotion terms. So the broader issue has often become more specific. For example, Davitz in his *The Language of Emotion* formulated the central question in the following way: What does a person mean when he says someone is happy or angry or sad? Davitz, 1969, 1.

A Human-Shaped God Charles Halton, 2021-10-26. A Human Shaped God approaches the humanlike accounts of God in the Old Testament as the starting places for theology and uses them to build a picture of the divine. This understanding of God is then brought into conversation with traditional conceptions that depict God as a being who knows everything that happens, is at every place at the same time, is constant and unchanging, and does not ultimately have material form. But instead of pitting the Old Testament's humanlike view of God against traditional theology and assuming that only one of these understandings is correct, A Human Shaped God posits that theologians should embrace both of these constructions simultaneously. This is a new way of theological inquiry that embraces both the humanlike characteristics of God and the transcendence of God in traditional theology. By seeing and understanding the humanlike depictions of God in the Old Testament and by using the rich language of traditional theology together in tandem, the reader acquires a much deeper and meaningful understanding of God. *New York Magazine*, 1997-04-07. New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea.

Seven Glees, with a Witches Song & Chorus, and two glees from melodies, by Henry Lawes ... Opera 6 Richard John Samuel Stevens, 1825.

The Moving Picture World, 1914. *Fairbairn's Object Relations Theory in the Clinical Setting* David P. Celani, 2010.

W. R. D. Fairbairn, 1889-1964, challenged the dominance of Freud's drive theory with a psychoanalytic theory based on the internalization of human relationships. Fairbairn assumed that the unconscious develops in childhood and contains dissociated memories of parental neglect, insensitivity, and outright abuse that are impossible for the children to tolerate consciously. In Fairbairn's model, these dissociated memories protect developing children from recognizing how badly they are being treated and allow them to remain attached even to physically abusive parents. Attachment is paramount in Fairbairn's model as he recognized that children are absolutely and unconditionally dependent on their parents. Kidnapped children who remain attached to their abusive captors despite opportunities to escape illustrate this intense dependency even into adolescence. At the heart of Fairbairn's model is a structural theory that organizes actual relational events into three self and object pairs: one conscious pair, the central ego which relates exclusively to the ideal object in the external world; and two mostly unconscious pairs, the child's antilibidinal ego which relates exclusively to the rejecting parts of the object, and the child's libidinal ego which relates exclusively to the exciting parts of the object. The two dissociated self and object pairs

remain in the unconscious but can emerge and suddenly take over the individual's central ego. When they emerge, the other is misperceived as either an exciting or a rejecting object, thus turning these internal structures into a source of transferences and reenactments. Fairbairn's central defense mechanism, splitting, is the fast shift from central ego dominance to either the libidinal ego or the antilibidinal ego, a near perfect model of the borderline personality disorder. In this book, David Celani reviews Fairbairn's five foundational papers and outlines their application in the clinical setting. He discusses the four unconscious structures and offers the clinician concrete suggestions on how to recognize and respond to them effectively in the heat of the clinical interview. Incorporating decades of experience into his analysis, Celani emphasizes the internalization of the therapist as a new good object and devotes entire sections to the treatment of histrionic, obsessive, and borderline personality disorders.
