Migration Metropolitan Growth Two Anal:

Alternative Futures for Nonmetropolitan Population, Income, Employment, and Capital Clark Edwards, Rudolph Earl DePass, 1975 Population, Place, and Spatial Interaction Rachel S. Franklin, 2019-11-23 This volume is devoted to the geographical or spatial aspects of population research in regional science spanning spatial demographic methods for population composition and migration to studies of internal and international migration to investigations of the role of population in related fields such as climate change and economic growth If spatial aspects of economic growth and development are the flagship of the regional science discipline population research is the anchor People migrate consume produce and demand services People are the source and beneficiaries of national regional and local growth and development Since the origins of regional science demographic research has been at the core of the discipline Contributions in this volume are both retrospective and prospective offering in their ensemble an authoritative overview of demographic research within the field of regional science *The Migration Turn and Eastern Europe* Attila Meleg, 2023-02-22 Using Marxist and Polanyian frameworks this book examines the structural and discursive transformation that can explain the polarization of migration debates and within the rise of nationalist anti migrant discourses in Europe with a special attention to Eastern Europe and Hungary It goes beyond the mainstream explanations of these phenomena that uses nationalist propaganda as causal factors and instead argues that the rise of anti immigration currents cannot be understood without a dialectical and historical analysis of the material and discursive transformations most importantly marketization and related reification Drawing from thinkers such as Luk cs Polanyi and Gramsci as well as diverse empirical sources including demographic studies historical modelling and discourse analyses Migration Turn and Eastern Europe is a unique and rigorous study of one of the most pressing and puzzling political and sociological questions of our time Economic Growth, Regional Disparities, and Urban Sprawl Luca Salvati, 2025-03-16 This book gives a unique description of urban geography of Europe and specifically Southern Europe and provides a fine guide to urban complexity and resilience in the light of metropolitan sustainability Sprawl is a multifaceted phenomenon that needs to be quantified with distinct measures and during an enough long observation period Landscape change is recognized to be a relevant topic when studying the impact of urban growth and sprawl on peri urban land In the kaleidoscopic panorama of urban Europe Mediterranean cities represent an element that breaks with the stereotypes of the old continent urbanities Originally developed according to a purely mono centric structure which grew radio centrically with the progressive addition of satellite urban areas Mediterranean cities have more recently oriented their growth path towards dispersed settlement models This resulted in a high consumption of land in contrast with the judicious compactness that characterized the tumultuous development of the cities at least in the first three decades after World War II This book tells through narratives photographs qualitative quantitative descriptions of landscapes maps and indicators the transition from a compact model judiciously mono centric and land saving to contemporary sprawl

with practical implications in economic geography The environmental social and economic implications of this phenomenon far from being a unique characteristic of the European Mediterranean region have been also discussed and the planning and policy implications addressed with respect to the individual ecological problems faced from time to time *Migration Patterns and Intentions of Floating Population in Transitional China* Tiyan Shen,Xin Lao,Hengyu Gu,2022-07-21 This book investigates domestic migration and migration intentions in China from the individual city and provincial levels Since the 1990s accompanying the rapid urbanization an important feature of China s social transition is its large scale interregional migration which has reshaped China s economic geography and population distribution and greatly affected the socio economic development The floating population migrants working and living in the destination cities without local hukou have aroused wide public concern in the past decades Based on China s national population census data and China Migrants Dynamic Survey data this book comprehensively employs statistical analysis spatial analysis network analysis econometric and spatial econometric methods to analyze the spatial pattern and influencing mechanism of internal migration and migration intentions of floating population from different levels and different perspectives The research results of this book have significant policy implications for the urban governance on the floating population The novelty of this book is that it comprehensively investigates domestic migration and migration intentions from the individual city and provincial levels combining their spatial patterns and network structures It not only provides a wealth of case studies for domestic migration research in China but also broadens the research scope of spatial demography by employing new methods of spatial econometrics such as MGWR and ESF This book is suitable for undergraduates and graduates majoring in Human Geography Regional Economics Urban Planning and Urban Governance as well as related researchers and practitioners

Inter-regional Migration in Tropical Africa Ian Masser,W. T. S. Gould,A. D. Goddard,1975 Monograph comprising a literature survey of major statistical tables and statistical analysis relating to inter regional level migration and internal migration in Africa south of Sahara covers problems involved in the measurement of migration and the evaluation of population census data and includes a spatial interaction model of inter regional migration in Uganda and its implications for future research **Bibliography of Agriculture** ,1968-04 *Latino Politics and Arizona's Immigration Law SB 1070* Lisa Magaña,Erik Lee,2013-03-25 Arizona has one of the fastest growing communities of Latino immigrants in the United States In response to accusations that the Federal government was hampering the immigration enforcement actions of Arizona police state Senator Russell Pearce introduced the Support Our Law Enforcement and Safe Neighborhoods Act Better known as SB 1070 the policy allows police officers in Arizona to arrest unauthorized immigrants under the state s trespassing law The law also gives officers the latitude to question and detain those that may appear suspicious which may simply mean that they appear Latino Under the State s statute immigrants can also be criminalized for their mere presence in Arizona The bill was signed into law on April 23 2010 which generated a number of immensely complex issues at the local national and

international level The measure has affected an already problematic U S Mexico bi national relationship at a time of increased security cooperation between the two countries Furthermore former the President of Mexico has criticized the law issuing travel advisories and as a sanction trade between Arizona and Mexico has been reduced Elected officials across the country called for a variety of economic boycotts and campaigns that would discourage the full implementation of the law Over fifteen major cities have ended business contracts with Arizona The State tourism industry has lost almost one billion dollars in less than six months as a result of this policy This book examines a variety of issues and consequences of SB 1070 at the local national and international level It provides timely research and analysis on a topic not previously examined and from a variety of inter disciplinary approaches making it of interest to political scientists and policy makers alike

Cherry,Dan Rickman,2009-12-04 Rising U S income and wealth in recent decades have fueled an increase in consumption demand for environmental amenities Many observers and researchers have argued that this at least in part underlies current differentials in economic growth across regions This collection of key articles addresses the issues and more **Working Paper** ,1981-06 Spatial Structures R. J. Johnston,2023-04-01 Originally published in 1973 this book synthesizes the mass of material into an introduction to the study of spatial systems Geographic literature of the time stressed the influence of the distance between places on both location decision making and movement patterns arguing that the spatial system is an ordered set of interacting locations This system is created by human decisions influenced by the distance factor and the system s morphology constrains further activities including those which would alter it Spatial Structures outlines the development of such systems their present organization and the ways in which they are changing These themes are dealt with in three main chapters which focus on different spatial scales the individual city the nation state and the international system within a simple classification of spatially organized activities *Methods of regional analysis* Walter Isard,1966 Urban Agriculture for Growing City Regions Undine Giseke,Maria Gerster-Bentaya,Frank Helten,Matthias Kraume,Dieter Scherer,Guido Spars,Fouad Amraoui,Abdelaziz Adidi,Said Berdouz,Mohemed Chlaida,Majid Mansour,Mohamed Mdafai,2015-09-07 This book demonstrates how agriculture can play a determining role in integrated climate optimised urban development Agriculture within urban growth centres today is more than an economic or social left over or a niche practice It is instead a complex system that offers multiple

potentials for interaction with the urban system Urban open space and agriculture can be linked to a productive green infrastructure this forms new urban rural linkages in the urbanizing region and helps shape the city But in order to do this agriculture has to be seen as an integral part of the urban fabric and it has to be put on the local agenda Urban Agriculture for Growing City Regions takes the example of Casablanca one of the fastest growing cities in North Africa to investigate this approach The creation of synergies between the urban and rural in an emerging megacity is demonstrated through pilot projects design solutions and multifunctional modules These synergies assure greater resource efficiency particularly regarding the use and reuse of water and they strengthen regional food security and the social integration of multiple spheres A transdisciplinary research approach brings together different scientific disciplines and local actors into a process of integrated knowledge production The book will have a long lasting legacy and is essential reading for researchers planners practitioners and policy makers who are working on urban development and urban agricultural strategies Agricultural Economic Report ,1975 Computational Approaches for Urban Environments Marco Helbich,Jamal Jokar Arsanjani,Michael Leitner,2015-01-22 This book aims to promote the synergistic usage of advanced computational methodologies in close relationship to geospatial information across cities of different scales A rich collection of chapters subsumes current research frontiers originating from disciplines such as geography urban planning computer science statistics geographic information science and remote sensing The topics covered in the book are of interest to researchers postgraduates practitioners and professionals The editors hope that the scientific outcome of this book will stimulate future urban related international and interdisciplinary research bringing us closer to the vision of a new science of cities Who's who in Economics Mark Blaug,1999 This standard reference text is a guide to economists both past and present who have made a substantial contribution to the subject It provides biographical bibliographical and critical information on over 1000 living economists and approximately 500 deceased economists *Spatial Spillovers* Amitrajeet A. Batabyal,Yoshiro Higano,Peter Nijkamp,2024-11-15 This edited book is the first to bring together in one place new theoretical and empirical evidence as well as case studies about spatial spillovers with a particular focus on spillovers in Asia In the context of this book spatial spillovers are locally bounded and territorially rooted interactions between one or more economic agents and their environments They are salient because they affect regional economic growth and development Specifically the individual chapters in this book shed light on the different kinds of spatial spillovers witnessed in Asian regions particularly those that derive from the acquisition and transfer of knowledge those that arise from horizontal or vertical industrial interactions and those that come about because of economic growth The book departs from the existing literature in three ways First the book explicitly recognizes that different kinds of spatial spillovers have dissimilar impacts on the lives and therefore on the welfare of the residents of different regions Second the book emphasizes the varied dimensions of the interactions and the ways in which these dimensions influence different societies Third this book demonstrates the ways in

which an understanding of the preceding two points contributes to our knowledge about the nexuses between spatial spillovers and regional economic growth and development. Because Asia is the fastest growing and the most dynamic continent in the world today, the research delineated in the individual chapters of the book provides practical guidance concerning two salient questions. First, how do we effectively address the economic growth and development challenges stemming from spatial spillovers between one or more regions within Asia? Second, how do we ensure that the policies we design to address these challenges give rise to broad-based and sustainable economic growth and development?
