Mystical Christianity Beyond Doctrine Beyond D:

Beyond Mysticism James R. Horne, 2006-01-01 This study of the meaning and the experience of mysticism is a product of the author's personal interest in mysticism and his reflection as a philosopher on some of the philosophical questions raised by mysticism. It is a psychological process which occurs with varying degrees of intensity in everyone's life and the observation that this process changes the experiencer. The author goes on to discuss such questions as: Can we define mysticism and Can we describe mystical experiences? Is mysticism rational and What is the meaning of mystical experience?

Venturing Beyond - Law and Morality in Kabbalistic Mysticism Elliot R. Wolfson, 2006-05-25 Are mysticism and morality compatible or at odds with one another? If mystical experience embraces a form of non dual consciousness then in such a state of mind the regulative dichotomy so basic to ethical discretion would seemingly be transcended and the very foundation for ethical decisions undermined. *Venturing Beyond Law and Morality in Kabbalistic Mysticism* is an investigation of the relationship of the mystical and moral as it is expressed in the particular tradition of Jewish mysticism known as the Kabbalah. The particular themes discussed include the denigration of the non Jew as the ontic other in kabbalistic anthropology and the eschatological crossing of that boundary anticipated in the institution of religious conversion, the overcoming of the distinction between good and evil in the mystical experience of the underlying unity of all things, divine suffering and the ideal of spiritual poverty as the foundation for transmoral ethics and hypernomian lawfulness.

Changing the Scientific Study of Religion: Beyond Freud? Jacob A. v. van Belzen, 2009-06-18 The psychoanalytic approach to religion has changed radically during the course of the twentieth century. In both clinical and theoretical work in psychoanalysis, developments have taken place that frequently are not noted by persons who assume that all that can be said has been said by Freud. The study of religious phenomena, persons, events and traditions has always been a substantial part of applied psychoanalysis and here also major developments have taken place. It is no exaggeration to state that the scientific study of religion has been revolutionized by the integration of psychological perspectives including the field of psychoanalysis. This volume differs from other recent publications on the topic of psychoanalysis and religion in drawing upon the entire field of psychoanalytic involvement with religion. It is interdisciplinary in approach and unlike other books on the topic brings together an exceptional combination of theoretical, empirical and clinical studies. No other book provides integrated examples of all three types of work.

Beyond Secularism and Jihad? Peter D. Beaulieu, 2012-07-13 Peter D. Beaulieu examines the challenge posed by and to modernity and historic Islam as they encounter one another. He compares the Western separation of Church and state with the unitary Islamic State and explores the proposed cultural and societal principles of the Second Vatican Council as potentially influencing long term events in both arenas. Beaulieu's research is comprehensive and richly documented yet offers an accessible triangular inquiry into the mosque, the manger and modernity. By restoring a place at the table for Trinitarian Christianity alongside the engulfing monotheism of Islam and the alternative skepticism of Western

rationalism this inquiry broadens the pallet of inter religious and intercultural contact points Beyond Secularism and Jihad provides balanced attention to the differences as well as the similarities between Christianity Islam and modernity An emerging theme is natural law which is universal and intrinsic to all mankind and not confined to competing theologies Neglected in the West that it helped create natural law might contribute to the needed grammar for dialogue between the citizens in the West and the followers of Islam *Christian Mysticism and Incarnational Theology* Louise Nelstrop, Simon D. Podmore, 2016-05-23 This book examines the relationship between transcendence and immanence within Christian mystical and apophatic writings Original essays from a range of leading established and emerging scholars in the field focus on the roles of language signs and images and consider how mystical theology might contribute to contemporary reflection on the Word incarnate This collection of essays re examines works from such canonical figures as Eckhart Augustine Plotinus Pseudo Dionysius Nicolas of Cusa Teresa of Avila John of the Cross Julian of Norwich along with the philosophical thought of Iris Murdoch Jacques Lacan and Martin Heidegger and the contemporary phenomena of the Emerging Church Presenting new readings of key ideas in mystical theology and renewed engagement with the visionary and the everyday the therapeutic and the transformative these essays question how we might think about what may lie between transcendence and immanence

Beyond Calvin John V. Fesko, 2012-06-13 The investigation of union with Christ and justification has been dominated by the figure of John Calvin Calvin s influence however has been exaggerated in our own day Theologians within the Early Modern Reformed tradition contributed to the development of these doctrines and did not view Calvin as the normative theologian of the tradition John V Fesko therefore goes beyond Calvin and explores union with Christ and justification in the Reformation Early Orthodox and High Orthodox periods of the Reformed tradition and covers lesser known but equally important figures such as Juan de Valdes Peter Martyr Vermigli Girolamo Zanchi William Perkins John Owen Francis Turretin and Herman Witsius The study also covers theologians that either lie outside or transgress the Reformed tradition such as Martin Luther Philip Melanchthon Faustus Socinus Jacob Arminius and Richard Baxter By treating this diverse body of figures the study reveals areas of agreement and diversity on these two doctrines The author demonstrates that among the diverse formulations all surveyed Reformed theologians accord justification priority over sanctification within the broader rubric of union with Christ Fesko shows that Reformed theologians affirm both union with Christ and the golden chain of salvation ideas that moderns find incompatible In sum rather than reading an individual theologian isolated from his context this study provides a contextual reading of union with Christ and justification in the Early Modern Reformed context

Beyond Foundationalism Stanley James Grenz, John R. Franke, 2001-01-01 Grenz and Franke provide a methodological approach for doing theology in the postmodern world They call for a theological method that moves beyond the Enlightenment way of ordering and understanding information foundationalism They propose a theological method that takes seriously the Spirit tradition and contemporary culture while stressing trinitarian structure community and eschatology

Beyond the Separate Self Colin Drake, 2011 This book is designed to help its readers go beyond the separate self that is to free oneself from obsessive thinking and worrying about one's self image health wealth status achievements lack of achievements past future and ultimate survival p 5

Beyond Phenomenology Gavin Flood, 1999-08-01 This book argues that the understanding and explanation of religion is always historically contingent Grounded in the work of Bakhtin and Ricoeur Flood positions the academic study of religion within contemporary debates in the social sciences and humanities concerning modernity and postmodernity particularly contested issues regarding truth and knowledge It challenges the view that religions are privileged epistemic objects argues for the importance of metatheory and presents an argument for the dialogical nature of inquiry The study of religion should begin with language and culture and this shift in emphasis to the philosophy of the sign in hermeneutics and away from the philosophy of consciousness in phenomenology has far reaching implications It means a new ethic of practice which is sensitive to the power relationship in any epistemology it opens the door to feminist and postcolonial critique and it provides a methodology which allows for the interface between religious studies theology and the social sciences

Practical Mysticism in Islam and Christianity Saeed Zarrabi-Zadeh, 2016-01-29 Practical Mysticism in Islam and Christianity offers a comparative study of the works of the Sufi poet Jalal al Din Rumi 1207-1273 and the practical teachings of the German Dominican Meister Eckhart c1260-1327/8 Rumi has remained an influential figure in Islamic mystical discourse since the thirteenth century while also extending his impact to the Western spiritual arena However his ideas have frequently been interpreted within the framework of other mystical philosophical or religious systems Through its novel approach this book aims to reformulate Rumi's practical mysticism by employing four methodological principles a mysticism is a coherent structure with mutual interconnection between its parts b the imposition of alien structures to interpret any particular mysticism damages its inward coherency c practical mysticism consists of two main parts namely practices and stages and d the proper use of comparative methodology enables a deeper understanding of each juxtaposed system Eckhart's speculative mysticism which differs from and enjoys similarities with the love based mysticism of Rumi provides a mirror that highlights the special features of Rumi's practical mysticism Such comparison also allows a deeper comprehension of Eckhart's practical thought Offering a critical examination of practical mysticism this book is a valuable resource for students and scholars of Islamic studies comparative mysticism and the intellectual history of Islam
