Retail Geography Shuguang Wang, Paul Du, 2020-05-26 The retail sector is an integral part of a national economy From the political economy perspective all consumer goods have surplus values locked up in them the surplus values are not realized until the

consumer goods are purchased by consumers through various distribution channels As such retailing is the essential link between production and consumption The success of a retail business depends on two general factors the location of the retail outlet and management of the business Both factors are equally important If the business is located in the wrong place with the wrong customer base it will not generate expected sales Similarly if the business is poorly managed and operated it will not perform well even if the location is right Influenced by both traditional and new location theories Retail Geography is conceptualized and organized using the retail planning process as the framework The technical and methodological chapters help guide the reader with detailed descriptions of the techniques and are supported with practical examples to reflect the latest software development Retail Geography provides a state of the art summary and will act as a core textbook for undergraduate and graduate students of economic geography interested in specializing in retail and business geography The practical examples also make it a valuable handbook for practitioners in the field as well as students of retail management and commercial real estate management

International Handbook on Geographical

Education Rod Gerber, 2013-03-09 I am very pleased to have been asked by Rod Gerber to provide a preface to such a book. Not least because of the twenty four chapters eight are written by former students or colleagues with whom I have worked in the past and whom I still meet at conferences on geographical education. It is with a certain pride and joy that I note the progress which has been made in geographical education both in its day to day teaching and in research in the twenty years following the end of my term of office as Chair of the Commission on Geographical Education of the International Geographical Union CGEIUG. My successors Joe Stoltman, Hartwig Haubrich, Rod Gerber and now Lea Houtsonen have done much and are continuing to work hard to foster the development of geographical education. This book is proof if proof were needed that the international collaboration in this field is alive and well with contributions coming from all the continents except Antarctica. It would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as Fairgrieve 1926 would have put it. And as Rod Gerber shows the issues of globalisation of cultural encounters of differing value systems of new technologies of variable economic development and of environmental quality all feature as topics which influence and are influenced by geographical education.

Industrial Geography in Contemporary China Canfei He, 2022-05-19 This title provides an overall view of industrial geography in the context of contemporary China and investigates the development processes, research paradigms and achievements of China's industrial geography with a particular focus on the post reform period. The first two chapters introduce the overall background of industrialization and evolving policies of industrial geography in contemporary China. Based on sweeping literature reviews, empirical data analysis and case studies the author then examines key aspects of industrial geography and geographical patterns, dynamics and the impact of industrial development. The following topics are discussed in detail: the geographical distribution and agglomeration of industries, national industrial parks, urbanization and industrialization, regional evolution of industries and interregional networks, firms and industrial organizations, exports, foreign investment and trade, labour migration, land supply, industrial innovation, environmental issues and regulations and industrial planning. In providing a full picture of the industrial geography of contemporary China the title will be an essential reference for scholars and students studying economic geography, industrial geography and the industrial and economic development of the People's Republic of China.
