Pre Columbian Archaeology Readings From Scientific American:

Pre-Columbian Archaeology Gordon Randolph Willey, 1980 Pre-Columbian Foodways John Staller, Michael Carrasco, 2009-11-24 The significance of food and feasting to Pre Columbian Mesoamerican cultures has been extensively studied by archaeologists anthropologists and art historians Foodways studies have been critical to our understanding of early agriculture political economies and the domestication and management of plants and animals Scholars from diverse fields have explored the symbolic complexity of food and its preparation as well as the social importance of feasting in contemporary and historical societies This book unites these disciplinary perspectives from the social and biological sciences to art history and epigraphy creating a work comprehensive in scope which reveals our increasing understanding of the various roles of foods and cuisines in Mesoamerican cultures The volume is organized thematically into three sections Part 1 gives an overview of food and feasting practices as well as ancient economies in Mesoamerica Part 2 details ethnographic epigraphic and isotopic evidence of these practices Finally Part 3 presents the metaphoric value of food in Mesoamerican symbolism ritual and mythology The resulting volume provides a thorough interdisciplinary resource for understanding food feasting and cultural practices in Mesoamerica **World Military History Bibliography** Barton Hacker, 2003-06-01 Preclassical and indigenous nonwestern military institutions and methods of warfare are the chief subjects of this annotated bibliography of work published 1967 1997 Classical antiquity post Roman Europe and the westernized armed forces of the 20th century although covered receive less systematic attention Emphasis is on historical studies of military organization and the relationships between military and other social institutions rather than wars and battles Especially rich in references to the periodical literature the bibliography is divided into eight parts 1 general and comparative topics 2 the ancient world 3 Eurasia since antiquity 4 sub Saharan Africa and Oceania 5 pre Columbian America 6 postcontact America 7 the contemporary nonwestern world and 8 philosophical social scientific natural scientific and other works not primarily historical Moving on in Neolithic Studies Jim Leary, Thomas Kador, 2016-02-29 Mobility is a fundamental facet of being human and should be central to archaeology Yet mobility itself and the role it plays in the production of social life is rarely considered as a subject in its own right This is particularly so with discussions of the Neolithic people where mobility is often framed as being somewhere between a sedentary existence and nomadic movements This latest collection of papers from the Neolithic Studies Group seminars examines the importance and complexities of movement and mobility whether on land or water in the Neolithic period It uses movement in its widest sense ranging from everyday mobilities the routines and rhythms of daily life to proscribed mobility such as movement in and around monuments and occasional and large scale movements and migrations around the continent and across seas Papers are roughly grouped and focus on mobility and the landscape monuments and mobility travelling by water and materials and mobility Through these themes the volume considers the movement of people ideas animals objects and information and uses a wide range of archaeological evidence from isotope

Ancient Road Networks and Settlement Hierarchies in the New World Charles D. Trombold, 1991-11-28 The presence of ancient road networks in the New World is a puzzle because they predate the use of wheeled transport vehicles But whatever their diverse functions may have been they remain the only tangible indication of how extinct American societies were regionally organised Contributors to this volume originally published in 1991 describe past studies of prehispanic roads in the southwestern United States Mexico Central and South America paying special attention to their significance for economic and political organisation as well as regional communication

Handbook of South American Archaeology Helaine Silverman, William Isbell, 2008-04-06 Perhaps the contributions of South American archaeology to the larger field of world archaeology have been inadequately recognized If so this is probably because there have been relatively few archaeologists working in South America outside of Peru and recent advances in knowledge in other parts of the continent are only beginning to enter larger archaeological discourse Many ideas of and about South American archaeology held by scholars from outside the area are going to change irrevocably with the appearance of the present volume Not only does the Handbook of South American Archaeology HSAA provide immense and broad information about ancient South America the volume also showcases the contributions made by South Americans to social theory Moreover one of the merits of this volume is that about half the authors 30 are South Americans and the bibliographies in their chapters will be especially useful guides to Spanish and Portuguese literature as well as to the latest research It is inevitable that the HSAA will be compared with the multi volume Handbook of South American Indians HSAI with its detailed descriptions of indigenous peoples of South America that was organized and edited by Julian Steward Although there are heroic archaeological essays in the HSAI by the likes of Junius Bird Gordon Willey John Rowe and John Murra Steward states frankly in his introduction to Volume Two that arch ology is included by way of background to the ethnographic chapters

Aquatic Adaptations in Mesoamerica Eduardo Williams, 2022-08-11 This book explores the subsistence strategies that ancient Mesoamericans implemented to survive and thrive in their environments It discusses the natural settings production sites techniques artifacts cultural landscapes traditional knowledge and other features linked to human subsistence in aquatic environments

Water Engineering in the Ancient World Charles R. Ortloff, 2009 Charles Ortloff provides a new perspective on archaeological studies of the urban and agricultural water supply and distribution systems of the major ancient civilizations of South America the Middle East and South East Asia by using modern computer analysis methods to extract the true hydraulic hydrological knowledge base available to these peoples His many new revelations about the capabilities and innovations of ancient water engineers force us to re evaluate what was known and practised in the hydraulic sciences in ancient times Given our current concerns about global warming and its effect on economic stability it is fascinating to observe how some ancient civilizations successfully coped with major climate change events by devising defensive agricultural survival strategies while others which did not innovate failed to survive

The American Southwest and Mesoamerica Jonathon E. Ericson, Timothy G. Baugh, 2013-11-11 Regional approaches to the study of prehistoric exchange have generated much new knowledge about intergroup and regional interaction The American South west and Mesoamerica Systems of Prehistoric Exchange is the first of two volumes that seek to provide current information regarding regional exchange on a continental basis From a theoretical perspective these volumes provide important data for the comparative analysis of regional systems relative to sociopolitical organization from simple hunter gatherers to those of complex sociopolitical entities like the state Although individual regional exchange systems are unique for each region and time period general patterns emerge relative to sociopolitical organization Of significant interest to us are the dynamic processes of change stability rate of growth and collapse of regional exchange systems relative to sociopolitical complexity These volumes provide basic data to further our understanding of prehistoric exchange systems The volume presents our current state of knowledge about regional exchange systems in the American Southwest and Mesoamerica Each chapter synthesizes the research findings of a number of other researchers in order to provide a synchronic view of regional interaction for a specific chronological period A diachronic view is also provided for regional interaction in the context of the developments in regional sociopolitical organization Most authors go beyond description by proposing alternative models within which to understand regional interaction The book is organized by geographical and chronological divisions to provide units of the broader mosaic of prehistoric exchange systems

Dwelling, Identity, and the Maya Scott R. Hutson, 2009-11-16 Dwelling Identity and the Maya offers a new perspective on the ancient Maya that emphasizes the importance of dwelling as a social practice Contrary to contemporary notions of the self as individual and independent the identities of the ancient Maya grew from their everyday relations and interactions with other people the houses and temples they built and the objects they created exchanged

cherished and left behind Using excavations of ancient Chunchucmil as a case study it investigates how Maya personhood was structured and transformed in and beyond the domestic sphere and examines the role of the past in the production of contemporary Maya identity
