Pre Adolescent Development

Karen J. Gilmore, Pamela Meersand

Pre Adolescent Development:

Growth and Development of the Preadolescent Arthur Witt Blair, William Henry Burton, 1951 Blair and Burton examine literature on the preadolescent gathered from various fields and analyze, synthesize and summarize findings on this topic. Their results highlight the importance of social class and developmental tasks in relation to the dramatic levels of maturation that occur in this stage of life. First the preadolescent is strongly influenced by his peer group and that this peer society is necessary for the child's growth. The child society is an intermediate step between adult domination and membership in the adult society. Second the preadolescent is essentially a realist who wants to know about reality so science and sex education are taught more easily at that age level than at adolescence since the pre-adolescent child is more objective and less emotional than is the adolescent. A third idea is that remediation in study skills or in attitude is progressively more difficult after grade four. Persons who know the field will find the book useful.
