**Pre-Columbian Architecture of Mesoamerica** Doris Heyden, Paul Gendrop, 1975 A pictorial and descriptive study of styles and ornamental elements representative of Mesoamerican architectural achievements from the Olmec civilization to the Spanish Conquest

Pre-Columbian Architecture Donald Robertson, 1963 The architecture which preceded the sixteenth century Spanish Conquest of Central and South America is outstanding for its expression of strength and vitality From the beginning of the Christian era even earlier the pagan civilizations that dominated this area had developed relatively undisturbed by outside influences Of these the Aztec and the Maya peoples of Mexico and the Incas of Peru left a legacy of especially impressive monuments Tenochtitl n principal city of the Aztecs would probably be closer to our mid twentieth century ideal of a well planned city than any which were built in the Spain of Cort s its conqueror The concern for integration of various architectural elements within a city especially the sophisticated plans found in the Maya cities of Yucatan somewhat parallels our own attempts to establish unity within our constantly growing expanding cities The components of these spacious orderly cities are of equal beauty and imagination Immense pyramids often built and rebuilt over centuries were crowned with the focal point of Pre Columbian life a temple home of a God and site of worship and ritual Palaces also played an important role in the architectural development of the area as did subsidiary elements such as observatories courts and homes Since the major human and expendable resources were channeled into religious and state monuments especially pyramids few of the smaller more individual structures survive Decorative elements especially mural painting and architectural sculpture provide insights into the general treatment and feeling for form and at the same time add elements of breath taking beauty and skill to the architecture itself Similarly the materials used in each region affect the buildings and in the Andes contribute one of the most ex citing aspects of their rugged enduring forms This stimulating introduction to the earliest American

architecture causes us to regret the loss of these highly developed traditions which flourished before the Spanish conquistadors arrived to alter and supplant it

**Publisher**      **Pre-Columbian Architecture. [With Illustrations and a Bibliography.]** Donald Robertson (Writer on Architecture.),1963      Vernacular Architecture in the Pre-Columbian Americas Christina Halperin,Lauren Schwartz,2016-09-13 Vernacular Architecture in the Pre Columbian Americas reveals the dynamism of the ancient past where social relations and long term history were created posthole by posthole brick by brick This collection shifts attention away from the elite and monumental architectural traditions of the region to instead investigate the creativity subtlety and variability of common architecture and the people who built and dwelled in them At the heart of this study of vernacular architecture is an emphasis on ordinary people and their built environments and how these everyday spaces were pivotal in the making and meaning of social and cultural dynamics Providing a deeper and more nuanced temporal perspective of common buildings in the Americas the editors have deftly framed a study that highlights sociocultural diversity while at the same time facilitating broader comparative conversations around the theme of vernacular architecture With diverse case studies covering a broad range of periods and regions Vernacular Architecture in the Pre Columbian Americas is an important addition to the growing body of scholarship on the indigenous architecture of the Americas and is a key contribution to our archaeological understandings of past built environments      History of world architecture; Pre-Columbian architecture of Mesoamerica ,      *Arch. **PRE-COLUMBIAN ARCHITECTURE** ,1963      El Tajin Ileana Olmos,2009 ABSTRACT Before the arrival of the Europeans into the New World there were already a great number of cultures in the Americas that settled worked and developed into grand dynamic centers El Tajin became one of the most significant centers in Mesoamerica during the Pre Columbian era around 600 1100 CE Its significance was due to its large number of ballcourts sophisticated art forms and unique architecture This vast site is located along the northern Gulf Coast of Mexico In this study the history architectural influences and building techniques at El Tajin are broadly examined The following research helps to better understand the evolution of the unique building techniques achieved at El Tajin within the context of other Mesoamerican cultures My interest in this research ignited when I became aware of the implementation of a form of poured concrete utilized by the builders of El Tajin on its final phase of construction This innovation in building technique of El Tajin was then unknown in the region of Mesoamerica As part of this research federal local laws for archaeological sites and monuments are also examined      **Pre-Columbian Architecture. [With Illustrations, Including Maps.]** Donald ROBERTSON (Associate Professor of the History of Art, Newcomb College, Tulane University.),1963      **Constructing Identity in Contemporary Architecture** Peter Herrle,Stephanus Schmitz,2009 The global spread of uniform modes of production and cultural values has been accompanied by a dissemination of stereotypes of modern architecture styles almost everywhere around the globe Paradoxically the reverse process has also emerged In some countries the elites feel the necessity to counterbalance the loss

of identity and defend their own cultures against the intruding forces of globalization What started as a defensive notion has developed into a more progressive attempt to re create what has allegedly been lost This trend is being strongly expressed in discourses about architecture in countries of the South Who are the actors feeling compelled to construct new identities How are these new identities in architecture created in various parts of the world And which are the ingredients borrowed from various historical and ethnic traditions and other sources These and other questions are discussed in five case studies from different parts of the world written by renowned scholars from Brazil Mexico Egypt India and Singapore
