The Precarious Balance Ludwig Dehio, 1965 **The Precarious Balance** Ludwig Dehio, 1965 *The Precarious Balance; Four Centuries of the European Power Struggle. Translated From the German by Charles Fullman. 1st American Ed* Ludwig Dehio, 1962 The Second Slavery Javier Lavina, Michael Zeuske, 2014 Slavery throughout the capitalist world economy expands The old zones in one way or another reach their limits and the new zones break through to become part of the new division of labor in the 19th century In that sense The Second Slavery would encompass both decline and renewal of slaveries I never intended the idea to apply just to Cuba Brazil and the cotton South as some people seem to take it For me it is a concept of world economy and Cuba Brazil and the South are the obvious examples of those zones that break through They permit us to think about slavery in a more dynamic way but there is much more work to be done From this perspective I would be more inclined to include Reunion Mauritius and some parts of India Ceylon and Java as well as British Guiana than the older French and British Caribbean islands contributor Dale Tomich Binghamton U New York The Second Slavery includes the following essays African Slaves and the Atlantic A Cultural Overview The End of the British Atlantic Slave Trade or the Beginning of the Big Slave Robbery 1808 1850 Peasant or Proletarian Emancipation and the Struggle for Freedom in British Guiana in the Shadow of the Second Slavery The End of the Second Slavery in the Confederate South and the Great Brigandage in Southern Italy A Comparative Study Puerto Rico Atlantization and Culture during the Segunda Esclavitud The Second Slavery Modernity Mobility and Identity of Captives in Nineteenth Century Cuba and the Atlantic World Commodity Frontiers Conjuncture and Crisis The Remaking of the Caribbean Sugar Industry 1783 1866 The Aftermath of Abolition Distortions of the Historical Record in Machado de Assis Counselor Aires Memorial The Second Slavery Modernity in the 19th Century South and the Atlantic World Series Slavery and Postemancipation Sklaverei und Postemanzipation Esclavitud y Postemancipacion Vol 6 **Systems in Crisis** Charles F. Doran, 1991-07-26 Uncertainty is the watchword of contemporary world politics Monumental changes are occurring throughout the international system and statespeople are wrestling with peaceful solutions to the transformation in relative power of the USA Soviet Union and China Japan and in Europe In this book Charles Doran proposes a managed solution to peaceful change He presents a bold original and wide ranging analysis of the present balance of power of future prospects for the international system and of the problems involved in this transformation Professor Doran demonstrates why such change has often been accompanied by world war providing new insights into the causes of the First World War But he argues systems change can be both peaceful and secure Developing a theory of the power cycle the author reveals the structural bounds on statecraft and shows how the tides of history can suddenly and unexpectedly shift against the state *Unipolar Politics* Ethan B. Kapstein, Michael Mastanduno, 1999 This volume analyzes the decisions that major powers have made since the Cold War to adapt to a rapidly changing economic and security environment The authors acknowledge that while great power wars are now unlikely positional conflicts over

resources and markets still remain Territorial Expansion and Great Power Behavior During the Cold War Dylan Motin, 2025-06-20 Motin examines great powers reactions to the rise of new powers in bipolar international systems by exploring an understudied problem the rarity of armed emergence after 1945 The book focuses on Egypt Iraq Syria and Vietnam the few minor powers that attempted to emerge as great powers through force during the Cold War Geography and existing powers reactions are analyzed as the two key factors determining a nation s attempts at territorial expansion to achieve power on the global political stage This systematic investigation of previously overlooked cases has profound implications for the scholarship on the rise and fall of great powers In a context where territorial conquest is returning worldwide scholars studying international relations international security and strategic studies should find valuable insights in this realist take *The Unquiet Frontier* Jakub J. Grygiel, A. Wess Mitchell, 2017-08-15 How America s vulnerable frontier allies and American power are being targeted by rival nations From the Baltic to the South China Sea newly assertive authoritarian states sense an opportunity to resurrect old empires or build new ones at America s expense Hoping that U S decline is real nations such as Russia Iran and China are testing Washington s resolve by targeting vulnerable allies at the frontiers of American power The Unquiet Frontier explains why the United States needs a new grand strategy that uses strong frontier alliance networks to raise the costs of military aggression in the new century Jakub Grygiel and Wess Mitchell describe the aggressive methods rival nations are using to test U S power in strategically critical regions throughout the world They show how rising and revisionist powers are putting pressure on our frontier allies countries like Poland Israel and Taiwan to gauge our leaders commitment to upholding the U S led global order To cope with these dangerous dynamics nervous U S allies are diversifying their national security menu cards by beefing up their militaries or even aligning with their aggressors Grygiel and Mitchell reveal how numerous would be great powers use an arsenal of asymmetric techniques to probe and sift American strength across several regions simultaneously and how rivals and allies alike are learning from America s management of increasingly interlinked global crises to hone effective strategies of their own The Unquiet Frontier demonstrates why the United States must strengthen the international order that has provided greater benefits to the world than any in history **A breakfast for Bonaparte U.S. national security interests from the Heights of Abraham to the nuclear age** Eugene V. Rostow, **Democracy and American Foreign Policy** Robert Strausz-Hupe, 2018-01-18 Since World War I the United States has pursued the defense of Western civilization as a critical element of its own national interest In his provocative reconsideration of that goal Robert Strausz Hupe asks whether the American people can still agree upon and adopt foreign policies consistently devoted to that end He specifically examines popular and paradoxical attitudes that often undermine Washington s ability to defend American and Western interests attitudes towards society and the state politics and government instruments of foreign policy and the people who wield them As the backdrop for his analysis Strausz Hupe employs the wisdom of Alexis de Tocqueville s *Democracy in America* reiterating Tocqueville s finding

that the driving force of American life is its passion for equality and democracy To this insight Strausz Hupe adds another When one realizes that domestic politics is the driving force behind foreign policy one understands why the foreign policy of the United States cannot be other than the defense of democracy everywhere Unlike some analysts however Strausz Hupe believes that this proposition states only the problem for American statesmen not the answer The answer Strausz Hupe concludes lies in a universal federation of democratic states In an appreciative foreword that examines the evolution of Strausz Hupe thought Walter A McDougall demonstrates that this idealistic vision of a democratic world state has been the unifying thread in Strausz Hupe s intellectual career not the calculating Realpolitik so often attributed to him Democracy and American Foreign Policy will be of central importance to international relations specialists policymakers political scientists and students of political philosophy Its chapters include Tocqueville and Nationalism Tocqueville and Marx The Hypocrisies of Egalitarianism Foreign Policy and Interest Groups and Isolationism and the New World Order *The A to Z of NATO and Other International Security Organizations* Marco Rimanelli, 2009-09-14 The North Atlantic Treaty Organization NATO is a military alliance established by the signing of the North Atlantic Treaty on April 4 1949 The treaty was signed by Belgium the Netherlands Luxemburg France United Kingdom United States Canada Portugal Italy Norway Denmark and Iceland Today there are a total of 26 countries that belong to NATO The A to Z of NATO and Other International Security Organizations covers the Atlantic Alliance s origins structure and organization through a chronology an introductory essay a bibliography and over 1 000 cross referenced dictionary entries on its Secretaries Generals its Supreme Allied Commanders Europe plus all affiliated organizations created to enhance NATO s reach in a broader Euro Atlantic security architecture e g North Atlantic Consultative Council Euro Atlantic Partnership Council NATO Russia Charter NATO Ukraine Charter and NATO Mediterranean Dialogue Partners This book also covers other related regional organizations with security responsibilities in Europe and worldwide where they interact with NATO either currently e g ANZUS ASEAN European Union Organization of African Unity Organization of American States Organization on Security and Cooperation in Europe and United Nations or in the past e g CENTO European Defence Community SEATO Warsaw Pact and Western European Union

Chaos and Governance in the Modern World System Giovanni Arrighi, 1999 In a period of dramatic transformation and upheaval as we wonder what the future holds this book reminds us that the world has undergone enormous changes before and that an understanding of those changes may tell us something about our own turbulent time The authors look to two earlier periods that resemble the present in key respects the transition from Dutch to British world hegemony in the eighteenth century and the transition from British to U S world hegemony in the late nineteenth and early twentieth centuries In each case a system wide expansion culminated in crisis and systemic chaos eventually a new hegemonic power reorganized the system to solve the problems and contradictions that underlay the chaos The authors find recurrent characteristics in these transitions such as the resurgence of finance capital and the intensification of interstate rivalries and social conflict They also recognize

however how the present transition differs from the previous patterns Among the anomalies are the proliferation of transnational organizations and communities increased social conflict in driving systemic change a geographical split between military and financial powers and a shift in the processes of capital accumulation away from the West Chaos and Governance in the Modern World System addresses controversies affecting a range of fields political economic social and cultural concerned with global change Though written from a world systems perspective it emphasizes the instability and adaptability of world capitalism and the role played by hegemonic states in periodically reorganizing the system *Once Within Borders* Charles S. Maier, 2016-10-17 At a time when the technologies of globalization are eroding barriers to communication transportation and trade Charles Maier explores the fitful evolution of territories politically bounded regions whose borders define the jurisdiction of laws and the movement of peoples as a worldwide practice of human societies

The Transformation of the World Jürgen Osterhammel, 2015-09-15 A panoramic global history of the nineteenth century A monumental history of the nineteenth century The Transformation of the World offers a panoramic and multifaceted portrait of a world in transition Jürgen Osterhammel an eminent scholar who has been called the Braudel of the nineteenth century moves beyond conventional Eurocentric and chronological accounts of the era presenting instead a truly global history of breathtaking scope and towering erudition He examines the powerful and complex forces that drove global change during the long nineteenth century taking readers from New York to New Delhi from the Latin American revolutions to the Taiping Rebellion from the perils and promise of Europe's transatlantic labor markets to the hardships endured by nomadic tribal peoples across the planet Osterhammel describes a world increasingly networked by the telegraph the steamship and the railways He explores the changing relationship between human beings and nature looks at the importance of cities explains the role slavery and its abolition played in the emergence of new nations challenges the widely held belief that the nineteenth century witnessed the triumph of the nation state and much more This is the highly anticipated English edition of the spectacularly successful and critically acclaimed German book which is also being translated into Chinese Polish Russian and French Indispensable for any historian The Transformation of the World sheds important new light on this momentous epoch showing how the nineteenth century paved the way for the global catastrophes of the twentieth century yet how it also gave rise to pacifism liberalism the trade union and a host of other crucial developments *Is the West in Decline?* Benjamin M. Rowland, 2015-10-30 Is the West in Decline is a collection of ten essays by prominent scholars of international relations and current history many of them associated with the European Studies program of the Johns Hopkins School of Advanced International Studies The essays explore the question of decline from several perspectives theoretical historical counterfactual and contemporary Thomas Row's essay uses alternative history to show how an unfallen Habsburg Empire might have evolved into a state system resembling the European Union Benjamin Rowland's essay on Oswald Spengler considers how the German historian's theory of decline could be applied to the West today Several of the essays are country

studies Not all conclude that countries or state systems are in decline or that the condition if present is irreversible Writing about Germany Stephen Szabo notes that only fifteen years ago this currently robust country could have been seen as a clear exemplar of decline Dana Allin s essay on the U S asks whether a course change including retrenchment and overseas rebalancing might reverse decline or eliminate it altogether David Calleo s essay among other things looks at America s reserve currency status as a principal sustainer of American exceptionalism and asks what might happen should the U S lose its exorbitant privilege as reserve currency provider to the international system

Strategic Basing and the Great Powers, 1200-2000 Robert E. Harkavy,2007-06-07 Examines the great powers strategic basing networks over the last 800 years stressing the evolvment of basing structures as a function of changing technological determinants and of the changing nature of the international system

The Military Revolution and Political Change Brian Downing,2020-12-08 To examine the long run origins of democracy and dictatorship Brian Downing focuses on the importance of medieval political configurations and of military modernization in the early modern period He maintains that in late medieval times an array of constitutional arrangements distinguished Western Europe from other parts of the world and predisposed it toward liberal democracy He then looks at how medieval constitutionalism was affected by the military revolution of the early modern era the shift from small decentralized feudal levies to large standing armies Downing won the American Political Science

The German Conception of History Georg G. Iggers,2014-01-01 The first comprehensive critical examination in any language of the German national tradition of historiography This is the first comprehensive critical examination in any language of the German national tradition of historiography It analyzes the basic theoretical assumptions of the German historians of the nineteenth and twentieth centuries and relates these assumptions to political thought and action The German national tradition of historiography had its beginnings in the reaction against the Enlightenment and the French Revolution of 1789 This historiography rejected the rationalistic theory of natural law as universally valid and held that all human values must be understood within the context of the historical flux But it maintained at the same time the Lutheran doctrine that existing political institutions had a rational basis in the will of God though only a few of these historians were unqualified conservatives Most argued for liberal institutions within the authoritarian state but considered that constitutional liberties had to be subordinated to foreign policy a subordination that was to have tragic results Mr Iggers first defines Historismus or historicism and analyzes its origins Then he traces the transformation of German historical thought from Herder s cosmopolitan culture oriented nationalism to exclusive state centered nationalism of the War of Liberation and of national unification He considers the development of historicism in the writings of such thinkers as von Humboldt Ranke Dilthey Max Weber Troeltsch and Meinecke and he discusses the radicalization and ultimate disintegration of the historicist position showing how its inadequacies contributed to the political d b cle of the Weimar Republic and the rise of National Socialism No one who wants to fully understand the

political development of national Germany can neglect this study **The Application of Cybernetic Analysis to the Study of International Politics** S.D. Bryen, 2012-12-06 This study could not have been written before Professor Karl Deutsch made his great contribution to political science in his book *The Nerves of Government* In applying the concepts elaborated in that work to the study of international politics it has been necessary to interpret and occasionally add to the concepts developed by Professor Deutsch I do not know whether Deutsch would accept these changes modifications and interpretations Here I can only say that I have attempted to stay in the same spirit that I think motivated Professor Deutsch's pioneering study That spirit is expressed throughout his work It is that all studies of politics and all techniques and models suggested as instrument of political analysis have this purpose that men should be more able to act in politics with their eyes open In completing this work owe much to many Mrs Susan Schellenberg aided me in identifying sections of an earlier draft that were unclear and helped me test some of the ideas I added to Deutsch's work Mr Frederick Slutsky did some preliminary testing of the action system formulations employed in the third chapter by using quantitative methods Particular gratitude is due to the committee who saw this manuscript as a dissertation at Tulane University This committee led by Professor Henry L Mason consisted of Professor Warren Roberts Jr Professor James D Cochrane Professor Jean M Danielson and Professor John S Gillespie *International Society and the Middle East* B. Buzan, A. Gonzalez-Pelaez, 2009-03-12 International Society and the Middle East brings together a distinguished cast of theorists and Middle East experts to provide a comprehensive overview of the region's history and how its own traditions have mixed often uncomfortably with the political structures imposed by the expansion of Western international society
