    The Security Context in the Black Sea Region Dimitrios Triantaphyllou,2013-10-18 This book on the security context in the Black Sea region is a timely endeavour and substantive contribution to understanding the state of play in the region and its linkages to the rest of the world With contributions from analysts from Europe the United States Russia Ukraine and Turkey the book provides a holistic perspective Post Cold War developments have increased interest in the Black Sea region and the role of the regional and extra regional actors in its security issues this volume examines the position of the United States NATO s involvement the EU s engagement Russia and Turkey s aspirations alongside the policies of the other states in the region as they seek a role for themselves It illustrates and investigates key concerns such as security energy and energy security regionalism and good governance and questions why a cooperative security framework or other regional schemes which could accommodate the needs of all stakeholders has to date never become a reality This book adds to the growing body of research on the region presenting the facts of the current situation and asking what can be done in the Black Sea region for it to survive given its precarious security environment This book was published as a special issue of Southeast European and Black Sea Studies   Crafting an African Security Architecture Hany Besada,2016-05-13 The humanitarian crises caused by civil conflicts and wars in Africa are too great in scope for an adequate and effective continental response The founding of the African Union and the drafting of the Responsibility to Protect doctrine the basis for collective action against genocide ethnic cleansing and crimes against humanity makes this a critical time to reflect on how best to address regional conflicts This book responds to new regional conflicts over health water land and food security in the world s poorest most socially fragmented continent The work assesses African regional security arrangements and provides new policy recommendations for the future   Crafting an African Security Architecture Dr Hany Besada,2013-03-28 The humanitarian crises caused by civil conflicts and wars in Africa are too great in scope for an adequate and effective continental response The founding of the African Union and the drafting of the Responsibility to Protect doctrine the basis for collective action against genocide ethnic cleansing and crimes against humanity makes this a critical time to reflect on how best to address regional conflicts This book responds to new regional conflicts over health water land and food security in the world s poorest most socially fragmented continent The work assesses African regional security arrangements and provides new policy recommendations for the future   **Iraq's Displacement Crisis: Security and protection** Lahib Higel,2016-04-13 Since the present displacement crisis began in January 2014 with the advance of the Islamic State of Iraq and Al Sham ISIS the humanitarian emergency in Iraq has become more severe The number of internally displaced persons IDPs in Iraq now stands at 3 2 million while more than 8 million people are in need of humanitarian assistance With the UN lacking funding and the Government of Iraq and Kurdistan Regional Government KRG under both military and economic

strain the protection of human rights and provision of humanitarian assistance have been gravely compromised Iraq s Displacement Crisis security and protection provides an up todate overview of the situation of IDPs in Iraq since the ISIS onslaught and resulting conflict including not only forced displacement committed by ISIS but also that perpetrated by other armed groups including government forces The report also explores the facilitation of IDP returns to areas of origin Due to poor living conditions in areas of displacement many families are seeking to return even though the situation in their area of origin may not have improved Almost without exception however liberated areas are in need of better security reconstruction of basic infrastructure and the resumption of public services Two years on social tensions are rising in both areas of displacement and areas of return With new population movements and territorial control shifting between armed groups host communities and authorities are under greater pressure Intimidation and harassment of IDPs based on their origins are common and increasing in areas of displacement Communities who find themselves in areas where they are a religious ethnic or linguistic minority live in fear of physical assault and discrimination In the context of limited governance and continued insecurity the opportunity afforded by the retaking of territory from ISIS is being lost If communities are unable to co exist Iraq may soon reach a point beyond repair Post liberation strategies are therefore urgently required that are comprehensive in addressing security needs but are also aimed at reconciliation reparation and re establishing the rule of law

human rights and their relationship to states and societies What is the theoretical linkage between security and human rights How has this linkage evolved within the context of East West relations What was the particular role of the Helsinki process in shaping this evolution How do these issues affect the difficult transition from dictatorship to pluralism in countries facing the challenge of ethnic economic and social dislocation The contributors to this volume seek to deepen our understanding of the forces that brought about the collapse of communism in Europe and they explore the broader implications of change for the emerging post cold war international order   <u>TERRORISM: COMMENTARY ON SECURITY DOCUMENTS VOLUME 145</u> Douglas C. Adeyemi PhD,2015-09-18 While it could be arguably stated that West Africa has achieved remarkable and sustainable progress in the areas of democratic governance and economic growth the subregion over the past few years has been challenged by terrorism and other transnational security threats Innocent civilians are continuously killed security operatives and providers of humanitarian assistance are targeted and properties and infrastructures are wantonly destroyed thus culminating in significant displacement of people and acute poverty If these developments are not carefully and timely addressed they are capable of eroding progress so far recorded It is against this background that this book examines the different manifestations of terrorism and related transnational security challenges in West Africa with a view to exploring the internal and external sources and drivers of instability establishing the linkages between terrorism and transnational threats and reviewing the various steps taken in recent time to strengthen the subregions capacity to prevent and address the menace of terrorism and other security challenges and make necessary policy recommendations based on comprehensive best practices   Banditry and Security Crisis in Nigeria Al Chukwuma Okoli,Saliou Ngom,2023-08-10 This book examines the growing phenomenon of armed banditry in Nigeria and its implication for national security Nigeria s banditry crisis and deepening security challenges are fuelled by the existence of vast un der governed hinterland and trans border spaces where various non state armed groups operate unhindered and outside of the law engaging in various forms of transnational crime This book explores the activities of these groups to assess the nature and significance of banditry as a complex threat to security It does so against the backdrop of reports of increased bandit attacks on farms markets mining sites villages and rural communities and the rising tide of violent crimes in Nigeria especially the northern region This book analyses the factors that are responsible for the emergence of banditry as a recent national and transnational security threat and outlines the contemporary dynamics of Nigeria s banditry crisis and how it can be mitigated This book will be of interest to researchers and students in the field of African Studies International Relations Security and Strategic Studies Political Studies Peace and Conflict Studies as well as policymakers and practitioners interested in complex security threats and their implications in Nigeria and beyond   **Public Security in the Negotiated State** Markus-Michael Müller,2011-11-24 Policing and security governance in areas of limited statehood have become central issues in contemporary academic and political debates This book offers an in depth study on public security provision the resulting state society relations and policing in Mexico City   **The Routledge Research Companion to Security Outsourcing** Joakim Berndtsson,Christopher Kinsey,2016-06-10 Conveniently structured into five sections The Routledge Research Companion to Outsourcing Security offers an overview of the different ways in which states have come to rely on private contractors to support interventions Part One puts into context the evolution of outsourcing in Western states that are actively involved in expeditionary operations as well as the rise of the commercial security sector in Afghanistan To explain the various theoretical frameworks that students can use to study security military outsourcing Part Two outlines the theories behind

security outsourcing Part Three examines the law and ethics surrounding the outsourcing of security by focusing on how states might monitor contractor behaviour hold them to account and prosecute them where their behaviour warrants such action The drivers politics and consequences of outsourcing foreign policy are covered in Part Four which is divided into two sections section one is concerned with armed contractors providing the provision of private security with the main driver being a capability gap on the part of the military law enforcement agencies and section two looks at military contractors supporting military operations right back to antiquity less controversial politically and often technologically driven The final Part takes into consideration emerging perspectives exploring areas such as gender feminist methodology maritime security and the impact of private security on the military profession This book will be of much interest to students of military and security studies foreign policy and International Relations **Security and the Turkey-EU Accession Process** N. Martin,2015-04-08 This study examines the history and politics of Turkey EU relations since 1959 exploring the complex interaction of geostrategic and normative concerns which have resulted in the current lack of accession progress and Turkey s slide to authoritarianism *Turkey - Anglo-American Security Interests, 1945-1952* Ekavi Athanassopoulou,2013-02-01 This book aims to enhance our understanding of how American presence came to become consolidated through NATO in the eastern Mediterranean in the early cold war period by examining how American and British security considerations toward the region evolved between 1947 and 1952 and the impact Turkey s pressure had on American and British security thinking Temporal Identities and Security Policy in Postwar Japan Ulv Hanssen,2019-06-13 Through a discourse analysis of Japanese parliamentary debates this book explores how different understandings of Japan s history have led to sharply divergent security policies in the postwar period whilst providing an explanation for the much debated security policy changes under Abe Shinz Analyzing the ways identities can be constructed through temporal othering as well as spatial othering this book examines the rise of a new form of identity in Japan since the end of the Cold War one that is differentiated not from prewar and wartime Japan but from postwar Japan The champions of this identity it argues see the postwar past as a shameful period characterized by self imposed military restrictions and thus the relentless chipping away of these limitations in recent years is indicative of how dominant this identity has become Exploring how these military restrictions have shifted from being a symbol of pride to a symbol of shame this book demonstrates the concrete ways in which the past can both enable and constrain policy Temporal Identities and Security Policy in Postwar Japan will be invaluable to students and scholars of Japanese politics and foreign policy as well as international relations more generally *Contemporary Issues on Governance, Conflict and Security in Africa* Adeoye O. Akinola,2023-05-25 This edited volume reflects on some of the important discussions on the trends of governance conflict and security in Africa It explores some of the emerging concerns and offers a holistic understanding of the remote and immediate causes of the conflict and how the neo colonial African states have been structured in a manner that makes violent conflict inevitable The book thereby provides

an overview of Africa s security challenges and proffers some sustainable policy options for curtailing lawlessness and armed conflict on the continent Literature is exhaustive about the nexus between governance peace and security however discourse on the impact of new conflict on governance has been scant Understanding these new trends has become a necessity and precondition for sustainable development as reflected in both the African Union AU Agenda 2063 and the United Nations UN Sustainable Development Goals SDGs
