Freedom in Captivity Radhika Gupta,2023-05-11 Ethnography of Shias living along frontiers of Kashmir negotiating belonging to India by calibrating transnational religious cultural ideas with nationalist ideologies Sapphire's Literary Breakthrough Neal A. Lester,Lynette D. Myles,2012-12-05 The first collection focused on the writing of provocative author and performance artist Sapphire including her groundbreaking novel PUSH that has since become the Academy award winning film Precious Creating the Life You Want to Live Florence Bienenfeld Ph.D. M.F.T.,2014-11-05 By working as a therapist with families for over thirty years Florence Bienenfeld Ph D MFT has put together a truly kind loving personal guidebook to improve ones life and relationships Creating the Life You Want to Live gathers decades of cutting edge therapeutic skills Bienenfeld developed with thousands of patients and presents them to you as a game changing opportunity Through anecdotal case studies contextual principles and mind body healing exercises and practices you learn to change your life by identifying and resolving debilitating issues that keep you from thriving so that you can create the life you want to live The suggestions I make throughout my book are intended to support you in achieving your goals By the time you have finished reading absorbing and utilizing all vital skills the goals you seek can become a reality from Creating the Life You Want to Live California Historian ,1989 **Post-Traumatic Growth to Psychological Well-Being** Melanie Munroe,Michel Ferrari,2022-10-25 This book explores why some people experience post traumatic growth leading to greater wisdom and others do not and suggests that a critical variable is how one copes with that trauma individuals who actively reflect on their experiences of trauma should develop higher levels of self transcendent wisdom This same dynamic has been shown both in research studies of post traumatic growth and by therapists working with people who have experienced trauma but these two bodies of work have rarely been brought into direct conversation with each other In this volume wisdom researchers and therapists with direct experience with trauma survivors comment on each other s ideas about how coping with adversity can lead to wisdom and how their proposed models of developing wisdom incorporate the act of coping with a stressful or traumatic event Based on a synthetic integration of the recommendations in each chapter the book concludes with the introduction of a new conceptual framework that can better help even individuals who experience significant stressors in their life to cope well and develop wisdom that will be both theoretically robust and practically useful *The Nature of Order, Book Four: The Luminous Ground* Christopher Alexander,2020-03-30 Christopher Alexander s series of ground breaking books including A Pattern Language and The Timeless Way of Building have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns Now in The Nature of Order Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities The foundations of modern scientific thought are firmly rooted in a conception that the universe is a machinelike entity a play of

baubles machines trinkets To this day our real daily experience of ourselves has no clear place in science It is little wonder that a machine like worldview has supported the deadly architecture of the last century This mechanistic thinking and the consequent investment oriented tracts of houses condominiums and offices have dehumanized our cities and our lives How are spirit soul emotion feeling to be introduced into a building or a street or a development project in modern times The Luminous Ground the fourth book of The Nature of Order contains what is perhaps the deepest revelation in the four volume work Here is a geometrical view of space and matter seamlessly connected to our own private personal experience as sentient and knowing creatures This is not merely an emotional appendix to the scientific theory of the other books It is at the core of the entire work and is rooted in the fact that our two sides our analytical thinking selves and our vulnerable emotional personalities as human beings are coterminous They must be harnessed at one and the same time if we are ever to really make sense of what is around us and be able to create a living world Alexander breaks away completely from the one sided mechanical model of buildings or neighbourhoods as mere assemblages of technically generated interchangeable parts He shows us conclusively that a spiritual emotional and personal basis must underlie every act of building His buildings and works of art demonstrate in detail what he means And then in the middle of the book comes the linchpin of the work a one hundred page chapter on colour which lavishly illustrates and dramatically conveys the way that consciousness and spirit can make their appearance in the world Altogether present throughout this fourth and final book is a new cosmology uniting matter and consciousness consciousness inextricably joined to the substrate of matter present in all matter and providing all wholeness with its material cognitive and spiritual underpinnings This view though radical conforms to our most ordinary daily intuitions It may provide a path for those contemporary scientists who are beginning to see consciousness as the underpinning of all matter and thus as a proper object of scientific study Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart A step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific though from 1600 to 2000 have finally been united The Nature of Order constitutes the backbone of Building Beauty Ecologic Design Construction Process an initiative aimed at radically reforming architecture education with the emphasis of making as a way to access a transformative vision of the world The 15 fundamental properties of life guide our work and have given us much more than a set of solutions The Nature of Order has given us the framework in which we can search and build up our own solutions In order to be authentically sustainable buildings and places have to be cared for and loved over generations Beautiful buildings and places are more likely to be loved and they become more beautiful and loved through the attention given to them over time Beauty is therefore not a luxury or an option it includes and transcends technological innovation and is a necessary requirement for a truly sustainable culture *The People's University* Donald R. Unified English , Enjoyment of Laughter Max Eastman,2017-09-29 Humor at its best is a somewhat fluid and transitory element but most books about it are illustrated with hardened old jokes from the comic papers or classic witticisms jerked out of their context Max Eastman in this work avoids this catastrophe by quoting mainly from contemporary American

humor This is not an anthology in that selections have been made with a view to making a point rather than covering the field The purpose of Eastman s fabled work is to make the reader laugh Since his early school days it has seemed to him that textbooks are wrongly written in that they are conducted in a way which ignores the natural operation of the mind As a result the opinion is universal and under the circumstances a fact that in order to learn anything you have to study Since this introduction to humor is itself near to writing a textbook Eastman uses the very text he constructs to illustrate the manner in which textbooks should be written Examination and classification of the kinds of humorous experience upon the basis of a theory is a science As such this work offers a fair chance to illustrate a method of instruction However the distinction between a good joke and a bad one will not prevent the reader from making bad jokes nor enable one to make good ones There is an artistic and playful element that simply cannot be taught Enjoyment of Laughter presents a total view of the science of laughter and draws upon some of the great American humorists to do so *Encounter with Enlightenment* Robert E. Carter,2012-02-01 In *Encounter with Enlightenment* Robert E Carter puts forth the East and specifically Japan as a source of possible solutions to the world s social economic and environmental problems Not only is the book a sustained scholarly analysis of both the religious and philosophical roots of Japan s distinctive ethical approach to life but it also provides the Western reader with a context for understanding Eastern values values that although familiar to the West tend to be deemphasized *Encounter with Enlightenment* begins a horizontal fusion between East and West and establishes a common ground for mutual understanding and for working toward an ethical approach that could resolve some of the earth s difficulties
