The subject of this book is the systematized body of knowledge that constitutes this foundation Integrating the disparate disciplines of descriptive cataloging subject cataloging indexing and classification the book adopts a conceptual framework that views the process of organizing information as the use of a special language of description called a bibliographic language The book is divided into two parts The first part is an analytic discussion of the intellectual foundation of information organization The second part moves from generalities to particulars presenting an overview of three bibliographic languages work languages document languages and subject languages It looks at these languages in terms of their vocabulary semantics and syntax The book is written in an exceptionally clear style at a level that makes it understandable to those outside the discipline of library and information science *Library of Congress Subject Headings: F-O* Library of Congress.
