The Modern American Military David M. Kennedy, 2013-05-10 The advent of the all volunteer force and the evolving nature of modern warfare have transformed our military changing it in serious if subtle ways that few Americans are aware of Edited by Pulitzer Prize winning historian David M Kennedy this stimulating volume brings together insights from a remarkable group of scholars who shed important new light on the changes effecting today s armed forces Beginning with a Foreword by former Secretary of Defense William J Perry the contributors take an historical approach as they explore the ever changing strategic political and fiscal contexts in which the armed forces are trained and deployed and the constantly shifting objectives that they are tasked to achieve in the post 9 11 environment They also offer strong points of view Lawrence Freedman for instance takes the leadership to task for uncritically embracing the high tech Revolution in Military Affairs when conventional warfare seems increasingly unlikely And eminent psychiatrist Jonathan Shay warns that the post battle effects of what he terms moral wounds currently receive inadequate attention from the military and the medical profession Perhaps most troubling Karl Eikenberry raises the issue of the political ownership of the military in an era of all volunteer service citing the argument that absent the political protest common to the draft era government decision makers felt free to carry out military operations in both Iraq and Afghanistan Andrew Bacevich goes further writing that it s no longer our army it hasn t been for years it s theirs the government s and they intend to keep it Looking at such issues as who serves and why the impact of non uniformed contractors in the war zone and the growing role of women in combat this volume brings together leading thinkers who illuminate the American military at the beginning of the twenty first century

Cordesman, 2001-08-30 The conclusion of a war typically signals the beginning of a flood of memoirs and instant campaign histories many presenting the purported but often dubious lessons of the recent conflict Cordesman is careful to avoid such pitfalls in this detailed and closely reasoned analysis and helps us to begin to understand the implications of this dramatic conflict on its own terms Based on a combination of official and unofficial but always authoritative sources he builds a

thorough case for the true lessons of NATO's first battle fought within Europe. After consideration of the historical major political and strategic factors that set the stage for the Kosovo campaign, Cordesman critically examines the actual effectiveness of the NATO air campaigns both in Kosovo and Serbia. Proper operations in this rugged part of Europe were difficult and compounding the challenges of terrain and weather were the conflicting national agendas within the Allied coalition that seriously hampered focused and decisive action by NATO. Although Milosevic ultimately conceded defeat, all of these factors played an important role in limiting the intensity and shaping the military outcome of the campaign and the likely political and strategic results were far from certain. Cordesman unflinchingly concludes that the air campaign over Kosovo exposed deep fault lines within and among the NATO countries and fundamental flaws in the way the West wages war.

Army, 1994. *The Changing Military Balance in the Koreas and Northeast Asia*. Anthony H. Cordesman, Aaron Lin, 2015-07-07. The tensions between the Koreas and the potential involvement of China, Japan, Russia, and the United States in a Korean conflict create a nearly open-ended spectrum of possible conflicts. These conflicts could range from posturing and threats to a major conventional conflict on the Korean peninsula with intervention by outside powers to the extreme of nuclear conflict. The Korean balance is also affected by the uncertain mix of cooperation and competition between the United States and China, particularly with the U.S. pivot toward Asia and the steady modernization of Chinese forces. This new volume, up to date through Spring 2015, provides a detailed examination of the military forces in Northeast Asia: North and South Korea, China, Russia, Japan, and the United States, setting those forces in the larger geostrategic context. **Technological**

Innovation in Legacy Sectors. William B. Bonvillian, Charles Weiss, 2015-08-18. The American economy faces two deep problems: expanding innovation and raising the rate of quality job creation. Both have roots in a neglected problem: the resistance of Legacy economic sectors to innovation. While the U.S. has focused its policies on breakthrough innovations to create new economic frontiers like information technology and biotechnology, most of its economy is locked into Legacy sectors defended by technological, economic, political, and social paradigms that block competition from disruptive innovations that could challenge their models. Americans like to build technology-covered wagons and take them out west to open new innovation frontiers; we don't head our wagons back east to bring innovation to our Legacy sectors. By failing to do so, the economy misses a major opportunity for innovation, which is the bedrock of U.S. competitiveness and its standard of living. **Technological Innovation in Legacy Sectors** uses a new unifying conceptual framework to identify the shared features underlying structural obstacles to innovation in major Legacy sectors: energy, air and auto transport, the electric power grid, buildings, manufacturing, agriculture, health care, delivery, and higher education, and develops approaches to understand and transform them. It finds both strengths and obstacles to innovation in the national innovation environments, a new concept that combines the innovation system and the broader innovation context for a group of Asian and European economies. Manufacturing is a major Legacy sector that presents a particular challenge because it is a critical stage in the innovation

process By increasingly offshoring production the U S is losing important parts of its innovation capacity Innovate here produce here where the U S took all the gains of its strong innovation system at every stage is being replaced by innovate here produce there which threatens to lead to produce there innovate there To bring innovation to Legacy sectors authors William Bonvillian and Charles Weiss recommend that policymakers focus on all stages of innovation from research through implementation They should fill institutional gaps in the innovation system and take measures to address structural obstacles to needed disruptive innovations In the specific case of advanced manufacturing the production ecosystem can be recreated to reverse jobless innovation and add manufacturing led innovation to the U S s still strong research oriented innovation system

The Global Nuclear Landscape Manpreet Sethi,2023-06-02 Like shifting sands of a desert the global nuclear landscape changes every few years across its three main constituents nuclear energy non proliferation and disarmament Each of these has seen phases of cautious optimism deep scepticism and outright pessimism over the last two decades This book offers a bird s eye view on all the three even as the individual authors offer a worm s eye view on each specific topic within the larger ambit The first section of the book examines developments in the nuclear energy sector A

broad brush scan of the contemporary drivers and challenges for nuclear energy at a global level as also that of India reveals a positive trend line There is also cautious optimism around the concept developments and prospects of small modular reactors It remains to be seen how effectively and quickly licensing and regulation issues are resolved for the new concepts to become commercially viable The second part of the book is devoted to non proliferation Vertical nuclear and missile proliferation amongst nuclear armed states and horizontal proliferation cases of Iran and possibilities in East Asia are considered Nuclear terrorism and the state of the NPT are also examined Collectively these issues reflect a mood of pessimism on non proliferation at this juncture Neither is there much to cheer on nuclear disarmament The last section of the book examines the consequences of use of nuclear weapons concepts of CBMs and arms control and recent disarmament initiatives A tentative exploration of the prospects of disarmament in the wake of Russia Ukraine conflict is also undertaken A hope that good sense will prevail and fear that it might not seem to coexist at this moment It is in India's interest to proactively shape the landscape across these three elements The book seeks to provide the basis to do so Shaking the Heavens and Splitting the Earth Roger Cliff, 2011 This monograph analyzes published Chinese and Western sources about current and future capabilities and employment concepts of the People's Liberation Army Air Force PLAAF and provides recommendations about actions that should be taken in response **The Origins of Victory** Andrew F.

Krepinevich, 2023-03-21 How the character of war is changing and how militaries can successfully adapt to meet the challenge This book by military strategist Andrew F Krepinevich Jr is the definitive take on the race for military dominance in the twenty first century It shows how militaries that successfully pursue disruptive innovation can gain a major advantage over their rivals while those that fail to do so risk exposing their countries to great danger The Precision Warfare Revolution introduced by the U S military in the First Gulf War found the United States enjoying a near monopoly in this form of warfare for several decades But now other powers have these capabilities The U S military also confronts an emerging military revolution driven by advances across a wide range of technologies from artificial intelligence and synthetic biology to quantum computing and additive manufacturing To stay competitive the U S military must pursue disruptive innovation in a race with other militaries to exploit war's changing character Clues exist as to the winner's identity They are revealed by militaries that went beyond the bounds of mere innovation to overturn the existing forms of warfare changing the course of history and the fate of nations Through exploring their experiences Krepinevich shows how the U S military can win the race to identify and exploit the next big thing in warfare Bulletin of the Atomic Scientists, 1998-11 The Bulletin of the Atomic
