Predisposing Conditions For Acute Ischem:

Predisposing Conditions for Acute Ischemic Syndromes T.v. Arnim,A. Maseri,2013-04-17 Predisposing conditions for acute ischemic syndromes contains the proceedings of a conference held in Garmisch Partenkirchen West Germany October 14 and 15 1988 The editors of this volume are most grateful to the authors for their effort to provide manuscripts before the meeting to the sponsor Bayer AG for their generous support and to the publishers for the efficient collaboration all of which have made the appearance of this book possible All authors contributed their manuscripts in advance and they are combined with an edited version of the discussions to allow rapid publication In coronary heart disease the prognosis for patients is largely determined by the occurrence of irreversible ischemic damage to the myocardium Irreversible events are certainly preceded by a destabilization of a former stable situation This destabilization may occur with increasing symptomatology or without apparent warning signs to patient and physician it may occur over a longer time period or very suddenly The statement however holds true that no patient has ever died from stable angina pectoris Thus if the prognosis for patients with ischemic heart disease is to be improved the focus has to be set on recognition and treatment of unstable ischemic syndromes It was the goal of the conference to gather scientists and clinicians from different fields of research to get an up to date view of the different aspects of unstable ischemic syndromes and to foster interdisciplinary discussions
