Historiography |

Cosmography Ishwar Dayal Gaur, 2023-10-06 This book attempts to study Panjab historiography from the viewpoint of cosmography the concept derived from the cosmological paradigm which Professor Harjeet Singh Gill an eminent semiotician developed in his oeuvre Since its introduction in the colonial Panjab the discipline of historiography subdued the indigenous craft of history writing such as katha qissa janamsakhi and jangnama wherein what Professor Gill has conceptualized as the dialectic of representation and transcendence remained ever active This title has been co published with Aakar Books

Exclusion and Poverty in India and Central Asia Chittaranjan Senapati, 2016-09-09 The early years of 1990s economic reform and change has neglected social sectors both in India and Central Asia As a result poverty has also increased in India and Central Asian countries The economic political and social situation has worsened in all Central Asian states due to transition from command economy to market economy The early 1990s political decision has been dominated by a narrowly conceived version of economic policy for both India and Central Asia As a result the quality and the structure of social protection changed in a negative way Indeed in some cases the pursuit of a strict economic orthodoxy has left various sections of the community marginalized and alienated Both the societies confront a number of challenges that is as profound as the economic changes of the past The process of globalization and technical change has influenced economy and society in complex ways including raising expectations of consumption and remuneration for skilled knowledge workers creating greater demand for some information skills and services causing unemployment amongst those with few qualifications and destabilizing some traditional ways of life and increasing social exclusion It detaches groups and individuals from social relations and institutions and prevents them from full participation in the normal activities of the society In India and Central Asia communities face social exclusion on the basis of their identity as ethnic groups socio economic groups religious

community and gender Inclusive development therefore is essential and it should be the top priority in development programs of India and Central Asia Research in this area has not been touched upon so far Since Central Asian countries are relatively new and trying to establish their democratic institutions this piece of work will be helpful for their nation building processes So far as the mutual benefit for both the regions is concerned India is an old democracy and its inclusive policy can be lessons for Central Asian countries On the other hand the experience of Central Asias policy implementation can be a lesson for India This piece of work has potential impulses to policy makers academicians and researchers of these five Central Asian countries and India This work can make a distinction than the conventional researcher in India by focusing on development studies social exclusion inclusive policies and comparative studies in international developments Key words social exclusion poverty deprivation development diversity India Central Asia Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan Building Teacher Quality in India Alexander W. Wiseman, Preeti Kumar, 2021-08-04 India has one of the largest student populations in the world the quality of teaching is blamed for the poor performance by Indian students on internationally comparative assessments By analyzing various measures of teacher quality this book provides a framework for policymakers to further improve teacher quality in India **Iron Will** Markus Kroger, 2020-11-23 Iron Will lays bare the role of extractivist policies and efforts to resist these policies through a deep ethnographic exploration of globally important iron ore mining in Brazil and India Markus Kr ger addresses resistance strategies to extractivism and tracks their success or lack thereof through a comparison of peaceful and armed resource conflicts explaining how different means of resistance arise Using the distinctly different contexts and political systems of Brazil and India highlights the importance of local context for resistance For example if there is an armed conflict at a planned mining site how does this influence the possibility to use peaceful resistance strategies To answer such questions Kr ger assesses the inter relations of contentious electoral institutional judicial and private politics that surround conflicts and interactions offering a new theoretical framework of investment politics that can be applied generally by scholars and students of social movements environmental studies and political economy and even more broadly in Social Scientific and Environmental Policy research By drawing on a detailed field research and other sources this book explains precisely which resistance strategies are able to influence both political and economic outcomes Kr ger expands the focus of traditionally Latin American extractivism research to other contexts such as India and the growing extractivist movement in the Global North In addition as the book is a multi sited political ethnography it will appeal to sociologists political scientists anthropologists geographers and others using field research among other methods to understand globalization and global political interactions It is the most comprehensive book on the political economy and ecology of iron ore and steel This is astonishing given the fact that iron ore is the second most important commodity in the world after oil *Religious Activism in the Global Economy* Sabine Dreher, Peter J. Smith, 2016-06-01 Protests of neoliberal globalization have proliferated in recent years not least in response

to the financial crisis austerity and increasing inequality But how do religious groups organize themselves in response to these issues This book systematically studies the relationship of religious activism towards neoliberal globalization It considers how religious organizations often play a central role in the resistance against global capitalism endeavouring to offer alternatives and developments for reform But it also examines the other side of the coin showing how many religious groups help to diffuse neoliberal values promote and reinforce practices of capitalism Drawing on a unique set of case studies from around the world the chapters examine a range of groups and their practices in order to provide a thorough examination of the relationship between religion and the global political economy KRIDHA ARUNIM
