Aspects of Wilfred Owen's Poetry Sasi Bhusan Das, 1979 *Mapping the World of Anglo-American Studies at the Turn of the Century* Marija Knežević, 2015-10-05 This volume revisits the most important issues that Anglo American studies are facing at the beginning of the twenty first century with regards to both research and teaching Given the English language's status as a lingua franca the culture that produced it and that has been changing it the literature written in English and relevant linguistic and literary discourse have come to largely dominate critical theory globally Therefore the subjects of Anglo American studies and their traditional and modern concepts must be approached from a multidisciplinary perspective and must also be problematized in and determined by other spheres of the world especially at the universities at which they are studied This book consequently approaches both mainstream cultural literary linguistic and academic achievements and often by way of comparison those smaller more distant and marginalized fields traditionally subordinate studies as well as instances of cultural hybridization Given its concern with a broad field of culture literature linguistics and methodology of teaching English as a foreign language this book consists of two main parts comprising the closest research and teaching fields one attending to culture and literature and the other approaching linguistics and methodology
