**Birth Settings in America** National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Assessing Health Outcomes by Birth Settings, 2020-05-01 The delivery of high quality and equitable care for both mothers and newborns is complex and requires

efforts across many sectors The United States spends more on childbirth than any other country in the world yet outcomes are worse than other high resource countries and even worse for Black and Native American women There are a variety of factors that influence childbirth including social determinants such as income educational levels access to care financing transportation structural racism and geographic variability in birth settings It is important to reevaluate the United States approach to maternal and newborn care through the lens of these factors across multiple disciplines Birth Settings in America Outcomes Quality Access and Choice reviews and evaluates maternal and newborn care in the United States the epidemiology of social and clinical risks in pregnancy and childbirth birth settings research and access to and choice of birth settings

**Risk, Pregnancy and Childbirth** Kirstie Coxon, Mandie Scamell, Andy Alaszewski, 2018-10-11 Over the last hundred years pregnancy and childbirth has become increasingly safe yet it is still a site of risk and a contested ground on which health professionals and pregnant women both face high costs of error In this context all those involved in managing pregnancy and birth are expected to identify and mitigate risk pregnant women are subject to increasing surveillance to ensure the safety of the unborn foetus and every aspect of childbearing is increasingly medicalised This publication brings together fascinating social science research to explore the ways in which risk is both created and managed in pregnancy and childbirth The introductory chapters reflect on the changing social context of childbirth in particular the medicalisation of both pregnancy and childbirth with development of specialist practitioners such as obstetricians and midwives who claim to have the knowledge technology and skills to identify and manage the risks involved The next three chapters that examine the ways in which women's behaviour during pregnancy is constructed as potentially risky for example smoking drinking alcohol and taking drugs and how these risks are monitored and mitigated The final two parts of the book address the construction of and responses to both medicalisation and risk in childbirth Altogether it represents a valuable insight into the complex world of pregnancy childbirth and risk This book brings together editorials and articles originally published in special and open issues of Health Risk and Society
