Homeopathy for Pregnancy, Birth, and Your Baby's First Year Miranda

Castro, 2015-02-03 No period in a woman's life is as filled with special concerns as pregnancy and new motherhood. Among the many discomforts and ailments treatable with the homeopathic remedies explained in this book are: For the mother: anemia, back pain, breastfeeding problems, constipation, exhaustion, hemorrhoids, insomnia, morning sickness, post partum depression, sinusitis, varicose veins, yeast infections. For the baby: breathing difficulties, chicken pox, constipation, cough, diaper rash, diarrhea, ear infection, hiccups, mumps, sleep problems, teething pains, vomiting. In *Homeopathy for Pregnancy, Birth, and Your Baby's First Year*, practicing homeopath Miranda Castro introduces readers to the many safe, effective, inexpensive, and nonmedical remedies that homeopathy has to offer women in this very important period. With reassuring, easy-to-read text, the book explains the principles of homeopathy and tells readers how to select the remedies that correlate to hundreds of common symptoms of physical and emotional distress. The book also offers natural ways to make labor and birth as relaxed as possible using homeopathic methods. Complete with case histories, materia medica, and supportive and helpful tips throughout, this guidebook offers a wealth of natural health information every expectant mother should consider.

Current Patterns and Programs for Teenage Pregnancy Prevention Stanley Edward Weed, 1989 Abstract This publication is designed to provide background for hearings of the Committee on Labor and Human Resources on the general subject of adolescent pregnancy prevention. Research findings that have relevance for policy makers and administrators who are concerned about teenage pregnancy are summarized. Major program and solution strategies, sexuality education programs, contraception interventions, school-based clinics, and the values-based adolescent family life programs, their basic assumptions, and evidence of their effectiveness are discussed. The conclusion emphasizes the continuing failure of the major interventions, the need for broader-based approaches that address more specifically the dynamics of the problem, and the potential of the value-based programs. Comments by the staff of the committee majority on the report are included.
