Pregnant And Lovin It:

Black, Pregnant and Loving It Yvette Allen-Campbell, Suzanne GreenidgeHewitt, Dr. Suzanne Greenidge-Hewitt, 2016-12-27 Yvette Allen Campbell and Dr Suzanne Greenidge Hewitt have created the ultimate pregnancy guide for today's black woman Most pregnancy books are geared towards white culture in language and approach as well as health issues While most of the development is the same regardless of race there are health and cultural issues specific to women of color But the biggest point of difference is a book written by black women an educator and a top doctor for black women Black Pregnant and Loving It includes information on the specific health issues common to pregnant black women from hyperventilating to dehydration as well as skin and hair concerns You'll learn how to select a doctor or midwife which diet is best for you and your baby how to identify your body's needs as well as a month by month view of what to expect In addition there are also flashbacks to older methods of childbirth and black folk myths and superstitions Overall this is a complete pregnancy guide rooted in modern science for the health and well being of the black community Pregnant and Lovin' it Lindsay R. Curtis, Yvonne Coroles, 1976 *Cinematernity* Lucy Fischer, 2014-07-14 Noting that motherhood is a common metaphor for film production Lucy Fischer undertakes the first investigation of how the topic of motherhood presents itself throughout a wide range of film genres Until now discussions of maternity have focused mainly on melodramas which along with musicals and screwball comedies have traditionally been viewed as women's cinema Fischer defies gender based classifications to show how motherhood has played a fundamental role in the overall cinematic experience She argues that motherhood is often treated as a site of crisis for example the mother being blamed for the ills afflicting her offspring then shows the tendency of certain genres to specialize in representing a particular social or psychological dimension in the thematics of maternity Drawing on social history and various cultural theories Fischer first looks at Rosemary's Baby to show the prevalence of childbirth themes in horror films In crime films White Heat she sees the linkage of male deviance and mothering The Hand That Rocks the Cradle and The Guardian both occult thrillers uncover cultural anxieties about working mothers Her discussion covers burlesques of male mothering feminist documentaries on the mother daughter relationship trick films dealing with procreative metaphors and postmodern films like High Heels where fluid sexuality is the theme These films tend to treat motherhood as a locus of irredeemable conflict whereas History and Memory and High Tide propose a more sanguine dynamic and enabling view Originally published in 1996 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Signs of Life** Graeme Harper, Andrew Moor, 2005 Signs of Life Medicine and Cinema is the first single

volume to consider the cinematic representation of medicine medical science and the medical profession and explores the political implications of the representations of doctors nurses patients diseases and disabilities The essays in this collection from a wide range of film scholars and medical practitioners also consider how formal qualities of cinema such as empirical observation mise en scene propaganda and education melodrama documentary and narrative construction impact on our understanding of medical procedures and the public image of medicine

The Dread of Difference Barry Keith Grant, 2015-04-01 The Dread of Difference is a classic Few film studies texts have been so widely read and so influential It is rarely on the shelf at my university library so continuously does it circulate Now this new edition expands the already comprehensive coverage of gender in the horror film with new essays on recent developments such as the Hostel series and torture porn Informative and enlightening this updated classic is an essential reference for fans and students of horror movies Stephen Prince editor of The Horror Film and author of Digital Visual Effects in Cinema The Seduction of Reality An impressive array of distinguished scholars gazes deeply into the darkness and then forms a Dionysian chorus reaffirming that sexuality and the monstrous are indeed mated in many horror films Choice An extremely useful introduction to recent thinking about gender issues within this genre Film Theory

Johnson-Hanks,Christine A. Bachrach,S. Philip Morgan,Hans-Peter Kohler,2011-08-27 Fertility rates vary considerably across and within societies and over time Over the last three decades social demographers have made remarkable progress in documenting these axes of variation but theoretical models to explain family change and variation have lagged behind At the same time our sister disciplines from cultural anthropology to social psychology to cognitive science and beyond have made dramatic strides in understanding how social action works and how bodies brains cultural contexts and structural conditions are coordinated in that process *Understanding Family Change and Variation Toward a Theory of Conjunctural Action* argues that social demography must be reintegrated into the core of theory and research about the processes and mechanisms of social action and proposes a framework through which that reintegration can occur This framework posits that material and schematic structures profoundly shape the occurrence frequency and context of the vital events that constitute the object of social demography Fertility and family behaviors are best understood as a function not just of individual traits but of the structured contexts in which behavior occurs This approach upends many assumptions in social demography encouraging demographers to embrace the endogeneity of social life and to move beyond fruitless debates of structure versus culture of agency versus structure or of biology versus society **Medical and Health Care Books and Serials in Print** ,1986
