Prehistoric Epic:

A Companion to Ancient Epic John Miles Foley, 2008-11-03 A Companion to Ancient Epic presents for the first time a comprehensive up to date overview of ancient Near Eastern Greek and Roman epic It offers a multi disciplinary discussion of both longstanding ideas and newer perspectives A Companion to the Near Eastern Greek and Roman epic traditions Considers the interrelation between these different traditions Provides a balanced overview of longstanding ideas and newer perspectives in the study of epic Shows how scholarship over the last forty years has transformed the ways that we conceive of and understand the genre Covers recently introduced topics such as the role of women the history of reception and comparison with living analogues from oral tradition The editor and contributors are leading scholars in the field Includes a detailed index of poems poets technical terms and important figures and events *Myth And Prehistoric Global Navigation - A dialogue* J. J. Fraenkel, 2005 Prehistoric Epic! Marcus Cirilius, 1978-02-01 **Archaeology and the Homeric Epic** Susan Sherratt, John Bennet, 2016-11-30 The relationship between the Homeric epics and archaeology has long suffered mixed fortunes swinging between fundamentalist attempts to use archaeology in order to demonstrate the essential historicity of the epics and their background and outright rejection of the idea that archaeology is capable of contributing anything at all to our understanding and appreciation of the epics Archaeology and the Homeric Epic concentrates less on historicity in favor of exploring a variety of other perhaps sometimes more oblique ways in which we can use a multidisciplinary approach archaeology philology anthropology and social history to help offer insights into the epics the contexts of their possibly prolonged creation aspects of their prehistory and what they may have stood for at various times in their long oral and written history The effects of the Homeric epics on the history and popular reception of archaeology especially in the particular context of modern Germany is also a theme that is explored here Contributors explore a variety of issues including the relationships between visual and verbal imagery the social contexts of epic or sub epic creation or re creation the roles of bards and their relationships to different types of patrons and audiences the construction and uses of history as traceable through both epic and archaeology and the relationship between prehistoric oral and historical recorded in writing periods Throughout the emphasis is on context and its relevance to the creation transmission re creation and manipulation of epic in the present or near present as well as in the ancient Greek past *Jurassic Classics: The Prehistoric Masters of Literature* Saskia Lacey, 2016-04-01 Famous literary figures are given dinosaur inspired pseudonyms and prehistoric biographies as a way of introducing young readers to classic literature *Social History of Art, Volume 1* Arnold Hauser, 2005-06-27 First published in 1951 Arnold Hausers commanding work presents an account of the development and meaning of art from its origins in the Stone Age through to the Film Age Exploring the interaction between art and society Hauser effectively details social and historical movements and sketches the frameworks in which visual art is produced This new edition provides an excellent introduction to the work of Arnold Hauser In his general introduction to The Social History

of Art Jonathan Harris assesses the importance of the work for contemporary art history and visual culture In addition an introduction to each volume provides a synopsis of Hausers narrative and serves as a critical guide to the text identifying major themes trends and arguments *Prehistoric Antiquities of the Aryan Peoples* Otto Schrader, Frank Byron Jevons, 1890

Travelling Notions of Culture in Early Nineteenth-Century Europe Hannu Salmi, Asko Nivala, Jukka Sarjala, 2015-10-23 The notions of culture and civilization are at the heart of European self image This book focuses on how space and spatiality contributed to defining the concepts of culture and civilization and conversely what kind of spatial ramifications culture and civilization entailed These questions have vital importance to the understanding of this formative period of modern Europe The chapters of this volume concentrate on the following themes What were the sites of culture civilization and Bildung and how were these sites employed in defining these concepts What kind of borders did this process of definition and its inherent spatial imagination produce What were the connecting routes between the supposed centers and peripheries What were the strategies of envisioning negotiating and transforming cultural territories in early nineteenth century Europe This book adds new perspectives on ways of approaching spatiality in history by investigating for example the decisive role of the French revolution the persistent interest in classical civilization and its sites emerging urbanism and the culture of the cities the changing constellations between centers and peripheries and the colonial extensions or transfigurations of culture It also pays attention to the spatiality of culture as a metaphor but simultaneously emphasizes the production of space in an era of technological innovation and change *Gilgamesh, Enkidu, and the Netherworld and the Sumerian Gilgamesh Cycle* Alhena Gadotti, 2014-08-08 Alhena Gadotti offers a much needed new edition of the Sumerian composition Gilgamesh Enkidu and the Netherworld last published by Aaron Shaffer in his 1963 doctoral dissertation Since then several new manuscripts have come to light prompting not only a new edition of the text but also a re examination of the composition In this book Gadotti argues that Gilgamesh Enkidu and the Netherworld was the first not the last of the Sumerian stories about Gilgamesh She also suggests that a Sumerian Gilgamesh Cycle currently only attested in old Babylonian manuscripts ca 18th century BCE was in fact developed during the Ur III period ca 2100 2000 BCE Providing a new way to look at the Sumerian Gilgamesh stories this book is relevant not only to scholars of the ancient Near East but also to anyone interested in epic and epic cycle *The Marcus Tree* Randy Nii, 2013-06-09 Down home poetry from Idaho poet Randy Nii Randy s blend of home spun and classical poetry makes for an engaging ride **The Masters** APLS, 2013-04-03 Poetry is art Like a painting or a sculpture you either love it or you hate it It either moves you or it doesn t You either understand what the poet is saying or you don t It s as simple as that And like art poetry is subjective You can either look at a Jackson Pollock painting and it moves you in some way or it looks like he splattered paint on a canvas That is poetry Michael Spence Dobson Editor *Scratching the Page* David Ratcliffe, 2013-06-11 The first offering of English poet David Ratcliffe of the poetry group APLS **Aftermath** Michael Dobson, 2013-04-17 These days I find myself staring at a blank page No words flow from my mind anymore Nothing of worth

 Papakonstantinou,2013-09-26 This book presents the results of a major project carried out by a team from the Universidad
 Aut noma de Madrid and the 14th Ephorate of Prehistoric and Classical Antiquities at Lamia The book gives a full picture of a
 extensive area of Greece known as Epicnemidian Locris on which very little has been studied and published in the past Its
 relevance in historical times was due to its natural environment and mainly on the pass at Thermopylae which marked the
 physical boundary between central northern Greece and the south being the scene of repeated conflicts The book offers a a
 complete picture of what Epicnemidian Locris was like in the past its geography topography frontiers and the ancient
 settlements of the region **A History of Greece** George Willis Botsford,1908 Islam and the Heroic Image John
 Renard,1999 Throughout the world and over many centuries the cultures in which Islam has been a major presence have
 created stories in word and picture to celebrate the men and women who best exemplify each culture s aspirations This is the
 story of how those heroic figures have both shaped and been shaped by the religious tradition called Islam The
Near-Death of the Author John Potts,2022-11-01 In the modern world of networked digital media authors must navigate many
 challenges Most pressingly the illegal downloading and streaming of copyright material on the internet deprives authors of
 royalties and in some cases it has discouraged creativity or terminated careers Exploring technology s impact on the status
 and idea of authorship in today s world The Near Death of the Author reveals the many obstacles facing contemporary
 authors John Potts details how the online culture of remix and creative reuse operates in a post authorship mode with little
 regard for individual authorship The book explores how developments in algorithms and artificial intelligence AI have yielded
 novels newspaper articles musical works films and paintings without the need of human authors or artists It also examines
 how these AI achievements have provoked questions regarding the authorship of new works such as Does the author need to
 be human And more alarmingly Is there even a need for human authors Providing suggestions on how contemporary authors
 can endure in the world of data the book ultimately concludes that network culture has provoked the near death but not the
 death of the author **Summary of Nexus: A Brief History of Information Networks from the Stone Age to AI by**
Yuval Noah Harari Michael Smith,2024-12-13 Summary of Nexus A Brief History of Information Networks from the Stone
 Age to AI Introduction The Web That Weaves Us All Together Throughout human history the story of progress has been
 shaped by the invisible threads that bind us information networks These networks are not merely tools or technologies they
 are the foundation of our civilizations the bedrock upon which societies have risen and sometimes fallen From the earliest

myths whispered around a fire to the algorithms that power artificial intelligence today humanity has continually refined how it stores shares and leverages information The journey of these networks is a story of creativity ambition and unintended consequences In Nexus we explore the intricate evolution of information networks a tale spanning millennia It begins in prehistory where storytelling served as the first great network enabling early humans to pass down essential survival knowledge build alliances and share values These stories united tribes creating bonds of trust that transcended individual experience Over time as humans discovered new ways to document their thoughts on clay tablets scrolls and paper the scale of these networks expanded What once connected only a handful of people could now link entire nations Documents gave rise to bureaucracies and empires but they also brought vulnerabilities The written word for all its permanence was subject to errors and manipulation As Harari notes the fallibility of information systems has always been a double edged sword An empire s reliance on flawed records could lead to its undoing just as today s dependence on algorithms can magnify systemic biases The modern age introduced a radical shift With the advent of computers and the internet information networks entered a phase of exponential growth Machines joined the human web processing data at speeds and scales previously unimaginable The digital revolution promised a new era of connectivity where knowledge flowed freely and barriers dissolved Yet as the network grew so did its complexity and its fragility In the 21st century we find ourselves at a crossroads Democracies face unprecedented challenges as misinformation and echo chambers erode the shared realities needed for collective decision making At the same time authoritarian regimes leverage the power of centralized networks to surveil and control their citizens The global network once envisioned as a tool for unity increasingly mirrors the divisions and inequalities of the physical world Nexus is not just a history of information networks it is a meditation on their future Harari invites us to consider profound questions How can we preserve the benefits of global connectivity while mitigating its dangers Can democracies survive in an age of algorithmic manipulation And as artificial intelligence becomes an integral part of these networks who or what will ultimately control them This book challenges us to look beyond the surface of our technological marvels and grapple with the deeper implications of the systems we ve built For in understanding the past of information networks we may yet find the wisdom to navigate their future As we stand on the brink of the next great transformation Nexus serves as both a warning and a guide reminding us that the story of human progress is at its heart a story of connection
