## **Prehistoric Mining And Allied Industries:**

**Prehistoric Mining and Allied Industries** R. Shepherd, 1980      Prehistoric Copper Mining in Europe William O'Brien, 2015 Readership Scholars and students interested in archaeometallurgy and the history of European prehistoric mining and prehistoric Europe more generally      **Prehistoric Mining and Metallurgy in South West Iberian Peninsula** Mark A. Hunt Ortiz, 2003 A technological and often technical study of mining and metalworking in south west Iberia from the Chalcolithic to the Late Bronze Age      *Craft Specialization in the Prehistoric Channel Islands, California* Jeanne E. Arnold, 1987-01-01      Science and Civilisation in China, Part 13, Mining Peter J. Golas, 1999-02-25 The fifth volume of Dr Needham's immense undertaking covers the subjects of chemistry and chemical technology This the thirteenth part of the volume is the first history of Chinese mining to appear in a western language Covering from the Neolithic period to the present day it deals with the full range of Chinese mining from copper to mercury arsenic to coal and a large number of other minerals and materials The author draws extensively not only on written sources but also on archaeological remains and observation of traditional techniques still in use The interrelationship between Chinese mining and the social economic and political conditions in which it took place is examined and leads the author to conclude that these extraneous factors were probably more important in determining how mining was carried out than technological progress      **Signalling and Performance: Ancient Rock Art in Britain and Ireland** Aron Mazel, George Nash, 2022-08-28 This lavishly illustrated volume presents a state of the art survey of the ancient rock art of Britain and Ireland Bringing together new discoveries and new interpretations it enhances our understanding and further establishes ancient British and Irish rock art as a significant archaeological assemblage worthy of attention and additional study      *Ancient Indian Mining, Metallurgy, and Metal Industries* G. Kuppuram, 1989      **Gold** Boyle, 2012-12-06 GOLD History and Genesis of Deposits is the product of an effort by the Society of Economic Geologists to publish materials that will expand knowledge concerning timely specific topics important to the study of economic geology and to economic geologists A volume on gold was selected for a general review type publication because of the importance of the gold mining industry in the 1980s The officers and council of the Society of Economic Geologists authorized the preparation of this book on gold in 1981 and Dr Robert W Boyle was selected as its author Dr Boyle has extensive experience in the study of gold deposits He has an international reputation and a broad interest and understanding of the gold mining industry the origin of gold deposits and the history of gold as a metal and ore from prehistoric times to recent Dr Boyle uses important publications on gold deposits as source materials to document the various pathways of geological thought over time to introduce the reader to modern concepts The book contains a wealth of information concerning gold      **Bronze Age Metalworking in the Netherlands (c. 2000-800 BC)** M. H. G. Kuijpers, 2008 Almost fifty years ago J J Butler started his research to trace the possible remains of a Bronze Age metalworker's workshop in the Netherlands Yet while metalworking has been deduced on the ground of the existence of regional types of axes and some

scarce finds related to metalworking the smith's workplace has remained elusive In this Research Master Thesis I have tried to tackle this problem I have considered both the social as well as the technological aspects of metalworking to be able to determine conclusively whether metalworking took place in the Netherlands or not The first part of the thesis revolves around the social position of the smith and the social organization of metalworking My approach entails a re-evaluation of the current theories on metalworking which I believe to be unfounded and one-sided They tend to disregard production of everyday objects of which the most prominent example is the axe The second part deals with the technological aspects of metalworking and how these processes are manifested in the archaeological record Based on evidence from archaeological sites elsewhere in Europe and with the aid of experimental archaeology a metalworking toolkit is constructed Finally a method is presented which might help archaeologists recognize the workplace of a Bronze Age smith

**Mining and Materiality** Anne M. Teather, 2016-02-28 In this book Anne Teather develops a new approach to understanding the Neolithic flint mines of southern Britain

*Ancient Mining* Shepherd, 1993 This book provides a survey of the history of the extractive industries throughout the period from prehistory to the final years of the Roman Empire in the west It is a sequel to *Prehistoric Mining and Allied Industries* 1980 also by Shepherd The areas covered by this new study include Western Europe the Middle East Southwest Asia and North Africa
