Prehistoric Tewa Economy Modeling Subsistence Production On The Pajarito Plateau:

The Pajarito Plateau Frances Joan Mathien, Charlie R. Steen, Craig Daniel Allen, 1993 Reframing the Northern Rio Grande Pueblo Economy Scott Ortman, 2019-04-30 Rio Grande pueblo societies took shape in the aftermath of significant turmoil and migration in the thirteenth century In the centuries that followed the size of Pueblo settlements level of aggregation degree of productive specialization extent of interethnic exchange and overall social harmony increased to unprecedented levels Economists recognize scale agglomeration the division of labor international trade and control over violence as important determinants of socioeconomic development in the modern world But is a development framework appropriate for understanding Rio Grande archaeology What do we learn about contemporary Pueblo culture and its resiliency when Pueblo history is viewed through this lens What does the exercise teach us about the determinants of economic growth more generally The contributors in this volume argue that ideas from economics and complexity science when suitably adapted provide a compelling approach to the archaeological record Contributors consider what we can learn about socioeconomic development through archaeology and explore how Pueblo culture and institutions supported improvements in the material conditions of life over time They examine demographic patterns the production and exchange of food cotton textiles pottery and stone tools and institutional structures reflected in village plans rock art and ritual artifacts that promoted peaceful exchange They also document change through time in various economic measures and consider their implications for theories of socioeconomic development The archaeological record of the Northern Rio Grande exhibits the hallmarks of economic development but Pueblo economies were organized in radically different ways than modern industrialized and capitalist economies This volume explores the patterns and determinants of economic development in pre Hispanic Rio Grande Pueblo society building a platform for more broadly informed research on this critical process *Ancestral Landscapes of the Pueblo World* James Elliot Snead, 2008 The eastern Pueblo heartland located in the northern Rio Grande country of New Mexico has fascinated archaeologists since the 1870s In *Ancestral Landscapes of the Pueblo World* James Snead uses an exciting new approach landscape archaeology to understand ancestral Pueblo communities and the way the people consciously or unconsciously shaped the land around them Snead provides detailed insight into ancestral Puebloan cultures and societies using an approach he calls contextual experience employing deep mapping and community scale analysis This strategy goes far beyond the standard archaeological approaches using historical ethnography and contemporary Puebloan perspectives to better understand how past and present Pueblo worldviews and meanings are imbedded in the land Snead focuses on five communities in the Pueblo heartland Burnt Corn T obimpaenge Tsikwaiye Los Aguajes and Tsankawi using the results of intensive archaeological surveys to discuss the changes that occurred in these communities between AD 1250 and 1500 He examines the history of each area comparing and contrasting them via the themes of provision identity and movement before turning to questions regarding social political and economic

organization This revolutionary study thus makes an important contribution to landscape archaeology and explains how the Precolumbian Pueblo landscape was formed **Southwest Cultural Resources Center Professional Papers** ,1983

The Languages and Linguistics of Indigenous North America Carmen Dagostino,Marianne Mithun,Keren Rice,2023-12-18 This handbook provides broad coverage of the languages indigenous to North America with special focus on typologically interesting features and areal characteristics surveys of current work and topics of particular importance to communities The volume is divided into two major parts subfields of linguistics and family sketches The subfields include those that are customarily addressed in discussions of North American languages sounds and sound structure words sentences as well as many that have received somewhat less attention until recently tone prosody sociolinguistic variation directives information structure discourse meaning language over space and time conversation structure evidentiality pragmatics verbal art first and second language acquisition archives evolving notions of fieldwork Family sketches cover major language families and isolates and highlight topics of special value to communities engaged in work on language maintenance documentation and revitalization **Leaving Mesa Verde** Timothy A. Kohler,Mark D. Varien,Aaron M. Wright,2013-11-15 It is one of the great mysteries in the archaeology of the Americas the depopulation of the northern Southwest in the late thirteenth century AD Considering the numbers of people affected the distances moved the permanence of the departures the severity of the surrounding conditions and the human suffering and culture change that accompanied them the abrupt conclusion to the farming way of life in this region is one of the greatest disruptions in recorded history Much new paleoenvironmental data and a great deal of archaeological survey and excavation permit the fifteen scientists represented here much greater precision in determining the timing of the depopulation the number of people affected and the ways in which northern Pueblo peoples coped and failed to cope with the rapidly changing environmental and demographic conditions they encountered throughout the 1200s In addition some of the scientists in this volume use models to provide insights into the processes behind the patterns they find helping to narrow the range of plausible explanations What emerges from these investigations is a highly pertinent story of conflict and disruption as a result of climate change environmental degradation social rigidity and conflict Taken as a whole these contributions recognize this era as having witnessed a competition between differing social and economic organizations in which selective migration was considerably hastened by severe climatic environmental and social upheaval Moreover the chapters show that it is at least as true that emigration led to the collapse of the northern Southwest as it is that collapse led to emigration

The Pueblo Revolt and the Mythology of Conquest Michael V. Wilcox,2009-12-03 In a groundbreaking book that challenges familiar narratives of discontinuity disease based demographic collapse and acculturation Michael V Wilcox upends many deeply held assumptions about native peoples in North America His provocative book poses the question What if we attempted to explain their presence in contemporary society five hundred years after Columbus instead of their

disappearance or marginalization Wilcox looks in particular at the 1680 Pueblo Revolt in colonial New Mexico the most successful indigenous rebellion in the Americas as a case study for dismantling the mythology of the perpetually vanishing Indian Bringing recent archaeological findings to bear on traditional historical accounts Wilcox suggests that a more profitable direction for understanding the history of Native cultures should involve analyses of issues such as violence slavery and the creative responses they generated *Archaeology of Bandelier National Monument* Timothy A. Kohler,2004-05 These essays summarize the results of new excavation and survey research at Bandelier National Monument with special attention to determining why larger sites appear when and where they do and how life in these later villages and towns differed from life in the earlier small hamlets that first dotted the Pajarito in the mid 1100s *The Kiva* ,1999

Traditions, Transitions, and Technologies Sarah Schlanger,2002 *Traditions Transitions and Technologies* offers diverse perspectives on the state of Southwestern archaeology at the end of the twentieth century linking the legacies of the past to present trends by placing current research into historical context Organized around classic themes central to the history of the discipline this volume explores important new research avenues for understanding the connections between historic Pueblo communities and their distant ancestors the origins of farming traditions and the development of the Southwest s distinctive tools and technologies Providing a unique overview of past and present work in this important region *Traditions Transitions and Technologies* will be of interest to all doing archaeological research in the Southwestern United States **A Bibliography of Early California and Neighboring Territory Through 1846** ,2002 **Latin America** Juan Manuel Pérez,2004 This is a general bibliography on Latin America covering a wide variety of subjects from pre Columbian civilizations to Columbus to Castro to the foreign debt to pollution ect This work will not only be of use to the general casual reader on Latin America but also to the more specialized researcher The book contains over 800 topics with over 8 000 titles identified **The Marginal Cost of Production in Subsistence Economies** William Nicholas Trierweiler,1989
