Anderson, 2009-08-16 A newer edition of this book is available for ordering at the following web address <https://rowman.com> ISBN 9780759123298 Introduction to Cultural Ecology provides a comprehensive discussion of the history and theoretical foundations of cultural ecology featuring nine case studies from around the world

An Introduction to Cultural Ecology Mark Q. Sutton, E. N. Anderson, 2020-08-26 This contemporary introduction to the principles and research base of cultural ecology is the ideal textbook for advanced undergraduate and beginning graduate courses that deal with the intersection of humans and the environment in traditional societies After introducing the basic principles of cultural anthropology environmental studies and human biological adaptations to the environment the book provides a thorough discussion of the history of and theoretical basis behind cultural ecology The bulk of the book outlines the broad economic strategies used by traditional cultures hunting gathering horticulture pastoralism and agriculture Fully explicated with cases illustrations and charts on topics as diverse as salmon ceremonies among Northwest Indians contemporary Maya agriculture and the sacred groves in southern China this book gives a global view of these strategies An important emphasis in this text is on the nature of contemporary ecological issues how peoples worldwide adapt to them and what the Western world can learn from their experiences A perfect text for courses in anthropology environmental studies and sociology

Quaternary of the Levant Yehouda Enzel, Ofer Bar-Yosef, 2017-04-27 Over eighty contributions from leading researchers review 2.5 million years of environmental change and human cultural evolution in the Levant

The Archaeology of Jordan and Beyond Lawrence E. Stager, Joseph A. Greene, Michael D. Coogan, 2018-07-17 James A. Sauer was for many years the Director of the American Center of Oriental Research in Amman Jordan leading it to the preeminent place it now occupies as a research institution dedicated to the archaeology and history of Transjordan This volume honors him with more than 50 contributions from colleagues and friends With this volume the Harvard Semitic Museum inaugurates a new series entitled Studies in the Archaeology and History of the Levant

Neanderthals in the Levant Donald O. Henry, 2003-10-01 The volume traces the controversy that revolves around the bio-cultural relationships of Archaic Neanderthal and Modern humans at global and regional Levantine scales The focus of the book is on understanding the degree to which the behavioral organization of

Archaic groups differed from Moderns To this end a case study is presented for a 44 70 000 year old Middle Paleolithic occupation of a Jordanian rockshelter The research centering on the spatial analysis of artifacts hearths and related data reveals how the Archaic occupants of the shelter structured their activities and placed certain conceptual labels on different parts of the site The structure of Tor Faraj is compared to site structures defined for modern foragers in both ethnographic and archaeological contexts to measure any differences in behavioral organization The comparisons show very similar structures for Tor Faraj and its modern cohorts The implications of this finding challenge prevailing views in the emergence of modern human controversy in which Archaic groups are thought to have had inferior cognition and less complex behavioral social organization than modern foragers And it is generally thought that such behaviors only emerged after the appearance of the Upper Paleolithic dated some 10 20 000 years later than the occupation of Tor Faraj

Stone Tools in the Paleolithic and Neolithic Near East John J. Shea, 2013-02-28 Stone Tools in the Paleolithic and Neolithic Near East A Guide surveys the lithic record for the East Mediterranean Levant Lebanon Syria Israel Jordan and adjacent territories from the earliest times to 6 500 years ago It is intended both as an introduction to this lithic evidence for students and as a resource for researchers working with Paleolithic and Neolithic stone tool evidence Written by a lithic analyst and professional flintknapper this book systematically examines variation in technology typology and industries for the Lower Middle and Upper Paleolithic the Epipaleolithic and Neolithic periods in the Near East It is extensively illustrated with drawings of stone tools In addition to surveying the lithic evidence the book also considers ways in which archaeological treatment of this evidence could be changed to make it more relevant to major issues in human origins research A final chapter shows how change in stone tool designs points to increasing human dependence on stone tools across the long sweep of Stone Age prehistory

The Oxford Handbook of the Archaeology of the Levant Margarete Laura Steiner, Ann E. Killebrew, 2014 This Handbook offers an overview of the archaeology of the Levant Written by leading scholars in the field it integrates the treatment of the archaeology of the region within its larger cultural and social context and focuses chronologically on the Neolithic through to the Persian periods

Case Studies in Environmental Archaeology Elizabeth Jean Reitz, Lee A. Newsom, Sylvia J. Scudder, 1996 This volume contains case studies in environmental archaeology that apply data obtained from various disciplines including zooarchaeology archaeobotany human biology and geoarchaeology to explore important anthropological issues Studies include geological and biological data from sites located in North America the Caribbean basin and South America Rather than critiquing or advocating specific environmental techniques each study demonstrates how and why the information obtained from their use is important to anthropologists and archaeologists

Darwinian Archaeologies Herbert D.G. Maschner, 2013-06-29 Just over 20 years ago the publication of two books indicated the reemergence of Darwinian ideas on the public stage E O Wilson's *Sociobiology* The New Synthesis and Richard Dawkins' *The Selfish Gene* spelt out and developed the implications of ideas that had been quietly revolutionizing biology for

some time Most controversial of all needless to say was the suggestion that such ideas had implications for human behavior in general and social behavior in particular Nowhere was the outcry greater than in the field of anthropology for anthropologists saw themselves as the witnesses and defenders of human diversity and plasticity in the face of what they regarded as a biological determinism supporting a right wing racist and sexist political agenda Indeed how could a discipline inheriting the social and cultural determinisms of Boas Whorf and Durkheim do anything else Life for those who ventured to challenge this orthodoxy was not always easy In the mid 1990s such views are still widely held and these two strands of anthropology have tended to go their own way happily not talking to one another Nevertheless in the intervening years Darwinian ideas have gradually begun to encroach on the cultural landscape in variety of ways and topics that had not been linked together since the mid 19th century have once again come to be seen as connected Modern genetics turns out to be of great significance in understanding the history of humanity

Mississippian Political Economy Jon Muller,2013-11-21

This ambitious work offers a coherent and comprehensive look at the material conditions underlying and stimulating political development in southeastern North America during the Mississippian period After introducing theoretical issues Muller addresses reproduction production distribution and consumption within their social and material contexts Examined through the lens of the production distribution and consumption of prestige and staple goods a profoundly domestic though significantly differentiated Mississippian political economy emerges This study's broad synthetic view ensures that neither environment nor ideology are overemphasized A fine statement of an important theoretical position the volume features considerable graphic and tabular presentation of data

Projectile Technology Heidi Knecht,2013-06-29

Artifacts linked to projectile technologies traditionally have provided the foundations for time space systematics and cultural historic frameworks in archaeological research having to do with foragers With the shift in archaeological research objectives to processual interpretations projectile technologies continue to receive marked attention but with an emphasis on the implications of variability in such areas as design function and material as they relate to the broader questions of human adaptation The reason that this particular domain of foraging technology persists as an important focus of research I think comes in three parts A projectile technology was a crucial part of most foragers strategies for survival it was functionally specific and it generally was fabricated from durable materials likely to be detected archaeologically Being fundamental to meat acquisition and the principal source of calories projectile technologies were typically afforded greater time investment formal modification and elaboration of attributes than others Moreover such technologies tend to display greater standardization because of constraints on size morphology and weight that are inherent to the delivery system The elaboration of attributes and standardization of form gives projectile technologies time and space sensitivity that is greater than most other foraging technologies And such sensitivity is immensely valuable in archaeological research

Becoming Neolithic Trevor Watkins,2023-12-05 *Becoming Neolithic* examines the revolutionary transformation of human life that was

taking place around 12 000 years ago in parts of southwest Asia Hunter gatherer communities were building the first permanent settlements creating public monuments and symbolic imagery and beginning to cultivate crops and manage animals These communities changed the tempo of cultural social technological and economic innovation Trevor Watkins sets the story of becoming Neolithic in the context of contemporary cultural evolutionary theory There have been 70 years of international inter disciplinary research in the field and in the laboratory Stage by stage he unfolds an up to date understanding of the archaeology the environmental and climatic evidence and the research on the slow domestication of plants and animals Turning to the latest theoretical work on cultural evolution and cultural niche construction he shows why the transformation accomplished in the Neolithic began to accelerate the scale and tempo of human history Everything that followed the Neolithic up to our own times has happened in a different way from the tens of thousands of years of human evolution that preceded it This well documented account offers a useful synthesis for students of prehistoric archaeology and anyone with an interest in our prehistoric roots This new narrative of the first rapid transformation in human evolution is also informative to those interested in cultural evolutionary theory *Climate, Environment, and Society in the Pacific during the Last Millennium* Patrick D. Nunn, 2007-10-10 The nature of global change in the Pacific Basin is poorly known compared to other parts of the world *Climate Environment and Society in the Pacific during the Last Millennium* describes the climate changes that occurred in the Pacific during the last millennium and discusses how these changes controlled the broad evolution of human societies typically filtered by the effects of changing sea level and storminess on food availability and interaction Covering the entire period since AD 750 in the Pacific this book describes the influences of climate change on environments and societies during the Medieval Warm Period and the Little Ice Age focusing on the 100 year transition between these a period of rapid change known as the AD 1300 Event Discusses the societal effects of climate and sea level change as well as the evidence for externally driven societal change Synthesizes how climate change has driven environmental change and societal change in the Pacific Basin Contains a comprehensive and up to date survey of the evidence for climate environmental and societal change supported by a full list of references Archaeology Mark Q Sutton, 2015-07-17 Illuminating the world of archaeology Archaeology conveys the excitement of archaeological discovery and explains how archaeologists think as they scientifically find analyze and interpret evidence The main objective of this text is to provide an introduction to the broad and fascinating world of archaeology from the scientific perspective Discussions on the theoretical aspects of archaeology as well as the practical applications of what is learned about the past have been updated and expanded upon in this fourth edition Learning Goals Upon completing this book readers will be able to Discuss the theoretical aspects of archaeology Apply what has been learned about the past Identify the various perspectives archaeologists have Dawn of the Metal Age Jonathan M. Golden, 2016-04-08 The fifth millennium BCE was a period of rapid social change One of the key factors was the developments in technology which led to the rise of the metals industry

Archaeological finds from sites dating to the Chalcolithic period indicate the production and use of copper Dawn of the Metal Age examines a range of sites from copper mines in Jordan and Israel to the villages of the northern Negev where copper was produced in household workshops to a series of cave burials where a range of luxury metal goods were buried with the elite members of Chalcolithic society Ancient technology is reconstructed from the archaeological evidence which also illuminates the changing economic social religious and political environment of the time **The Social Archaeology of the Levant**

Assaf Yasur-Landau, Eric H. Cline, Yorke Rowan, 2018-12-20 The volume offers a comprehensive introduction to the archaeology of the southern Levant modern day Israel Palestine and Jordan from the Paleolithic period to the Islamic era presenting the past with chronological changes from hunter gatherers to empires Written by an international team of scholars in the fields of archaeology epigraphy and bioanthropology the volume presents central debates around a range of archaeological issues including gender ritual the creation of alphabets and early writing biblical periods archaeometallurgy looting and maritime trade Collectively the essays also engage diverse theoretical approaches to demonstrate the multi vocal nature of studying the past Significantly The Social Archaeology of the Levant updates and contextualizes major shifts in archaeological interpretation **Epipaleolithic Subsistence Strategies in the Levant** Guy Bar-Oz, 2021-08-04 Knowledge

of the Levantine Epipaleolithic period plays a critical role in understanding the transition from nomadic hunter gatherer foraging groups to sedentary communities on the threshold of agriculture In this study Bar Oz has clarified many aspects of the relationship between Epipaleolithic foragers and their prey The Epipaleolithic foragers all utilized similar hunting methods as evidenced by culling patterns they used for gazelle and fallow deer Multivariate inter site zooarchaeological and taphonomic research from a single geographical area and ecological setting the coastal plain of Israel provides important records of the Epipaleolithic cultural sequence A wide variety of data highlights uniform patterns of cultural and economic behaviors related to food procurement and processing strategies and demonstrates cultural continuity in subsistence strategies within the Levantine Epipaleolithic sequence **New Approaches to Old Stones** Yorke M. Rowan, Jennie R.

Ebeling, 2016-04-08 Ground stone artefacts were widely used in food production in prehistory However the archaeological community has widely neglected the dataset of ground stone artefacts until now New Approaches to Old Stones offers a theoretical and methodological analysis of the archaeological data pertaining to ground stone tools The essays draw on a range of case studies from the Levant Egypt Crete Anatolia Mexico and North America to examine ground stone technologies From medieval Islamic stone cooking vessels and late Minoan stone vases to the use of stone in ritual and as a symbol of luxury New Approaches to Old Stones offers a radical reassessment of the impact of ground stone artefacts on technological change production and exchange
