Prehistory Of The Rustler Hills:

Prehistory of the Rustler Hills Donny Leon Hamilton, John E. Dockall, Texas A & M University. Department of Anthropology, 1998

Prehistory of the Rustler Hills Donny L. Hamilton, John R. Bratten, 2001-03-15 From these findings Hamilton reconstructs the subsistence patterns and burial practices of these Native Americans whom he identifies as a distinct probably remnant group possibly Hokan speaking that was pushed into the environment by surrounding peoples He concludes by proposing that they should be represented by a new archaeological phase the Castile Phase thus helping to clarify the still poorly understood late prehistory of the Trans Pecos Jacket

Prehistory of the Rustler Hills Donny L. Hamilton, 2010-07-05 The Northeastern Trans Pecos region of Texas is an unforgiving environment for anyone living off the land yet nomadic hunters and gatherers roamed its deserts and mountains and sheltered in caves and sinkholes from around AD 200 to 1450 This book provides detailed insights into the lifeways of these little known prehistoric peoples It places their occupation of the region in a wider temporal and cultural framework through a comprehensive description and analysis of the archaeological remains excavated by Donny L Hamilton at Granado Cave in 1978 Hamilton begins with a brief overview of the geology and environment of the Granado Cave area and reviews previous archaeological investigations Then he and other researchers present detailed analyses of the burials and other material remains found in the cave as well as the results of radiocarbon dating From these findings he reconstructs the subsistence patterns and burial practices of these Native Americans whom he identifies as a distinct group that was pushed into the environment by surrounding peoples He proposes that they should be represented by a new archaeological phase thus helping to clarify the poorly understood late prehistory of the Trans Pecos

Prehistory of the Rustler Hills Donny Leon Hamilton, 2001

The Prehistory of Texas Timothy K. Perttula, 2012-09-24 Paleoindians first arrived in Texas more than eleven thousand years ago although relatively few sites of such early peoples have been discovered Texas has a substantial post Paleoindian record however and there are more than fifty thousand prehistoric archaeological sites identified across the state This comprehensive volume explores in detail the varied experience of native peoples who lived on this land in prehistoric times Chapters on each of the regions offer cutting edge research the culmination of years of work by dozens of the most knowledgeable experts Based on the archaeological record the discussion of the earliest inhabitants includes a reclassification of all known Paleoindian projectile point types and establishes a chronology for the various occupations The archaeological data from across the state of Texas also allow authors to trace technological changes over time the development of intensive fishing and shellfish collecting funerary customs and the belief systems they represented long term changes in settlement mobility and character landscape use and the eventual development of agricultural societies The studies bring the prehistory of Texas Indians all the way up through the Late Prehistoric period ca a d 700 1600 The extensively illustrated chapters are broadly cultural historical in nature but stay strongly focused on important current research problems Taken together they present careful and exhaustive

considerations of the full archaeological and paleoenvironmental record of Texas The Late Archaic across the Borderlands Bradley J. Vierra, 2010-01-01 Why and when human societies shifted from nomadic hunting and gathering to settled agriculture engages the interest of scholars around the world One of the most fruitful areas in which to study this issue is the North American Southwest where Late Archaic inhabitants of the Sonoran and Chihuahuan Deserts of Mexico Arizona and New Mexico turned to farming while their counterparts in Trans Pecos and South Texas continued to forage By investigating the environmental biological and cultural factors that led to these differing patterns of development we can identify some of the necessary conditions for the rise of agriculture and the corresponding evolution of village life The twelve papers in this volume synthesize previous and ongoing research and offer new theoretical models to provide the most up to date picture of life during the Late Archaic from 3 000 to 1 500 years ago across the entire North American Borderlands Some of the papers focus on specific research topics such as stone tool technology and mobility patterns Others study the development of agriculture across whole regions within the Borderlands The two concluding papers trace pan regional patterns in the adoption of farming and also link them to the growth of agriculture in other parts of the world Designing Experimental Research in Archaeology Jeffrey R. Ferguson, 2010-05-15 Each chapter addresses a particular classification of material culture ceramics stone tools perishable materials composite hunting technology butchering practices and bone tools and experimental zooarchaeology detailing issues that must be considered in the development of experimental archaeology projects and discussing potential pitfalls The experiments follow coherent and consistent research designs and procedures that are given theoretical context Contributors outline methods that will serve as a guide in future experiments This degree of standardization is uncommon in traditional archaeological research but is essential to experimental archaeology

Sacred Darkness Holley Moyes, 2012-09-01 Caves have been used in various ways across human society but despite the persistence within popular culture of the iconic caveman deep caves were never used primarily as habitation sites for early humans Rather in both ancient and contemporary contexts caves have served primarily as ritual spaces In *Sacred Darkness* contributors use archaeological evidence as well as ethnographic studies of modern ritual practices to envision the cave as place of spiritual and ideological power and a potent venue for ritual practice Covering the ritual use of caves in Europe Asia Australia Africa Mesoamerica and the US Southwest and Eastern woodlands this book brings together case studies by prominent scholars whose research spans from the Paleolithic period to the present day These contributions demonstrate that cave sites are as fruitful as surface contexts in promoting the understanding of both ancient and modern religious beliefs and practices This state of the art survey of ritual cave use will be one of the most valuable resources for understanding the role of caves in studies of religion sacred landscape or cosmology and a must read for any archaeologist interested in caves
