

condensed, as Thompson suggested in his review of Section 1 (AMERICAN ANTIQUITY, Vol. III, No. 3, p. 293), the data are there, which is the important thing after all. Anyone who does archaeological work in northern South America and lower Central America will find this work indispensable.

ALFRED KIDDER, II
Harvard University

Prehistory in Haiti; A Study in Method. IRVING ROUSE. (Yale University Publications in Anthropology, No. 21, pp. 202, pls. 5, charts 7, tables 27. New Haven, 1939.)

As stated in the title, this book attempts the double purpose of discussing archaeological remains and, at the same time, demonstrating a new technique of presentation, "an experiment in methodology." The author writes under the added handicap of necessarily referring to factual reports still in manuscript, which it is hoped will be published shortly.

The archaeological material on which the book is based comes from eleven hitherto unknown sites and was excavated by the author and Dr. F. G. Rainey in the vicinity of Ft. Liberté on the north coast of Haiti. It may briefly be described as pottery of distinctly West Indian forms with, however, obvious local characteristics and, also, various implements of stone. Among the latter are types which have not previously been published, including many chipped blades.

As each site contained relatively homogeneous phases of culture, to place them in chronological order it was necessary to discuss their contents in detail. Two main periods emerge. The older is featured by camp sites, no evidence of pottery or agriculture, double-bitted axes, little work in bone or shell, but a large quantity of chipped stone artifacts. The second period, subdivided into two parts, is marked by village sites, pottery, agriculture, petaloid celts, many artifacts of bone and shell, and a few chipped implements. All eleven sites are fitted into a time scale arbitrarily fixed at six periods. Finally, the Ft. Liberté set-up is compared and contrasted with remains from other islands in the West Indies and important chronological correlations are established, notably with Puerto Rico.

The average reader will find great difficulty in extracting this information because it is concealed behind a smoke-screen of systematization. This the reviewer regrets, as he happens to be interested primarily in the factual archaeology of the West Indies. Books, we believe, are published to be read by as many people as possible and any technique of presentation which deliberately complicates the facts is to be deplored. The mental maneuvers of an author in studying archaeological material obviously are his own concern, but it seems unnecessary to make the reader face the same gamut unless it is needful for adequate exposition.
