stigmatize to obtain a more valid measure of a program's success. Other myths to be challenged: providing knowledge about mental illness will reduce stigma; community care will de-stigmatize mental illness; and psychiatry people with a mental illness are less discriminated against in developing countries. *Paradigms Lost* concludes by describing key elements in successful anti-stigma work, including the recommended duration of anti-stigma programmes, the involvement of those with mental illness in designing programmes, and the definition of programmes in accordance with local circumstances. A summary of weaknesses of currently held paradigms and corresponding lists of best practice principles to guide future anti-stigma action and research bring this insightful volume to an apt conclusion. *Catholic Apologetical Literature in the United States*
