An Analysis of Gordon W. Allport's The Nature of Prejudice Alexander O'Connor,2017-07-05 With his 1954 book *The Nature of Prejudice* American psychologist Gordon Allport displays the crucial skill of reasoning producing and organizing an argument that was persuasive enough to have a major impact not only in universities but also on government policy The question that Allport tackled was an old one why are people so disposed to prejudice against those from other groups Earlier

psychologists had suggested a number of reasons especially in the case of racial prejudice Some had suggested that racism was a learned behaviour conditioned by negative experiences of other races others that there was an objective rationale to negative racial stereotypes Allport however reasoned that prejudice is essentially a by product of the necessary mental shortcuts the human brain uses to process the vast amount of information it takes in Because our brains want to use as little effort as possible they regularly fall back on simple stereotypes which easily generate prejudice Gathering strong evidence for this hypothesis he reasoned clearly and persuasively that our natural cognitive approach is the most significant factor in accounting for prejudice Going further still Allport also reasoned that once this was better understood social scientists would be able to influence policy makers to curb discrimination by law

Evidence of Prejudice Irwin Borof,2008 Jake Rose a disabled lawyer in San Francisco has a difficult time adjusting to his prosthetic right hand that was a result of an injury on Iwo Jima Now four months later he volunteers to represent Gordon Cox brother of his deceased best friend in the Miyeko Matsui murder
