Examination System M. Ravi Krishna, 2004 Examination is as old as education itself The examination process is the past phase of teaching and learning Traditionally the examination has been a very tough exercise fearful enough for students However with changing times the procedure of conventional examination has changed Now the modern concept of examination is quite progressive and scientific The educationists have introduced new terms like evaluation and measurement Under evaluation the level of knowledge and learning is weighted and under measurement a learner is gauged and allotted score of marks Developing a Sustainable Economy in Cameroon Aloysius Ajab Amin, 2008 Developing a Sustainable Economy in Cameroon is an ambitious effort as the authors try to set a blue print for Cameroon's economy In the 1980s facing economic crisis and as dictated by the structural adjustment programme Cameroon sharply cut public

investment expenditures before later cutting government consumption which were followed by privatisation liquidation of public companies and reduction in the size of the public sector All these measures are believed to have had devastating effects on the economy Given the performance of the economy so far the authors suggest that much more effort with a strong commitment of the main stakeholders is required to guarantee sustainable economic development in Cameroon Truly very few countries in Africa possess such enormous human and natural resources as Cameroon does This volume brings out the challenges Cameroon faces in its quest for development as well as for designing appropriate strategies for addressing those development challenges
