**Winds of Change** Rinie van Est, Quirinus Cornelis van Est, 1999 Tens of thousands of wind

turbines are in operation worldwide today This book gives a detailed account of the rise of modern wind energy technology in California and Denmark its cradle There is a world of difference between the approaches to the development of wind power in these two countries In Denmark groups of neighbors stimulated its decentralized small scale use and gradual development while futuristic looking large scale wind farms sprouted like mushrooms on the Californian hills However the thriving Californian market did not result in a successful American wind turbine industry In contrast the Danish industry currently produces more than half the world output of turbines In Winds of Change Rinie van Est describes how and to what extent public policies influenced the development of wind energy technology and industry in California and Denmark He explains the marked differences between the two countries by looking at the way in which policy makers technicians and entrepreneurs in interplay shaped the development of wind power The book also explores how national political and techno economic traditions guided the activities of these innovators The book is highly relevant for policy experts those working in R D corporate managers environmentalists scientists and technologists who are looking for ways to keep technological innovation in line with social needs and public demands Omslag
