**Governance and the Public Good** William G. Tierney, 2012-02-01 The public good is not merely an economic idea of goods and services but a place where thoughtful debate and examination of the polis can occur In differentiating the university from corporations and other private sector businesses Governance and the Public Good provides a framework for discussing the trend toward politicized and privatized postsecondary institutions while acknowledging the parallel demands of accountability and autonomy placed on sites of higher learning If one accepts the notion of higher education as a public good does this affect how one thinks about the governance of America's colleges and universities Contributors to this book explore the role of the contemporary university its relationship to the public good beyond a simple obligation to educate for jobs and the subsequent impact on how institutions of higher education are and should be governed

*Increasing Access to College* William G. Tierney, Linda Serra Hagedorn, 2002-03-21 Focuses on pre college enrichment programs as a solution to the problem of minority and low income student access to postsecondary education

Making the Grade in College Prep University of Southern California, Los Angeles. School of Education, 2007 The goal of college preparation programs is to help students particularly underrepresented students of color to enroll and succeed in college While many programs focus on strengthening students math and reading skills familiarizing them with college entrance exams and demystifying the college admissions process there are few guidelines for how these programs should be structured and which intervention practices are most effective at achieving the desired results This report draws on several qualitative and quantitative data sources collected as part of a longitudinal study of college preparation programs to gather demographic information and data to determine why students enroll in special programs the attitudes their family and friends have about the program and students academic and non academic behaviors Information was also gathered about student aspirations obstacles self efficacy identity and more The Center for Higher Education Policy Analysis CHEPA seeks

through this research to discern which elements of college preparation programs are more effective than others and why. While research on this topic is ongoing, CHEPA has identified several common program challenges. These are:

- 1 Many programs are geared toward short-term solutions.
- 2 Few programs have coordinated relationships with the schools that the students attend and the postsecondary institutions where students will attend.
- 3 Families are often ill-equipped to provide advice to their children.
- 4 Most programs survive on soft money.
- 5 Program evaluation is absent.
- 6 Student attrition from the day they graduate from high school until the end of their first term at college remains a significant problem.
- 7 Most graduates of college preparation programs attend two-year community colleges or public state universities.
- 8 Academic counseling and social activities are the primary components of college preparation programs.

Program characteristics, instructional components, and desired outcomes are outlined in a flowchart of model college preparation programs. Strategies for improving program effectiveness and next steps for stakeholders conclude this report. This report was produced by the Center for Higher Education Policy Analysis, Rossier School of Education, University of Southern California.

Preparing Students for College and Careers Katie Larsen McClarty, Krista D. Mattern, Matthew N. Gaertner, 2018. This new volume in the NCME series addresses measurement and research issues related to college and career readiness.
