Preparing Children With Disabilities For Life:

Preparing Children With Disabilities for Life Robert Evert Cimera, 2002-12-17 Educating students with disabilities is a team process. By federal law, parents must be involved in the development of their child's educational plan. Unfortunately, few parents or regular educators understand special education, its terms, philosophies, and processes. This book explains in layperson terms what special education is and how to make the special education process more successful for everyone involved. Chapters cover history and legalities of preparing children with disabilities for life, transition of families, preparation for employment, residential living, community adjustment, interpersonal relationships, life-long learning, and developing educational plans. Hundreds of additional resources for parents of children with disabilities, including lists of professional organizations, useful websites, support groups, and other books for further learning on special education, are also provided. While intended for parents and family members of children with disabilities, it will also be of interest to educators who are unfamiliar with special education as well as special educators who are new to the field. *Inclusionary Education for Students with Disabilities* Nancy L. McTaggart, 1994 *Community-Based Education for Students with Developmental Disabilities in Tanzania* Angela Stone-MacDonald, 2013-08-13 Based on a yearlong ethnographic study, this book describes the daily life and work of the Irente Rainbow School, a special education school for students with developmental disabilities in Lushoto, Tanzania. It examines the use of local context, community funds of knowledge, culturally relevant pedagogy, and community support to teach students with disabilities important life skills: independence, self-advocacy, and to fight for their human rights. This book offers several lessons for different audiences: it is a primer on disability and education in a rural African town; an alternative model for non-governmental agencies to consider in designing community-based and community-engaged programs; and a story about an exceptional group of teachers, students, and families who took action to provide an education and a realization of rights for children with disabilities. *Tools for Promoting Independent Living Skills in Individuals with Disabilities* Dimitriadou, Ioanna, Vasileiadis, Ilias, Koutras, Spyros, 2024-10-30 Promoting independent living skills in individuals with disabilities is a crucial aspect of enhancing their quality of life and enabling them to thrive. These skills, which range from personal care and household management to navigating social and community settings, are essential for fostering autonomy and self-reliance. Teaching these skills requires a tailored approach that considers the unique needs of each individual, ensuring that they are equipped to face daily challenges and succeed in the personal and professional aspects of their lives. *Tools for Promoting Independent Living Skills in Individuals With Disabilities* provides a comprehensive resource for educators and specialists working across multiple disciplines. Featuring expert contributions, it focuses on promoting independence in individuals with disabilities of all ages and types. With practical strategies and real-world applications, the book serves as a vital tool for those teaching life skills to help individuals with disabilities achieve greater autonomy and a higher quality of life. **Organising Learning in the Primary School Classroom** Joan Dean, 2013-01-11

Since the publication of the first edition *Organising Learning in the Primary School Classroom* has been recognised as an indispensable guide for primary school teachers in their quest for more effective practice in the classroom. It gives help on everyday problems of classroom organisation: how to group children, how to set out a classroom physically, how to make the most efficient use of time and resources. Now in its 4th edition, the book retains these strengths but has been brought right up to date with the many changes that are taking place nationally and globally. The book begins with a survey of these recent changes and goes on to consider their implications for teachers if today's schools are to prepare children for what is to some extent an unknown future. In addition to chapters on classroom organisation, the book includes chapters on child development, creativity, PSHE and citizenship, teaching language and literacy, ICT, mathematics and science, the foundation subjects, working with parents, working effectively with Teaching Assistants, evaluating and assessing learning, teaching children with special educational needs or exceptional ability. Throughout the aim is to get teachers and student teachers to analyse their own classrooms and to produce solutions that will work for them. This book will be invaluable not only to newly qualified teachers but also to experienced practitioners wishing to review their work.
