Preparing Our Teachers Opportunities For Better Reading Instruction:

Preparing Our Teachers Dorothy Strickland, Catherine Snow, Peg Griffin, M. Susan Burns, Peggy McNamara, 2002-11-11 Today's teachers face huge challenges especially for teaching reading in the primary grades. They must understand as much as possible about how children develop and learn what they know and what they can do. They must be able to apply a variety of teaching techniques to meet the individual needs of students. Equally important, teachers must identify students' strengths and weaknesses and plan instructional programs that help students make progress. But a recent study reveals that fewer than half of American teachers report feeling very well prepared to meet such challenges. Preparing Our Teachers seeks to improve that statistic by extracting practical information from the groundbreaking report issued by the National Research Council in 1998. This new book carefully outlines what classroom teachers need to know and what they need to be able to do to give children in preschool through grade 4 the essential opportunities to become good readers. It discusses what teacher education programs need to do to make their students good teachers of good readers and looks at what schools and school districts need to do to keep their teachers up to date for teaching reading. Students at risk for educational failure represent the fastest growing segment of our school population. Preparing Our Teachers demonstrates to educators, parents, and policy makers alike that the first and most enduring way to meet children's literacy needs is to support their teachers and teachers to be Knowledge to Support the Teaching of Reading Catherine Snow, Peg Griffin, M. Susan Burns, 2007-08-17 Basic reading proficiency is key to success in all content areas, but attending to students' literacy development remains a challenge for many teachers, especially after the primary grades. Knowledge to Support the Teaching of Reading presents recommendations for the essential knowledge about the development, acquisition, and teaching of language and literacy skills that teachers need to master and use. This important book is one result of an initiative of the National Academy of Education's Committee on Teacher Education, whose members have been charged with the task of creating a core knowledge base for teacher education. Using Informative Assessments towards Effective Literacy Instruction Evan Ortlieb, Earl H. Cheek Jr., 2012-03-21 Using Informative Assessments towards Effective Literacy Practices offers research-driven solutions to improve student literacy success through the exploration of advancements in literacy assessment and instruction. Recommendations are provided on selecting appropriate assessments and effectively using data for planning and instruction. Assessing and Addressing Literacy Needs Barbara Combs, 2011-04-07 Assessing and Addressing Literacy Needs: Cases and Instructional Strategies is designed to help preservice and inservice teachers understand the problems that children encounter when learning to read and to provide key instructional strategies related to best practices in literacy instruction. The text promotes reflection and analysis that will provoke thoughtful responses and discussions to help teachers use assessments to identify problems and employ appropriate strategies to help their students become better readers.
