A Public Health Guide to Ending the Opioid Epidemic
Michael R. Fraser, Jay C. Butler, 2019 THE DEFINITIVE GUIDE FOR PUBLIC HEALTH PROFESSIONALS FIGHTING THE OPIOID EPIDEMIC The opioid crisis has devastated families and communities across the United States Changes in policing and medical practices have been swift but they've achieved only a modest impact on the fundamental causes of substance misuse and addiction The necessity for upstream intervention is clear But what does that look like A Public Health Guide to Ending the Opioid Epidemic does what only a public health approach can offer credible scalable and empirically supported approaches to uprooting one of society's most pernicious challenges It systemizes the core tenets of the public health approach to substance misuse and addiction which alongside clinical approaches prescription guidelines and monitoring increased access to overdose reversal medication and medication assisted treatment availability offers a roadmap for end to end response to this diverse problem Core elements of the public health approach all covered here in practical terms include How to support community based primary prevention of substance misuse and addiction in different settings and populations How to effectively address the cultural social and environmental aspects of health that are driving the current epidemic How governmental public health agencies play a significant role in responding to the epidemic both in the field's traditional model of disease surveillance and control and in more directed approaches to health promotion building community resilience addressing the impact of adverse childhood events mitigating the root causes of addiction These frameworks offer a foundation for understanding analyzing and meaningfully impacting the burden of opioid misuse and addiction in any population or setting A Public Health Guide to Ending the Opioid Epidemic is a roadmap for meaningful change

Pain Management and the Opioid Epidemic National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Committee on Pain Management and Regulatory Strategies to Address Prescription Opioid Abuse, 2017-09-28 Drug overdose driven largely by overdose related to the use of opioids is now the leading cause of unintentional injury death in the United States The ongoing opioid crisis lies at the intersection of two public health challenges reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function In the context of the growing opioid problem the U S Food and Drug Administration FDA launched an Opioids Action Plan in early 2016 As part of this plan the FDA asked the National

Academies of Sciences Engineering and Medicine to convene a committee to update the state of the science on pain research care and education and to identify actions the FDA and others can take to respond to the opioid epidemic with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk benefit framework for opioid approval and monitoring
