Prescription For Longevity:

A Doctor'S Prescription for Longevity and Survival Vincent N. Cefalu Sr. M.D.,2015-03-28 This book offers advice to people who would like to hopefully increase their longevity and have as much enjoyment and fulfillment out of life as possible I present an honest and commonsense approach on how to remain as healthy as theoretically possible while keeping some credibility and satisfaction in life I provide many recommendations that deal with real life situations instead of fantasies and present conclusions based on my having personally performed over 1 500 autopsies and my own deleterious consequences of having developed atherosclerotic disease from being over four hundred pounds for over thirty years In this book I detail a very strict diet plan the perfect diet which I created that resulted in my losing 272 pounds over a ten month period and whereby my continued adherence has allowed me to be able to maintain this weight However I relate the many problems that I developed in following such a rigorous diet program and offer prophylactic advice to people electing to lose weight extremely fast so that they won't encounter the same problems I also provide some very inexpensive and easy to prepare low calorie recipes that I concocted which are good appetizers and filler uppers In my usual witty satiric manner I discuss many dangerous drugs that should be avoided and mention several foods that should be eliminated from a person's diet along with furnishing some of my own little homemade poems along the way Through my experiences as having served as coroner I disclose many hazards that exist in our environment mention some simple things that people tend to forget that too often result in fatalities and present my views of many of the over the counter products By making overweight and diabetic individuals aware of certain physiological processes that are continuously occurring in our bodies hopefully they would be in a better position to understand and interpret my suggestions In brief I have something to offer all my readers from the most radical my diet plan to the most realistic and conservative In a nutshell I lived through what I now advocate against since I discovered too late what obesity could do to the human body *Prescription for Longevity* James Scala,1992 Offers the most recent scientific findings that show exactly how nutrients and a variety of foods work to protect against such diseases as cancer cataracts arthritis and inflammatory bowel disease **The Memory Prescription** Gary
