Presenting New Zealand:

New Zealand And The World: Past, Present And Future Robert G Patman, Iati Iati, Balazs Kiglics, 2017-12-28 The aim of this book is to provide the reader with an overview of New Zealand's international relations. It is a country that has often shown an international presence that is out of proportion to the modest spectrum of national economic, military and diplomatic capabilities at its disposal. In this volume the editors have called upon a range of specialists representing a range of views drawn from the worlds of academia, policy making and civil society. It is an attempt to present a rounded picture of New Zealand's place in the world, one that does not rely exclusively on any particular perspective. The book does not claim to be exhaustive. But it does seek to present a more wide ranging treatment of New Zealand's foreign relations than has generally been the case in the past. Five broad themes help shape and organize the contributions to the text. Presenting New Zealand Philip Temple, 2008 Illustrated with over 150 historical photographs, paintings and maps. Presenting New Zealand is a visually sumptuous and informative account of how the country has developed into the independent nation that the rest of the world recognises today. Starting with the huge rifts of prehistoric times that tore it apart from Gondwana, the book traces the arrival of the first Polynesian canoes, the exploration and settlement by Europeans, and the modern day social, economic and political achievements of this remarkable country. In forgoing modern scenic illustration and instead focusing the text and images exclusively on history, this fully revised edition is a major departure from the work as it appeared in its original edition, which was published in 2001 by New Holland under the title of Presenting New Zealand: A nation's heritage.

Insect Conservation: Past, Present and Prospects Tim R. New, 2012-03-14 The history of interest and practice in insect conservation is summarised and traced through contributions from many of the leaders in the discipline to provide the first broad global account of how insects have become incorporated into considerations of conservation. The essays collectively cover the genesis and development of insect conservation, emphasising its strong foundation within the northern temperate regions and the contrasts with much of the rest of the world. Major present day scenarios are discussed together with possible developments and priorities in insect conservation for the future. **Past Law, Present Histories** Diane Kirkby, 2012-09-01 This collection brings methods and questions from humanities, law and social sciences disciplines to examine different instances of lawmaking.
