William Dow, Roberta Maguire

Preserving The Press How Daily Newspapers Mobilized To Keep Their Readers:

The Vanishing Newspaper [2nd Ed] Philip Meyer, 2009-09 In this edition Meyer's analysis of the correlation between newspaper quality and profitability is updated and applied to recent developments in the newspaper industry Meyer argues that understanding the relationship between quality and profit is central to sustaining journalistic excellence and preserving journalism's unique social functions Provided by the publisher

Preserving the Press Leo Bogart, 1991 The Newspaper Readership Project 1977-1983 was an unprecedented cooperative attempt by the American newspaper industry to halt the downward trend in readership and circulation The Project had an enormous impact on American newspapers it spurred such changes in their content as special sections and new graphics and led to important innovations in distribution and promotion Leo Bogart was a central figure in the conception and execution of the Project so his account is truly an insider's view of the interplay of the Project and the people involved in it *Preserving the Press How Daily Newspapers Mobilized to Keep Their Readers* is an insider account that vividly describes the personalities organizations and policy debates of the American daily newspaper business at a critical moment in its history Exciting and informative it shows how this major American institution confronted the great social and technological changes that threatened its established position Bogart demonstrates the difficulties of translating research findings into actual changes in practice reviews controversies over the Project's promotional efforts and reports on dramatic changes that occurred in newspaper distribution methods

When MBAs Rule the Newsroom Doug Underwood, 1995 Writing with anger but with a deep affection for the trade he examines the growing economic pressures within the industry the roots of the managerial revolution and the impact of marketplace journalism on the operation of the newsroom and employee morale

Estimating Equilibrium Exchange Rates John Williamson, 1994 The problems of exchange rate misalignments and the resulting payments imbalances have plagued the world economy for decades At the Louvre Accord of 1987 the Group of Five industrial countries adopted a system of reference ranges for exchange rate management influenced by proposals of C Fred Bergstan and John Williamson for a target zone system The reference range approach has however been operated only intermittently and half heartedly and questions continue to be raised in policy and scholarly circles about the design and operation of a full fledged target zone regime This volume with chapters by leading international economists explores one crucial issue in the design of a target zone system the problem of calculating Williamson's concept of the fundamental equilibrium exchange rate FEER Williamson contributes an overview of the policy and analytic issues and a second chapter on his own calculations

Soft News Goes to War Matthew A. Baum, 2011-10-16 The American public has consistently declared itself less concerned with foreign affairs in the post Cold War era even after 9/11 than at any time since World War II How can it be then that public attentiveness to U.S. foreign policy crises has increased This book represents the first systematic attempt to explain this apparent paradox Matthew Baum argues that the answer lies in changes to television's presentation of political information In so doing he develops a

compelling byproduct theory of information consumption The information revolution has fundamentally changed the way the mass media especially television covers foreign policy Traditional news has been repackaged into numerous entertainment oriented news programs and talk shows By transforming political issues involving scandal or violence especially attacks against America into entertainment the soft news media have actually captured more viewers who will now follow news about foreign crises due to its entertainment value even if they remain uninterested in foreign policy Baum rigorously tests his theory through content analyses of traditional and soft news media coverage of various post WWII U S foreign crises and statistical analyses of public opinion surveys The results hold key implications for the future of American politics and foreign policy For instance watching soft news reinforces isolationism among many inattentive Americans Scholars political analysts and even politicians have tended to ignore the soft news media and politically disengaged citizens But as this well written book cogently demonstrates soft news viewers represent a largely untapped reservoir of unusually persuadable voters

Media, Profit, and Politics Joe Harper, Thom Yantek, 2003 A compilation of essays and commentary delivered at the second annual Kent State University Symposium on Democracy this work recognizes and considers the differences that arise when the competitive forces of commerce clash with the demand for the open availability of information in a democratic society The conflicting roles of advocate initiator and objective reporter for journalists who cover community politics the role of the news media in forming public attitudes toward things political and their role in affecting voter nonparticipation the role of financial considerations in the news media's attempt to provide citizens with needed news and perspective on political affairs and particularly the role of the conglomeration of ownership of news media organizations are a few of the topics discussed in this volume Tuned Out David T. Z. Mindich, 2005 Illuminating the decline in informed citizenship Tuned Out

is an insightful exploration of the generations of Americans who have turned their backs on serious news **Participatory Journalism** Jane B. Singer, David Domingo, Ari Heinonen, Alfred Hermida, Steve Paulussen, Thorsten Quandt, Zvi Reich, Marina Vujnovic, 2011-03-21 Who makes the news in a digital age Participatory Journalism offers fascinating insights into how journalists in Western democracies are thinking about and dealing with the inclusion of content produced and published by the public A timely look at digital news the changes it is bringing for journalists and an industry in crisis Original data throughout in the form of in depth interviews with dozens of journalists at leading news organizations in ten Western democracies Provides a unique model of the news making process and its openness to user participation in five stages Gives a first hand look at the workings and challenges of online journalism on a global scale through data that has been seamlessly combined so that each chapter presents the views of journalists in many nations highlighting both similarities and differences both national and individual Can Journalism Survive? David M. Ryfe, 2013-08-27 Journalists have failed to respond adequately to the challenge of the Internet with far reaching consequences for the future of journalism and democracy This is the compelling argument set forth in this timely new text drawing on the most extensive ethnographic fieldwork in American

newsrooms since the 1970s David Ryfe argues that journalists are unable or unwilling to innovate for a variety of reasons in part because habits are sticky and difficult to dislodge in part because of their strategic calculation that the cost of change far exceeds its benefit and in part because basic definitions of what journalism is and what it is for anchor journalism to tradition even when journalists prefer to change The result is that journalism is unraveling as an integrated social field it may never again be a separate and separable activity from the broader practice of producing news One thing is certain whatever happens next it will have dramatic consequences for the role journalism plays in democratic society and perhaps will transform its basic meaning and purpose Can Journalism Survive is essential and provocative reading for all concerned with the future of journalism and society *The Social Embeddedness of Media Use* Henk Westerik, 2009-05-05 Scholars in the field of communication research have extensively studied television viewing in general and watching television news in particular The book looks at the subject from an integrative theoretical perspective Based on Schutzian sociology and action theoretical approaches to media use the author argues that immediate social influences and other everyday life situations largely determine television use and that the influence of short term situational characteristics are often overlooked in person centered explanatory models In three empirical studies the role of short term situations and the influence of immediate social surroundings is analyzed The use of Discrete Time Event History Analysis is an innovative way to look at household diary data Findings reveal how family members influence each other in many ways Watching television turns out to be an integral part of everyday life in the family but also a force that may reduce family interaction It is shown that television may serve as a surrogate for those family members that are not present and that family members while present at home follow each others example Partners are shown to mimic each other children to mimic their parents and parents follow the example set by their children Television news viewing in contrast to general television viewing is less determined by the immediate influence of others Also the individual motivations for news viewing vary throughout the day First exposure to television news appears to be motivated by other factors than subsequent exposure A need for surveillance dominates first exposure but subsequent exposure appears to be governed by other more ritualistic motivations The book is important to scholars graduate level students and practitioners who are concerned with theoretical and methodological insights in the phenomenon of television viewing in everyday life **Bad News** Batya Ungar-Sargon, 2021-10-26 Something is wrong with American journalism Long before fake news became the calling card of the Right Americans had lost faith in their news media But lately the feeling that something is off has become impossible to ignore That s because the majority of our mainstream news is no longer just liberal it s woke Today s newsrooms are propagating radical ideas that were fringe as recently as a decade ago including antiracism intersectionality open borders and critical race theory How did this come to be It all has to do with who our news media is written by and who it is written for In *Bad News How Woke Media Is Undermining Democracy* Batya Ungar Sargon reveals how American journalism underwent a status revolution over the

twentieth century from a blue collar trade to an elite profession As a result journalists shifted their focus away from the working class and toward the concerns of their affluent highly educated peers With the rise of the Internet and the implosion of local news America's elite news media became nationalized and its journalists affluent and ideological And where once business concerns provided a countervailing force to push back against journalists' worst tendencies the pressures of the digital media landscape now align corporate incentives with newsroom crusades The truth is the moral panic around race encouraged by today's elite newsrooms does little more than consolidate the power of liberal elites and protect their economic interests And in abandoning the working class by creating a culture war around identity our national media is undermining American democracy *Bad News* explains how this happened why it happened and the dangers posed by this development if it continues unchecked

Information Needs of Communities Steven Waldman, 2011-09 In 2009 a bipartisan Knight Commission found that while the broadband age is enabling an info and commun renaissance local communities in particular are being unevenly served with critical info about local issues Soon after the Knight Commission delivered its findings the FCC initiated a working group to identify crosscurrent and trend and make recommendations on how the info needs of communities can be met in a broadband world This report by the FCC Working Group on the Info Needs of Communities addresses the rapidly changing media landscape in a broadband age Contents Media Landscape The Policy and Regulatory Landscape Recommendations Charts and tables This is a print on demand report

No Longer Newsworthy Christopher R. Martin, 2019-05-15 Until the recent political shift pushed workers back into the media spotlight the mainstream media had largely ignored this significant part of American society in favor of the moneyed upscale consumer for more than four decades Christopher R Martin now reveals why and how the media lost sight of the American working class and the effects of it doing so The damning indictment of the mainstream media that flows through *No Longer Newsworthy* is a wakeup call about the critical role of the media in telling news stories about labor unions workers and working class readers As Martin charts the decline of labor reporting from the late 1960s onwards he reveals the shift in news coverage as the mainstream media abandoned labor in favor of consumer and business interests When newspapers especially wrote off working class readers as useless for their business model the American worker became invisible In *No Longer Newsworthy* Martin covers this shift in focus the loss of political voice for the working class and the emergence of a more conservative media in the form of Christian television talk radio Fox News and conservative websites Now with our fractured society and news media Martin offers the mainstream media recommendations for how to push back against right wing media and once again embrace the working class as critical to its audience and its democratic function

The Future of News Philip S. Cook, Douglas Gomery, Lawrence W. Lichty, 1992-04 Analyzing these and other trends *The Future of News* offers a thoughtful and provocative preview of the media's role in the coming century

What's Next? Robert Snyder, 2018-04-24 The future of journalism isn't what it used to be As recently as the mid 1960s few would have predicted the shocks and transformations

that have swept through the news business in the last three decades the deaths of many afternoon newspapers the emergence of television as people's primary news source and the quicksilver combinations of cable television VCRs and the Internet that have changed our ways of reading seeing and listening The essays in this volume seek to illuminate the future prospects of journalism Mindful that grandiose predictions of the world of tomorrow tend to be the fantasies and phobias of the present written large in the 1930s and 1940s magazines such as Scribner's Barron's and Collier's forecast that one day we would have an airplane in every garage the authors of *What's Next* have taken a more careful view The writers start with what they know the trends that they see in journalism today and ask where will they take us in the foreseeable future For some media such as newspapers the visible horizon is decades away For others particularly anything involving the Internet responsible forecasts can look ahead only for a matter of years Where the likely destinations of present trends are not entirely clear the authors have tried to pose the kinds of questions that they believe people will have to address in years to come While being mindful of the tremendous influence of technology one must remember that computers punditry or market share will not ordain the future of journalism Rather it will be determined by the sum of countless actions taken by journalists and other media professionals These essays with their hopes and fears cautions and enthusiasms questions and answers are an effort to create the best possible future for journalism This volume will be of interest to media professionals academics and others with an interest in the future of journalism

What are Journalists For? Jay Rosen, 1999-01-01 He traces the intellectual roots of the movement and shows how journalism can be made vital again by rethinking exactly what journalists are for Jacket

Cultural Journalism and Cultural Critique in the Media Nete Kristensen, Unni From, 2018-10-03 This book addresses a topic in journalism studies that has gained increasing scholarly attention since the mid 2000s the coverage and evaluation of arts and culture or what we term cultural journalism and cultural critique The book highlights three approaches to this emerging research field 1 the constant challenge of demarcating what constitutes the cultural in cultural journalism and cultural critique and the interlinks of cultural journalism and cultural critique 2 the dialectic of globalization s cultural homogenization and the specificity of local national cultures and 3 the need to rethink perhaps even redefine cultural journalism and cultural critique in view of the digital media landscape Cultural journalism is used as an umbrella term for media reporting and debating on culture including the arts value politics popular culture the culture industries and entertainment Therefore some of the contributions this book apply a broad approach to the cultural when theorizing and analyzing the production and content of cultural journalism and the professional ideology self perception and legitimacy struggles of cultural journalists and editors Other contributions demarcate their field of study more narrowly both topically and generically by engaging with very specific sub areas such as film criticism or television series This book was originally published as a special issue of Journalism Practice Converging Media, Diverging Politics Mike Gasher, 2005-01-01 What purpose does the news media serve in contemporary North American society In this collection of essays experts from both the United States and Canada investigate this question exploring the effects of media concentration in democratic systems Specifically the scholars collected here consider from a range of vantage points how corporate and technological convergence in the news industry in the United States and Canada impacts journalism s expressed role as a medium of democratic communication More generally and by necessity Converging Media Diverging Politics speaks to larger questions about the role that the production and circulation of news and information does can and should serve The editors have gathered an impressive array of critical essays featuring interesting and well documented case

studies that will prove useful to both students and researchers of communications and media studies
