Preserving The Worlds Great Cities The Destruction And Renewal Of The Historic Metropolis:

Preserving the World's Great Cities Anthony M. Tung, 2001 Both epic and intimate this is the story of the fight to save the world's architectural and cultural heritage as it is embodied in the extraordinary buildings and urban spaces of the great cities of Asia the Americas and Europe Never before have the complexities and dramas of urban preservation been as keenly documented as in Preserving the World's Great Cities In researching this important work Anthony Tung traveled throughout the world to visit remarkable buildings and districts in China Italy Greece the U.S. Japan and elsewhere Everywhere he found both the devastating legacy of war economics and indifference and the accomplishments of people who have worked and sometimes risked their lives to preserve and renew the most meaningful urban expressions of the human spirit From Singapore's blind rush to become the most modern city of the East to Warsaw's poignant and heroic effort to resurrect itself from the Nazis systematic campaign of physical and cultural obliteration from New York and Rome to Kyoto and Cairo we see the city as an expression of the best and worst within us This is essential reading for fans of Jane Jacobs and Witold Rybczynski and everyone who is concerned about urban preservation From the Hardcover edition Tradition, Democracy and the Townscape of Kyoto Christoph Brumann, 2012 Kyoto is both a popular destination for tourists and home to one and a half million inhabitants There is lively debate about how best to develop the city involving a variety of stakeholders forming a particlar social arena that has no match elsewhere in Japan Based on ethnographic fieldwork the book analyses the social tensions and conflicts about the built environment and the public cultural heritage in Kyoto Living with Heritage in Cairo Ahmed Sedky, 2009-09-01 The Arab Islamic city has been always a glamorous urban dream in human cultural memory This is manifested in Cairo the world's largest medieval urban system where traditional lifestyles are still implemented Nevertheless despite the extensive efforts to preserve Historic Cairo it is sadly vulnerable Ahmed Sedky investigates the reasons behind this condition exploring and comparing regional and international case studies Questions such as how and what to conserve are raised and elaborated through the perspectives of different stakeholders A resulting evaluative framework is accumulated that underpins the criteria for assessing area conservation in the Arab Islamic context and that can be used to delineate the causes responsible for the present condition of Historic Cairo Global Tokyo Jiewon Song, 2020-07-09 This book examines heritage led regeneration and decision making processes in Tokyo s urban centres of Nihonbashi and Marunouchi Detailing some of the city s most prominent and recent redevelopment projects Jiewon Song recognizes key institutions and actors their collective actions as placemakers and how they project the authenticity of urban places in planning processes Song argues that heritage led regeneration tends to monopolize authenticity by weakening the visibility of other cultural and historic qualities in urban places Authenticity consequently turns into a singular entity leading to the homogenization of urban places As cities increasingly seek authenticity in the urban age nation states initiate top down processes to achieve such ends interweaving nationalism and national narratives into placemaking practices In this fashion

Song challenges existing scholarship on urban conservation global cities and the notion of authenticity Cold War Cities Richard Brook, Martin Dodge, Jonathan Hogg, 2020-12-20 This book examines the impact of the Cold War in a global context and focuses on city scale reactions to the atomic warfare It explores urbanism as a weapon to combat the dangers of the communist intrusion into the American territories and promote living standards for the urban poor in the US cities The Cold War saw the birth of atomic urbanisation central to which were planning politics and cultural practices of the newly emerged cities This book examines cities in the Arctic Europe Asia and Australasia in detail to reveal how military political resistance and cultural practices impacted on the spaces of everyday life It probes questions of city planning and development such as How did the threat of nuclear war affect planning at a range of geographic scales What were the patterns of the built environment architectural forms and material aesthetics of atomic urbanism in difference places And how did the Bomb manifest itself in civic governance popular media arts and academia Understanding the age of atomic urbanism can help meet the contemporary challenges that cities are facing The book delivers a new dimension to the existing debates of the ideologically opposed superpowers and their allies their hemispherical geopolitical struggles and helps to understand decades of growth post Second World War by foregrounding the Cold War Beyond Description Ryan Bishop, John Phillips, Wei-Wei Yeo, 2004-08-02 Treated from a range of disciplinary perspectives this book addresses and challenges issues of space historicity architecture and textuality by focusing on Singapore's singular position in the region and as a global city

Wonder City Lynn Ellsworth,2025-05-06 Reimagining our cities for a sustainable and human centric future In her groundbreaking book Wonder City Lynn Ellsworth delves deep into the heart of modern urban life casting a critical eye on the transformative changes sweeping through cities like New York This compelling journey into the world of urban development goes beyond the usual narrative serving as a passionate call to action that encourages readers to actively participate in shaping the future of their cities Ellsworth expertly navigates through complex themes such as affordable housing urban planning historic preservation and architecture With a focus on major cities undergoing significant transformations Wonder City offers an insightful examination of the challenges and opportunities that define contemporary urban life At the core of this engaging narrative is a striking critique of the real estate industry s influence over urban landscapes Ellsworth reveals how historic and culturally rich urban settings are increasingly being overshadowed by the rise of impersonal glass towers a trend she argues is driven by the industry s grip on politicians and technocrats This analysis is both eye opening and unsettling shedding light on the forces reshaping our urban environments Wonder City is more than a critique however Ellsworth provides a pragmatic blueprint for revitalizing urban spaces She champions the need for affordable housing sustainable urban planning and architecture that respects and enhances the human experience Her arguments challenge the prevailing economic theories behind housing supply and question the architectural ideologies that often justify the demolition of historic urban assets This book is an essential read for urban planners policymakers and

anyone interested in the future of urban living Ellsworth's clear accessible insights into complex issues make Wonder City a vital contribution to the discourse on urban development appealing to a broad audience that cares about the dynamics and **Painting the City Red** Yomi Braester, 2010-04-07 An examination of the role of cinema and theater in representing urban transformations in China from 1949 to the present Architectural Conservation in Asia John H. Stubbs, Robert G. Thomson, 2016-11-10 The first comprehensive overview of architectural conservation in Asia Internationally renowned author John Stubbs follows up on the success of his previous volumes Time Honored A Global View of Architectural Conservation and Architectural Conservation in Europe and the Americas Architectural conservation is a rapidly expanding and under researched field in Asia and is international experts are often brought in making the subject of considerable interest to international academics Boxes and case studies by local experts add depth and interest to the authors meticulous research A website with extra information and resources accompanies the series http conservebuiltworld com Cultural Landscape & Heritage Paradox Tom Bloemers, Henk Kars, Arnold Van der Valk, 2010 The basic problem is to what extent we can know past and mainly invisible landscapes and how we can use this still hidden knowledge for actual sustainable management of landscape s cultural and historical values It has also been acknowledged that heritage management is increasingly about the management of future change rather than simply protection This presents us with a paradox to preserve our historic environment we have to collaborate with those who wish to transform it and in order to apply our expert knowledge we have to make it suitable for policy and society The answer presented by the Protection and Development of the Dutch Archaeological Historical Landscape programme pdl bbo is an integrative landscape approach which applies inter and transdisciplinarity establishing links between archaeological historical heritage and planning and between research and policy **Second-Order Preservation** Erica Avrami, 2024-12-17 An urgent appeal to rethink the heritage enterprise A critical reassessment of historic preservation policies in the United States Second Order Preservation brings needed attention to the hierarchical underpinnings and effects of established preservation frameworks Questioning the criteria by which value is ascribed to historic buildings and neighborhoods Erica Avrami works to elucidate and transform how and which claims to place become codified in and reinforced through public policy As she eschews dominant case study approaches that center the individual object of preservation such as a discrete building or site Avrami develops the concept of second order preservation as a means of integrating broader considerations around social justice equitable land use planning and environmental sustainability Ranging from municipal to state to national and international levels of governance her critique of the origins and evolution of heritage policy reveals how this conventional emphasis on the object has contributed to policy tensions and systemic exclusion Stressing the need to reform current preservation practices to serve more diverse publics Avrami encourages a turn to an approach that substantively considers contexts and implications of preservation in the scheme of climate and justice Second Order Preservation maintains the interrelation between theory and

practice serving as both a critical reflection and a provocation aimed at advancing a more just set of urban policy agendas <u>Underglobalization</u> Joshua Neves, 2020-03-06 Despite China's recent emergence as a major global economic and geopolitical power its association with counterfeit goods and intellectual property piracy has led many in the West to dismiss its urbanization and globalization as suspect or inauthentic In Underglobalization Joshua Neves examines the cultural politics of the fake and how frictions between legality and legitimacy propel dominant models of economic development and political life in contemporary China Focusing on a wide range of media technologies and practices in Beijing Neves shows how piracy and fakes are manifestations of what he calls underglobalization the ways social actors undermine and refuse to implement the specific procedures and protocols required by globalization at different scales By tracking the rise of fake politics and transformations in political society in China and globally Neves demonstrates that they are alternate outcomes of globalizing processes rather than anathema to them Global Im-Possibilities Phoebe Godfrey, Mary Buchanan, 2021-07-01 At a time when environmental and social stakes are at their highest with rising crises and contradictions at the nexus of a building sense of environmental and social collapse there are no easy solutions Global Im Possibilities explores just what can be done around the world to ameliorate this dynamic Using a range of essays and a multitude of case studies this book explores what new lessons can be learned from examining the challenges and impediments to achieving just sustainabilities on the levels of policy planning and practice and considers how these challenges and impediments can be addressed by individuals and or governments Taking a nuanced approach to provide an intersectional analysis of a particular issue relating to the ideals for achieving sustainability this book asserts that that it is only in recognizing such complexity that we can hope to achieve just sustainabilities Built Design and the Rhetoric of Cities Kathleen M. Vandenberg, 2023-05-04 In Built Design and the Rhetoric of Cities Kathleen M Vandenberg explores how cities are imagined designed and constructed and analyzes the impact of built design on the movement behavior and experience of people in urban areas Vandenberg argues that becoming attuned to the built environments of cities is critical to understanding and planning for how they might be reshaped to confront the challenges of this century which include rapid urbanization the global rise in slums climate change and increasing urban air pollution With a focus on London Copenhagen Amsterdam and Washington DC this book invites readers to consider how the built environment influences mobility the availability of green space placemaking and public memory Street level analysis is merged with a humanistic perspective that considers the impact of such urban elements as facades cycle paths sidewalks lighting trees seating parks and monuments on the human experience of cities By design cities speak this book offers an understanding of their rhetoric The Fragmented Politics of Urban Preservation Yue Zhang, 2013-08-01 While urban preservation is almost as old as cities themselves it has become increasingly controversial in modern cities In this book Yue Zhang presents a cross national comparative analysis of the politics of urban preservation Based on comprehensive archival research and more than two hundred in depth interviews in Beijing Chicago and Paris Zhang finds

that urban preservation provides a tool for diverse political and social actors to frame their propositions and advance their favored courses of action In cities from West to East divergent political and economic interests have caused urban preservation to become contested Exploring three of the world's great cities Zhang deftly navigates readers through each case study illustrating the complexities of the politics of urban preservation in each city In Beijing urban preservation was integral to promoting economic growth and enhancing the city's image during the lead up to the 2008 Olympics in Chicago it is used to increase property values and revitalize neighborhoods and in Paris it offers a channel for national and municipal governments to compete for control over urban space Although urban preservation serves various purposes in these cities Zhang explains how different types of political fragmentation have affected the implementation of preservation initiatives in predictable ways thus generating distinct patterns of urban preservation A comparative urban politics study of unusual breadth The Fragmented Politics of Urban Preservation gives us insight into the complex policy process of urban preservation through which political institutions are intertwined with interests and inclinations fundamentally shaping the direction of urban development the physical forms of cities and the lives of citizens CORP 2012 -Proceedings/Tagungsband Manfred Schrenk, Peter Zeile, Vasily V. Popovich, Pietro Elisei, 2012 RE MIXING THE CITY Towards Sustainability and Resilience There is nothing permanent except change Heraclitus Cities worldwide are facing rapid social economic environmental technological and cultural changes such as rapid urbanisation aging of society security issues housing emergency new solutions on mobility integration of immigrants food and water shortage etc Especially in times of economic crisis and demographic changes in cities it is necessary to think about how to best handle what we have and therefore RE MIXING THE CITY is a challenge to manage and re combine the elements which make our modern cities in order to better respond to change Heritage Planning Harold Kalman, 2014-10-30 Heritage Planning Principles and Process provides a comprehensive overview of heritage planning as an area of professional practice The book first addresses the context and principles of heritage planning including land use law planning practice and international heritage doctrine all set within the framework of larger societal issues such as sustainability and ethics The book then takes readers through the pragmatic processes of heritage practice including collecting data identifying community opinion determining heritage significance the best practices and methods of creating a conservation plan and managing change Heritage Planning recognizes changing approaches to heritage conservation particularly the shift from the conservation of physical fabric to the present emphasis on retaining values associations and stories that historic places hold for their communities The transition has affected the practice of heritage planning and is important for those in the field It is essential reading for both professionals that manage change within the built environment and students of heritage conservation and historic preservation **Planning for Tall Buildings** Michael Short, 2012-11-12 In a time of recession the challenge of building and planning for tall buildings has become even more complex the economics of development legislative and planning

frameworks and the local politics of development must be navigated by those wishing to design and construct new tall buildings which fit within the fabric of their host cities This book is a timely contribution to the debate about new tall buildings and their role and effect on our cities It is divided into two main parts In part one the relationship between tall buildings and planning is outlined followed by an exploration of the impacts that construction of tall buildings can have It focuses in particular on the conservation debates that proposals for new tall buildings raise The first part ends with an analysis of the way in which planning strategies have evolved to deal with the unique consequences of tall buildings on their urban locations The second part of the book focuses on seven examples of medium sized cities dealing with planning and conservation issues and implications that arise from tall buildings These have been chosen to reflect a wide range of methods to either encourage or to control tall buildings that cities are deploying The case studies come from across the western world covering England Manchester Liverpool Newcastle and Birmingham Norway Oslo Ireland Dublin and Canada Vancouver and represent a broad spectrum of approaches to dealing with this issue In drawing together the experiences of these varied cities the book contributes to the ongoing debate about the role of the tall building in our cities their potential impacts and experiences of those who use and inhabit them The conclusions outline how cities should approach the strategic planning of tall buildings as well as how they should deal with the consequences of individual buildings particularly on the built heritage

Environmental Planning in the Caribbean Janet Momsen, 2016-12-05 Illustrated by case studies from both smaller nations such as Carriacou Barbados and St Lucia and larger countries including Cuba Mexico and Jamaica this volume brings together leading writers on environmental planning in the Caribbean to provide an interdisciplinary contemporary critical overview They argue that context is central to the practice of environmental planning in this region Rather than focusing on a deterministic colonial geography and history the contributors propose that whilst a wide range of foreign planning influences can be felt in different contexts environmental planning emerges in specific settings through the fluid interaction between local and global relations of power A number of chapters explore the effects of external discourses upon the region while others examine discourses on Western style democracy and tourism Other important themes covered include participatory planning urban planning physical development planning pest management sustainable development water pollution conservation and ecotourism Basics Landscape Architecture 01: Urban Design Tim Waterman, Ed Wall, 2017-11-02 Basics Landscape Architecture 01 Urban Design seeks to define and describe the role played by landscape architecture in urban design an interdisciplinary practice that is concerned with defining the form of human settlements It provides a brief history and definition of urban design and the roles of the various professions involved Urban Design looks at the elements of urban form and the importance of contextual details from the scale of the city and its region to the importance of materials The text uses case studies to explore the philosophies and methodologies of urban design and to explain the importance of of urban design to landscape architecture and in turn the importance of landscape architecture to urban design
