[The Conservation Movement: A History of Architectural Preservation](#) Miles Glendinning, 2013-01-17 Winner of the 2016 Antoinette Forrester Downing Award presented by the Society of Architectural Historians In many cities across the world particularly in Europe old buildings form a prominent part of the built environment and we often take it for granted that their contribution is intrinsically positive How has that widely shared belief come about and is its continued general acceptance inevitable Certainly ancient structures have long been treated with care and reverence in many societies including classical Rome and Greece But only in modern Europe and America in the last two centuries has this care been elaborated and energised into a forceful dynamic ideology a Conservation Movement infused with a sense of historical destiny and loss that

paradoxically shared many of the characteristics of Enlightenment modernity The close inter relationship between conservation and modern civilisation was most dramatically heightened in periods of war or social upheaval beginning with the French Revolution and rising to a tragic climax in the 20th century age of totalitarian extremism more recently the troubled relationship of heritage and global commercialism has become dominant Miles Glendinning's new book authoritatively presents for the first time the entire history of this architectural Conservation Movement and traces its dramatic fluctuations in ideas and popularity ending by questioning whether its recent international ascendancy can last indefinitely *Giving Preservation a History* Max Page, Randall Mason, 2004 Table of contents [Restoring Women's History Through Historic Preservation](#) Gail Lee Dubrow, Jennifer B. The Man Who Built the Sierra Club Robert Wyss, 2016-06-07 David Brower 1912-2000 was a central figure in the modern environmental movement His leadership vision and elegant conception of the wilderness forever changed how we approach nature In many ways he was a twentieth century Thoreau Brower transformed the Sierra Club into a national force that challenged and stopped federally sponsored projects that would have dammed the Grand Canyon and destroyed hundreds of millions of acres of our nation's wilderness To admirers he was tireless passionate visionary and unyielding To opponents and even some supporters he was contentious and polarizing As a young man growing up in Berkeley California

Brower proved himself a fearless climber of the Sierra Nevada's dangerous peaks. After serving in the Tenth Mountain Division during World War II, he became executive director of the Sierra Club. This uncompromising biography explores Brower's role as steward of the modern environmental movement. His passionate advocacy destroyed lifelong friendships and at times threatened his goals. Yet his achievements remain some of the most important triumphs of the conservation movement. What emerges from this unique portrait is a rich and robust profile of a leader who took up the work of John Muir and along with Rachel Carson made environmentalism the cause of our time.
