The Politics of Child Abuse in America Lela B. Costin, Howard Jacob Karger, David Stoesz, 1997-02-27 Child abuse policy in the United States contains dangerous contradictions which have only intensified as the public slowly accepted it as a middle class problem One contradiction is the rapidly expanding child abuse industry made up of enterprising psychotherapists and attorneys which is consuming enormous resources while thousands of poor children are seriously injured or killed many while being protected by public agencies This rediscovery has also led to the frenzied pursuit of offenders resulting in the sacrifice of some innocent people Moreover the media s focus on the sensational details of high visibility sexual abuse cases has helped to trivialize if not commercialize the child abuse problem As such child abuse

has gone from a social problem to a social spectacle By the 1980s the child welfare system had become a virtual nonsystem marked by a staggering turnover of staff unmanageable caseloads a severe shortage of funding and caseloads composed of highly dysfunctional families many with drug related problems To make room for these families public agencies rationed services by increasingly screening out child abuse reports which contained little likelihood of serious bodily harm In *The Politics of Child Abuse in America* the authors argue that child abuse must be viewed as a public safety problem This redefinition would make it congruent with other family based social trends including the crackdown on domestic violence Children must have the same legal protection currently extended to physically and sexually abused women This can be done by creating a Children's Authority which would have the overall charge for protecting children Specifically Children's Authorities would have the responsibility for providing the six main functions of child protection investigation enforcement placement services prevention and education family support and research and development Offering a unique perspective on the cold reality of this crisis *The Politics of Child Abuse in America* will be a provocative work for social workers and human service personnel as well as the general reader concerned with this timely issue

Crimes against Children Stephen Robertson, 2006-03-08 In the first half of the twentieth century Americans intense concern with sex crimes against children led to a wave of public discussion legislative action and criminal prosecution Stephen Robertson provides the first large scale long term study of how American criminal courts dealt with the prosecution of sexual violence against children Robertson describes how the nineteenth century approach to

childhood as a single phase of innocence began to shift at the end of the century to include several stages of childhood development prompting reformers to create legal categories such as statutory rape and carnal abuse to protect children. However, while ordinary New Yorkers' involvement in the prosecution of those offenses reshaped their understandings of who was a child and produced a new concern to establish the age of their sexual partners, their beliefs in childhood innocence and in a concept of sexuality centered on sexual intercourse remained unchanged. As a result, families' use of the law and jurors' decisions ultimately diminished the protection the new laws offered to children. Robertson's study based on the previously unexamined files of the New York County district attorney's office reveals the importance of child sexuality and sex crimes in twentieth-century American culture.

Grotesque Progeny Mark Heimermann, 2024-11-20

In contemporary Western society, childhood appears more protected than ever to the casual onlooker. Yet we are increasingly fascinated by narratives in which children are depicted as unsettling beings, both dangerous and endangered, sometimes chaotic or even evil. In *Grotesque Progeny: The Commodification of Dangerous and Endangered Children*, author Mark Heimermann argues that these representations reflect cultural anxiety regarding a shifting conception of youths from emotional assets to economic ones. In the early to mid-twentieth century, children who had previously been viewed in part as economic investments were largely moved out of the work force. For decades, children were instead valued primarily as emotional assets. However, the rise of neoliberal capitalism in the 1970s and 1980s and its eventual proliferation throughout our politics and our lives has led to the widespread commodification of social arenas previously kept separate from the capitalist quest for profit. Not even children have escaped being objectified and dehumanized in this manner. Heimermann examines a variety of texts that center on children and adolescents who are marked as different from the adult characters and consequently viewed as grotesque. Chapters cover Jeff Lemire's *Sweet Tooth*, M. R. Carey's *The Girl with All the Gifts*, Katherine Dunn's *Geek Love*, Richard Starkings's *Elephantmen*, Kazuo Ishiguro's *Never Let Me Go*, and more. Because the young characters are not viewed as equal members of society, they must either strike back at those who commodify them or risk facing a lifetime of dehumanization. *Grotesque Progeny* argues that these monstrous depictions reveal societal unease over shortsighted economic and political thinking, the exploitation of children, and the changing nature of childhood. The book addresses a growing concern over which spaces ought to be excluded or removed from the harsh valuations of neoliberalism.

Childhood and Nature is a guide for educators looking to foster in their students a love of nature as well as an understanding of complex environmental issues. This second edition brings new material and fresh insights to David Sobel's foundational exploration of place-based education. Sobel articulates seven design principles that teachers can use to build learning experiences: adventure, fantasy, and imagination; animal allies; maps and paths; special places; small worlds; and hunting and gathering. Students learn and develop vital skills through engagement with their local

environments and communities Miniature ecosystems in the small world of a sandbox for example can help children grasp larger abstract ideas A timely and actionable resource Childhood and Nature shows how centering the world around us in education can create a generation of nature students explorers and protectors
