Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office,1976 Pressure Groups Jeremy John Richardson,1993 *Organizing Democracy* Henk te Velde, Maartje Janse,2017-05-20 This book explores the new types of political organization that emerged in Western Europe and the United States during the nineteenth century from popular meetings to single issue organizations and political parties The development of these has often been used to demonstrate a movement towards democratic representation or political institutionalization This volume challenges the idea that the development of democracy is a story of rise and progress at all It is rather a story of continuous but never completely satisfying attempts of interpreting the rule of the people Taking the perspective of nineteenth century organizers as its point of departure this study shows that contemporaries hardly distinguished between petitioning meeting and association The attraction of organizing was that it promised representation accountability and popular participation Only in the twentieth century did parties reliable partners for the state in averting revolution managing the unpredictable effects of universal suffrage and reforming society This collection analyzes them in their earliest stage as just one of several types of civil society organizations that did not differ that much from each other The promise of organization and the experiments that resulted from it deeply impacted modern politics Local Business Voice Robert J. Bennett,2011-10-27 Local Business Voice provides the first scholarly and systematic history of the Chambers of Commerce from early historical origins in the eighteenth century up to the present date Based on new archival information it provides exhaustive coverage of all UK and Irish chambers as well as detailed examination of early Chambers in the U S including New York Charleston and Boston and early Chambers in Quebec and Jamaica The book traces the importance of early tax protests and anger as motivating forces through interrelation with the American Revolution It traces the emergence of service bundles such commercial arbitration coffee and reading rooms and information and consultancy services as critical to the Chambers unique market position Some of the services had a unique status as trust goods exploiting the chambers USP as high status mutual non profit organisations It demonstrates the challenges for the Chambers as independent voluntary bodies in increasing partnerships with governments and competition with rival institutions and also gives critical overview of key lobbies such as over the Jay Treaty tax expansion the Corn Laws tariff reform and free trade municipal socialism and modern regulatory burdens There is also extensive analysis of chamber membership and motivation tracking changes in structure by firm size sector and corporate and management structures The growth of small firm membership and the value of business networks and in the early chambers religious adherence are shown as key mediums for recruitment and maintaining commitment A definitive account of all local chambers including data appendices and detailed assessment of their significance the book will be an enduring

resource and foundation for research into the Chambers of Commerce s origins historical development and modern position
